

Issuance Program

15. April 2014

THIS IS A NON-BINDING ENGLISH TRANSLATION OF THE ISSUERS' "EMISSIONSPROGRAMM" DATED 15 APRIL 2014 AND PUBLISHED IN GERMAN. THE GERMAN TEXT SHALL BE AUTHORITATIVE AND BINDING. THE ENGLISH LANGUAGE TRANSLATION IS PROVIDED FOR CONVENIENCE ONLY.

dated

12 April 2014

for

Derivatives

of

Zürcher Kantonalbank

and

Zürcher Kantonalbank Finance (Guernsey) Limited

This issuance program has been registered with SIX Swiss Exchange pursuant to Art. 22 of the Additional Rules for the Listing of Derivatives ("ARD") and was approved by SIX Swiss Exchange on 15 April 2014 as a "SIX Swiss Exchange-registered issuance program".

This issuance program applies to all Derivatives (as defined in Section III.B) that are issued from time to time by Zürcher Kantonalbank or Zürcher Kantonalbank Finance (Guernsey) Limited (together the "Issuers" or in their capacity as issuers, each an "Issuer").

It contains all information that is required be published pursuant to the Listing Rules of the SIX Swiss Exchange ("LR") and Scheme F concerning the information to be disclosed about the Issuers, as well as the General Terms of the Derivatives and the general special terms of a Derivatives Series issued by an Issuer under this issuance program. The special terms (together with the General Terms of the Derivatives and the General Special Terms, the "Derivative Terms") of the individual Derivatives Series issued under this issuance program are included in the applicable Final Terms ("Final Terms") for the relevant Derivatives Series and specify the applicability of the then applicable Derivative Terms.

This issuance program, together with the applicable Final Terms, constitute, under Art. 21 para. 1 No. 2 ARD, the complete listing prospectus, as well as the complete issue prospectus for an individual Derivatives Series. The original versions of the issuance program and the applicable complete listing prospectus are in German; foreign-language versions are non-binding translations.

In the event of conflicts between the Derivatives Terms contained in this issuance program and the Final Terms, the Final Terms prevail with respect to the individual Derivatives Series.

Derivatives issued under this issuance program are considered structured products in Switzerland. They do not constitute a collective capital investment as defined in the Federal Law on Collective Capital Investments ("CISA") and therefore are not subject to the protection provisions of the CISA, as well as the approval requirement and the supervision of the Federal Financial Market Supervisory Authority ("FINMA").

This issuance program is available at the freely accessible website of the Zürcher Kantonalbank (<https://zkb-finance.mdgms.com/products/stp/service/emission/index.html>). The final term sheet of each Derivatives Series issued under this issuance program is also available at the freely accessible website of Zürcher Kantonalbank (<http://www.zkb.ch/strukturierteprodukte>) during the term of the individual series. In addition, the Final Terms of each

Derivatives Series issued under this issuance program are available free of charge at Zürcher Kantonalbank, Bahnhofstrasse 9, 8001 Zürich and via the email address documentation@zkb.ch.

Annex 4 C (Model Final Terms for Other Derivatives)

I. RISK FACTORS

This section "Risk Factors", describes the economic and legal risks associated with an investment in Derivatives considered significant by the Issuer. The Issuer, however, gives no assurance that the following statements concerning the risks associated with the securities is exhaustive.

Interested investors should carefully read and take into account the following risk factors, the other information in this document and information incorporated by reference in this document about the Issuer and the Derivatives, as well as the information contained in the brochure "Special Risks in Securities Trading" of the Swiss Bankers Association ("SBA") in considering the purchase of Derivatives. Investors should only make an investment in the Derivatives if they have no doubts about their understanding of the risks and are capable economically of bearing the risk of a loss in the value, or even a total loss of the amount invested, including transaction costs. An investment decision should not be made only on the basis of these risk factors and the other information contained in this document because considering this information is not a substitute for personal advice and analysis by investment, legal, tax and other advisers which is tailored to address the needs, goals, experience and knowledge of the investor. Potential investors are therefore advised to read the entire document including all documents incorporated by reference and to review with their personal advisers (including tax advisers) before investing in the Derivatives.

The order of the presentation of the risk factors is not an indication of the probability of occurrence and the scope of their economic consequences in the event that one or more of these risks materializes. The occurrence of one or more of these risks can have adverse effects on the performance under the Derivatives and/or the assets, financial condition and income of the Issuer, which, in turn, also could have an adverse effect on the performance under the Derivatives. In addition, the Issuer may not be in a position to make payments on or in connection with the Derivatives for reasons other than the risk factors described in this section. This may occur, for example, if the Issuer has failed to recognize significant risks as such or has not anticipated their occurrence.

A. Issuer-related Risk Factors

In the following, Issuer-related risk factors are described below. Among them are the risk in respect of the ability of the Issuer to meet its obligations as the Issuer of the Derivatives and the risk of possible conflicts of interest resulting from interests other than interests as the Issuer of the Derivatives.

a) Risks regarding the ability of the Issuer to meet its obligations

aa) Zürcher Kantonalbank

An investment in Derivatives issued by Zürcher Kantonalbank bears the risk that Zürcher Kantonalbank fails to meet its outstanding obligations, fails to meet them in full and/or fails to fulfill them when due.

The risk concerning the ability of a debtor to meet its obligations is described by the rating of independent rating agencies. A rating is an assessment of the creditworthiness of debtors or bond issuers carried out on the basis of a standardized evaluation of creditworthiness. A rating gives an indication of the probability of timely and full payment of interest and principal or other amounts. The lower the assigned rating on the applicable scale, the higher is the risk estimate of the rating agency that obligations will not be met, not be met in full and/or not paid when due. A rating is not a recommendation to buy or hold Derivatives, but only an assessment by the rating agency with respect to the credit quality of the Issuer at a certain time and provides no assurance that losses will not occur.

On the date of the issue of this document, the ratings assigned to Zürcher Kantonalbank by the rating agencies are as follows:

<u>Rating Agency</u>	<u>Date</u>	<u>Long-term</u>
Standard & Poor's	2 December 2013	AAA
Moody's	16 September 2013	Aaa
Fitch Ratings	11 February 2014	AAA

The main factors for this rating, each of which is consistent with the best-possible rating, are considered to be the governmental guarantee of the Canton of Zurich (see Section III.E.a)kk below) which also is rated AAA by Standard & Poor's, as well as the capitalization of the bank, its market position in the Zurich economic area, the quality of the loan portfolio and the system of risk management

The rating can, nevertheless, be changed at any time by the rating agency. The suspension, reduction or withdrawal of the rating can negatively influence the market price of the securities of the Issuer. A reduction of the rating would have, in addition, adverse effects on the borrowing costs of the Zürcher Kantonalbank and could lead to the creation of new obligations or the immediate repayment of existing obligations which are dependent on the maintenance of specific ratings. In addition, the situation could arise in which the Zürcher Kantonalbank would have to provide additional security for Derivatives transactions following the reduction of its rating pursuant to rating-dependent security agreements.

bb) Zürcher Kantonalbank Finance (Guernsey) Limited

Zürcher Kantonalbank Finance (Guernsey) Limited is an issuance vehicle (a corporation whose purpose is the issue of Derivatives) and the Derivatives issued by it are currently acquired exclusively by its sole shareholder, the Zürcher Kantonalbank with its registered office in Zurich, Switzerland. The activities of Zürcher Kantonalbank Finance (Guernsey) Limited and the aggregate principal amount [of the Derivatives] issued by it annually are therefore influenced by both positive and negative developments in the markets in which it engages in its business activities.

Fundamentally, the risk exists that Zürcher Kantonalbank Finance (Guernsey) Limited cannot fulfill its obligations in full or in part. Zürcher Kantonalbank Finance (Guernsey) Limited has, pursuant to its constitutional document, a capitalization of only CHF 1,000,000.00. Zürcher Kantonalbank Finance (Guernsey) Limited has entered into a Keep-Well Agreement (see Section III.E.a)kk) with Zürcher Kantonalbank which is supported by a governmental guarantee of the Canton of Zurich. In this regard, investors should note that the Keep-Well Agreement has not been made in the form of a guarantee for the benefit of third parties and it applies only to the internal relations of the member companies of the Zürcher Kantonalbank Group.

Investors should, for these reasons, take into account the creditworthiness of Zürcher Kantonalbank Finance (Guernsey) Limited, as well as the creditworthiness of Zürcher Kantonalbank, with which Zürcher Kantonalbank Finance (Guernsey) Limited has entered into the Keep-Well Agreement, in their investment decisions.

In connection with the issue of the Derivatives, the Zürcher Kantonalbank Finance (Guernsey) Limited enters into money market transactions and financial market transactions with various foreign banks which have their registered offices outside Switzerland in order to invest the proceeds of the relevant issue of Structured Products. Zürcher Kantonalbank Finance (Guernsey) Limited is exposed to the potential counterparty risks of its counterparties. Further, Zürcher Kantonalbank Finance (Guernsey) Limited regularly enters into hedging transactions in order to hedge its obligations in respect of a Structured Product issue. Because Zürcher Kantonalbank Finance (Guernsey) Limited effects these transactions exclusively with Zürcher Kantonalbank, it is, in comparison to other issuers with a more widely diversified selection of counterparties, exposed to a so-called risk concentration. Consistent with an internal risk management concept, the Zürcher Kantonalbank for its part, however, regularly enters into hedging transactions in respect of the risks of the relevant transaction associated with an Underlying with a variety of counterparties in order that the economic risk resulting from possible changes in value of the Underlying ultimately are not borne by the Zürcher Kantonalbank Group. The Holders of the Issuer's securities do not have a direct claim on such hedging transactions.

b) Possible Conflicts of Interest

Conflicts of interest for Zürcher Kantonalbank or the Zürcher Kantonalbank Group may result from any transactions in the Underlying and other possible functions or activities in respect of the Derivatives.

aa) Transactions in the Underlying

The Issuer and other companies of the Zürcher Kantonalbank Group may, for its own account or the account of a customer, participate in transactions, or engage in other activities or functions, which are related to the Derivatives or the Underlyings. These transactions and activities are possibly not beneficial for investors in the Derivatives and may have adverse effects on the value of an Underlying and therefore on the value of the Derivative.

bb) Engaging in other functions

The Issuer and other companies of the Zürcher Kantonalbank Group may, in respect of the Derivatives, engage in other functions, e.g., as calculation agent, paying agent and administrative agent or index sponsor. Such a function may entitle the relevant company to determine the composition of the Underlying or to calculate its value, which may lead

to conflicts of interest if securities issued by a company of the Zürcher Kantonalbank Group or other assets may be chosen as the Underlying, or if a company of the Zürcher Kantonalbank Group has business relations with the issuer of the relevant securities or assets.

The issuers or other companies of the Zürcher Kantonalbank Group may moreover issue other derivative instruments in connection with the respective Underlying; any introduction of such products may have an impact on the value of the Structured Products. The issuers and other companies of the Zürcher Kantonalbank Group may receive non-public information with respect to the Underlying and they are not required to disclose such information to the holders of the securities unless there is a mandatory statutory requirement to do so. In addition, companies of the Zürcher Kantonalbank Group may publish research reports in relation to the Underlying. Such actions may lead to conflicts of interest both among the companies of the Zürcher Kantonalbank Group concerned as well as between these companies and the investors, and may have a negative impact on the value of the securities.

cc) Issue of other Derivatives in respect of an Underlying

Zürcher Kantonalbank Group companies may issue various Derivatives in respect of the same Underlying or the same Underlyings. Such Derivatives may compete with already issued Derivatives which may adversely affect the value of the already issued Derivatives.

dd) Execution of hedging transactions

The Issuer and other companies of the Zürcher Kantonalbank Group may apply a part or the entire amount of the proceeds from the sale of the Derivatives for hedging transactions, which may adversely affect the value of the Derivatives. The value of the Derivatives may be affected, in particular, through the termination of a part or all of the hedging positions (hedging).

ee) Acting as market-maker for the Derivatives

A company of the Zürcher Kantonalbank Group or a party acting on its behalf may act as market-maker for the Derivatives in order to improve the market liquidity of the Derivatives and to equalize imbalances between supply and demand. A company of the Zürcher Kantonalbank Group or a party acting on its behalf will, itself, through such "market-making", materially determine the price of the Derivatives. As a result, the market prices determined by the market-maker normally are not the same as those that would have resulted in a liquid market without market-making.

The market-maker determines the bid and asked prices in the secondary market, in particular by taking into account the value of the Derivatives determined by the market-maker, which, among other things, is dependent on the value of the Underlying, as well as the difference between bid and asked prices targeted by the market-maker. In addition, a charge imposed upon issue and any compensation or costs to be deducted upon the maturity of the Derivative from its redemption price (i.e., administrative, transaction or other charges in accordance with the product terms) will routinely be taken into account. Further, a margin included in the issue price of a Derivative and dividends or similar income paid or to be paid on the Underlying or its components have an influence on the determination of the price in the secondary market if, based on the terms of the Derivative, a company of the Zürcher Kantonalbank Group is economically entitled to them. The spread between bid and asked prices is determined by the market-maker on the basis of supply and demand for the Derivatives and certain income considerations.

In determining the price, certain costs, such as, for example, administration fees, will in many cases not be deducted in equal amounts distributed over the term of the Derivatives and therefore in reduction of the price, but rather deducted from the calculated value of the Derivatives already at an earlier point in time determined in the discretion of the market-maker. The same applies for a margin included in the issue price of the Derivatives, as well as for dividends and other distributions in respect of the Underlying, to the extent that the Issuer is economically entitled to receive them pursuant to the terms of the Derivative. These are often not deducted in reduction of the price when the Underlying is traded "ex-dividend", rather already at an earlier point in time during the term and on the basis of the dividends expected for the entire term or a certain part of the term. The timing of this deduction is dependent on, among other things, the amount of any income received by the market-maker from the securities.

The prices provided by the market-maker may therefore deviate significantly from the calculated or economically expected value of the Derivatives at the relevant time based on the factors mentioned above. In addition, the market-maker may change the method for the determination of the prices provided at any time, such as the increase or decrease of the spread between bid and asked prices. In particular, the spread between bid and asked prices may increase if the liquidity and tradability of the Underlying deteriorates due to external conditions.

In addition, the market-maker has the option of providing asked prices only for specific Derivatives, e.g. if the market-maker is not able to issue additional securities of a Derivatives Series.

ff) Acting as market-maker for the Underlying

Zürcher Kantonalbank Group companies may in certain cases act as market-maker for the Underlying, especially when the company of the Zürcher Kantonalbank Group also issued the Underlying. The price of the Underlying will be determined to a significant degree by the Zürcher Kantonalbank Group company and therefore influences the value of the Derivatives. The prices provided by the market-maker will not always correspond to the prices that would have developed in a liquid market with such market-making.

gg) Acting as a member of an underwriting syndicate or a similar function in respect of the issue of an Underlying

Zürcher Kantonalbank Group companies may, in connection with future offers of an Underlying, act as underwriter or financial adviser to the Issuer. Activities of this type may entail certain conflicts of interest and affect the value of the Derivatives.

hh) Receipt of nonpublic information

The Issuer and Zürcher Kantonalbank Group companies may possibly receive nonpublic information about the Underlying that they are not required to disclose to purchasers of the Derivatives. Such information may entail conflicts of interest and affect the value of the Derivatives.

B. Product-specific risk factors in respect of the Derivatives

Because the development of the value of the Derivatives primarily depends on the value of the relevant Underlying, potential investors should, in addition to the section "General Risk Factors in Respect of the Derivatives", carefully review the descriptions in the sections "Product Terms" and "Information about the Underlying", as well as the other information in this Document (including any additional risk factors).

a) The Derivatives are unsecured obligations

The Derivatives constitute direct, unsecured and unsubordinated obligations of the Issuer which rank equally with all other current and future unsecured and unsubordinated obligations of the Issuer except such obligations which rank higher on the basis of mandatory provisions of law. The Derivatives are not protected by a deposit protection fund.

b) Capital protection

If and to the extent capital protection is specified in the relevant Final Terms, the relevant Derivatives will be redeemed at an amount which is not less than the specified capital protection. The capital protection may be set both below or above, as well as the same, as the principal amount or par value of the Derivative. Because the capital protection is specified in relation to the principal amount or par value of the Derivative, the investor has the benefit of capital protection only in this amount, even if purchase price or issue price paid by the investor is greater than the principal amount or par value. The protection for the invested capital is reduced accordingly. Capital protection is not provided if the Derivatives are repaid before the agreed maturity date or in the event of the occurrence of a basis for termination or early repayment for tax reasons or if the investor sells the Derivative before the maturity date.

If the Final Terms do not explicitly specify capital protection, then the fundamental risk exists that the investor will lose entire amount of the funds invested by the investor. Even if capital protection applies, the risk exists that the capital protected amount is less than the investment made by the investor. Further, the payment of the capital protected amount is dependent on the financial condition of the Issuer or other circumstances related to it.

c) Dependence of the value of the Derivatives on the value of the Underlying

Derivatives are financial instruments whose value is especially influenced by the value and volatility of the Underlying and the remaining term of the Derivative, such that an investment in the Derivatives is subject to various risks.

Potential investors should have no doubts about their understanding that the return on their investment in the Derivatives is dependent on the change in value of the Underlying. The change in value of the Underlying is influenced by numerous market factors and risks. Among these are risks in respect of the stock, bond, foreign exchange, real estate, precious metals and commodities markets, interest rates, exchange rates, market volatility, as well as general economic, political, regulatory and other factors. These and further risk factors, individually or collectively, may significantly affect the value of the Underlying. In addition, the value of the Underlying is influenced by, among other things, interest

rates, potential dividend or interest payments in respect of the Underlying, changes in the method of calculating the value of the Underlying and market expectations in respect of the future change in the price of the Underlying, its composition and the Derivatives. An investment in the Derivatives should therefore only be made after an assessment of the direction, timing and extent of potential, future changes in the value of the Underlying and/or changes in the composition or the calculation method of the Underlying because the return from the relevant investment is dependent, among other things, from fluctuations of this type.

Historical values provide no assurance for the future development of the value of the Underlying. Predictions concerning the future change in the value of the Underlying on the basis of past changes in value cannot provide any information about the future value of the Underlying or the investment return at the end of the term of the Derivative.

d) Market risks and market factors

The value of the Derivatives is determined by a series of factors. Among the factors that influence the value of the Underlying are, among other things, the term of the Derivatives, dividend payments and dividend payment dates that deviate from the market expectation, as well as, in the case of Derivatives whose Settlement Currency is not the same as the Reference Currency, the change in the Exchange Rate of the Settlement Currency to the Reference Currency or currencies.

At the same time, the frequency and intensity of the fluctuations of the Underlying or the individual components of the Underlying (volatility) have an influence on the market value of the Derivative during its term. The degree of the volatility is not only a measure of the actual volatility, but will to a large degree be determined by the prices of the instruments which offer investors protection against such market volatility. The prices of these instruments are generally determined by supply and demand in the options and Derivatives markets. These forces of supply and demand are nevertheless in turn influenced by factors such as current volatility, economic factors and speculation.

In addition, the market value of the Derivatives is influenced by, among other things, interest rates, potential dividends or interest payments and other events in respect of the future change in the value of the Underlying.

If after the purchase the market value of the Derivatives declines below the purchase price, investors should not expect that the market value of the Derivatives will rise to or above the purchase price during the remaining term.

Investors should also be prepared to bear the total loss of their investment in the Derivatives, including transaction costs paid. This risk exists regardless of the creditworthiness of the Issuer.

C. General Risk Factors in Respect of the Derivatives

In addition to the specific characteristics of the Derivatives which are shown under the section "Product-specific risk factors in respect of the Derivatives", potential investors should also take into account the following general risks of an investment in the Derivatives.

a) Issue price

Under certain circumstances, the issue price of the Derivatives may include, in addition to the specified issue charges, administration or other fees, a charge on the mathematical value of the Derivatives which at the most is not apparent to investors. This margin is determined by the Issuer in its unfettered discretion and can vary from the charges imposed by other issuers of comparable Derivatives. This is subject to the proviso of the gradual introduction of the Total Expense Ratio [TER], which will be stated in the Final Terms of the individual products, specifying the fees. Zürcher Kantonalbank will not indicate the cost as a range but will state the specific cost for the product in question.

b) Risk of the limited term

To the extent not explicitly stated otherwise in the Final Terms, the Derivatives are rights limited by time. As a result, there is no assurance that potential market losses will be recovered during the term of the Derivatives. In general, the probability that losses sustained in the interim can be recovered declines during the course of the investment time line. This applies, in particular, also in situations in which the Derivative is terminated by the Issuer (and without regard for the relevant termination payment amount).

c) No payments until settlement

During the terms of the Derivatives, no distributions or repayments are made, with the exception of the payment of Coupons or other distributions, before the maturity date. Before the maturity date, investors may obtain potential returns on the Derivatives only through a sale in the secondary market. Investors should in any case note the risk factors under "Issue size" and "Potential illiquidity of the Derivatives".

d) Exercise or delivery notices and evidence

If the Derivatives are subject to provisions in respect of the delivery of an exercise or delivery notice and a copy of such notice is delivered to the Issuer via the Exercise Agent after the last specified exercise period in the Derivatives Terms, then it is considered delivered only on the next Business Day. Such a late delivery can, in the case of cash settled Derivatives, lead to an increase or reduction in the original amount of the Cash Settlement Amount. In the case of Derivatives that can only be exercised on a specified date or only during an exercise period, each Exercise Notice that is not received by the point in time specified in the Derivatives Terms is ineffective.

If necessary evidence is not provided in accordance with the Derivatives Terms, this can result in the loss of amounts otherwise due on the basis of the Derivatives or the right to claim them. Potential purchasers should review the Derivatives Terms in respect of whether, and in what manner, such provisions apply to the Derivatives.

Derivatives that are not exercised in accordance with the Derivatives Terms expire. Potential investors should review the terms in respect of whether an automatic exercise has been specified or not for the Derivatives and when an Exercise Notice is considered to be validly delivered.

e) Time delays after exercise

If the settlement of the Derivatives is made through Cash Settlement, then in the case of their exercise, time delays are possible if the time of the exercise and the time of the determination of the relevant Cash Settlement Amount in respect of such an exercise do not coincide. Each delay of this type between exercise and determination of the Cash Settlement Amount is specified in the Derivatives Terms. Such a delay could, however, become significantly longer, especially in the case of a delay which occurs with respect to the exercise of Derivatives with Cash Settlement which use a highest intra-day price for the exercise as described below or in the case of the determination of a Market Disruption at the relevant time by the Calculation Agent as described below. The relevant Cash Settlement Amount could increase or decrease as a result of this delay.

f) Extraordinary termination, violation of law and force majeure

If the Issuer determines that its obligations in respect of the Derivatives, for reasons for which it is not responsible, have become for whatever reason, in whole or in part, contrary to law or impossible to perform or that the maintenance of hedging transactions in respect of the Derivatives, for whatever reason, are contrary to law or impossible to perform, the Issuer shall be entitled, but not required, in its own judgment, to terminate the Derivatives on an extraordinary basis. In such a case, the Issuer shall, to the extent permitted by applicable law, pay to each Creditor for each relevant Derivative an amount determined by the Calculation Agent in the amount of the determinable market price, without regard for the violation of law or the impossibility of performance, less the costs of the issue for the termination of, for example, the related hedging transactions.

g) Market disruptions, amendments and early termination of the Derivatives

The Issuer and the Calculation Agent may determine that a Market Disruption has occurred or is at the relevant point in time continuing. Such a determination can delay the valuation in respect of the Underlying which can influence the value of the Derivatives and/or delay their settlement. In addition, the Calculation Agent can, if permitted by the Derivatives Terms, amend the terms in order to take into account relevant changes or events in respect of the Underlying and therefore, among other things, determine a replacement for the Underlying or its Issuer or sponsor. Further, the Issuer can, under certain conditions after such an event, terminate the Derivatives early. In this case, the Issuer shall pay in respect of each of the Derivatives, as applicable, an amount determined in accordance with the provisions of the Derivative Terms. Potential purchasers should review the terms to determine whether and in what manner such provisions for the Derivatives apply and what is considered a Market Disruption or relevant event permitting an amendment.

h) Interest rate risk

An investment in Derivatives is subject to interest rate risk on account of fluctuations in the interest to be paid on deposits in the currency of the Derivatives. This can have effects on the market value of the Derivatives. Interest rates are determined by various factors of supply and demand in international money markets, which are influenced by economic factors, speculation and interventions by central banks and government authorities or other political factors. Fluctuations in short- or long-term interest rates can influence the value of the Derivatives.

i) Potential illiquidity of the Derivatives

No prediction can be made as to whether and to what extent a secondary market for the Derivatives will develop, at what price the Derivatives will be traded on this secondary market and whether this secondary market will be liquid or not. To the extent specified in the Term Sheet or in the Final Terms, applications were made for the listing or admission

to trading on the relevant securities exchange. If the Derivatives are listed on a securities exchange or are admitted to trading, it cannot be assured that this listing or admission to trading will be maintained. It does not automatically follow that on account of the fact that the Derivatives of the specified type are listed or admitted to trading that greater liquidity is available than would be available if this were not the case.

If the Derivatives are not listed on a securities exchange or are not admitted to trading, information about prices is under some circumstances more difficult to obtain and the liquidity of the Derivatives will be adversely affected. The liquidity of the Derivatives can also be influenced by limitations on the purchase and sale of Derivatives in certain countries.

j) Issue size

The issue size specified in the Final Terms (expressed as the number of Derivatives or as the aggregate principal amount of the Derivatives) refers to the maximum amount of the offered Derivatives, but it gives no indication of the amount of the Derivatives actually issued. This is determined by market conditions and can change during the term of the Derivatives. No conclusion can be drawn about the liquidity of the Derivatives in the secondary market on the basis of the specified issue size. For this reason, investors should also give attention to the risk factor "Potential Illiquidity of the Derivatives".

k) Issues in relation to hedging

Potential purchasers who wish to purchase the Derivatives for the purpose of hedging their risk in respect of the Underlying should be aware of the risks of such a use. No binding statements can be made about the correlation between the change in value of the Derivatives and the change in value of the Underlying. In some circumstances, the composition of the Underlying can change. In addition, it may prove impossible to sell the Derivatives at a price which directly corresponds to the price of the Underlying. Accordingly, no binding statement can be made in respect of the degree of correlation between the return on an investment in the Derivatives and the return on a direct investment in the Underlying. Conversely, it is possible that the hedging transactions for the purpose of limiting risk in respect of the Derivatives may not have the desired success.

l) Borrowing

If an investor finances the purchase of the Derivative with a loan, the risk exists that the investor must bear not only the loss that occurs but also must expend additional funds for the payment of interest on the loan and the repayment of the loan. As a result, the investors' risk of loss is increased significantly. An investor therefore should not finance the acquisition of the Derivatives with a loan with the expectation of being able to pay the interest or to repay the loan from profits in a Derivatives transaction. Further, the purchaser of Derivatives must evaluate his or her economic circumstances in order to determine whether he or she is able to pay interest and, under some circumstances, to repay the loan on short notice if losses, instead of the expected profits, including a total loss of the investment in the Derivatives, occur.

m) Taxation

Depending on the legal requirements in the country in which the Derivatives will be delivered or on the statutory provisions of the country which then apply if the Underlying consists of equities, stamp tax, foreign transaction taxes and other assessments may be imposed. The payment of the relevant amounts in respect of the Derivatives depends on the payment of certain taxes, charges and/or costs as defined in the product terms. In the event of uncertainty of tax requirements, potential investors should consult their own independent tax adviser. In addition, they should be aware that tax law provisions and their application may be subject to changes by the relevant tax authorities. Accordingly, no predictions can be made about the exact, applicable tax treatment at a given time.

n) Resale price

The Issuer can make distribution agreements with various financial institutions and other intermediaries chosen by the Issuer (the "Dealers"). In this case, the dealers agree, subject to the performance of certain conditions, to subscribe for the Derivatives at a price equal to or lower than the issue price. The Dealers agree to bear certain costs in connection with the issue of the Derivatives. In respect of all issued and outstanding Derivatives, a regularly recurring fee, the amount of which is determined by the Issuer, may be payable to the Dealers up to the maturity date. The amount of the fee can change. The Dealers agree to comply with the sales restrictions that are set forth in this document and which are supplemented by additional restrictions in the distribution agreement applicable to the relevant dealer.

o) Changes in the conditions for subscription

The Issuer has the right in its own reasonable judgment to reduce the amount of the Derivatives offered for subscription, to reduce or to extend the subscription period, to modify certain product parameters in accordance with market conditions (e.g. changed volatility) or to refrain from issuing the Derivatives planned for subscription (e.g., if adverse market conditions such as increased stock exchange and exchange rate volatility exist).

p) Substitution of the Underlying

During the term of the Derivatives, changes in or substitution of the Underlying by the Calculation Agent can occur. In this case, it cannot be ruled out that such changes or substitutions will negatively affect the value of the Derivatives. Likewise, it cannot be ruled out that in the case of a Derivative based on an index that changes in the composition of the index as a result of change or substitutions in respect of individual index components, for example, as a result of the withdrawal or addition of individual securities, may negatively influence the price of the index and accordingly the value of the Derivatives.

II. INFORMATION ABOUT THE ISSUERS

A. Zürcher Kantonalbank

a) General Information

aa) Name, registered office and principal place of business

Zürcher Kantonalbank, Bahnhofstrasse 9, 8001 Zürich.

bb) Incorporation, duration

The formation of Zürcher Kantonalbank is based on the Banking Act of 1869. The duration of the bank is unlimited.

cc) Legal authorization, legal form

Zürcher Kantonalbank is an independent institution under cantonal public law. Its current legal authorization is based on the Law on the Zürcher Kantonalbank of 28 September 1997, which entered into force on 1 January 1998. The Canton of Zurich is liable for all of the obligations of the Zürcher Kantonalbank to the extent its own funds are insufficient (§6 of the Law on the Zürcher Kantonalbank).

Zürcher Kantonalbank is subject to the Federal Law on Banks and Savings Institutions of 8 November 1934 and to supervision by FINMA.

dd) Purpose

In accordance with the statutory purpose article (§2 of the Law on the Zürcher Kantonalbank), the Zürcher Kantonalbank contributes to the performance of economic and social tasks in the Canton of Zurich and supports environmentally sustainable development. It pursues a business policy directed toward continuity and meets investment and financing needs while taking into account the concerns of smaller and medium-sized businesses, employees, the agricultural industry and commerce. In addition, Zürcher Kantonalbank promotes home ownership, as well as the development of affordable housing.

ee) Register

The initial registration in the Commercial Register of the Canton of Zurich was made on 24 April 1883.

ff) Group

The consolidated financial accounts of the Zürcher Kantonalbank Group comprise the financial statements of the parent company, Zürcher Kantonalbank, as well as those of its directly and indirectly held essential subsidiaries, of which Zürcher Kantonalbank is holding of more than 50 Percent am stimmberechtigten Kapital hält oder die auf eine andere Weise beherrscht werden. Die Behandlung von Beteiligungen kleiner als 50 Prozent wird im Abschnitt „Nicht konsolidierte Beteiligungen“ auf S. 71 des Geschäftsberichtes (Anlage 1B) erläutert.

The presentation of the group financial statements is based on the economic view. The financial statements of the group companies are based on uniform, group-wide accounting standards.

b) Information about the Board of Directors, management and auditors

aa) Board of Directors

Dr. Jörg Müller-Ganz	Chairman
Dr. János Blum	Deputy Chairman
Bruno Dobler	Deputy Chairman
Alfred Binder	Member
Thomas Heilmann	Member
Hans Kaufmann	Member
Mark Roth	Member
Peter Ruff	Member
Anita Sigg	Member
Prof. Dr. Hans Sigg	Member
Liliane Waldner	Member
Rolf Walther	Member
Stefan Wirth	Member

bb) Committee of the Board

Dr. Jörg Müller-Ganz	Chairman
Dr. János Blum	Deputy Chairman
Bruno Dobler	Deputy Chairman
Alfred Binder	Substitute Member
Anita Sigg	Substitute Member

cc) Executive Board

Martin Scholl	CEO
Dr. Jürg Bühlmann	Head Logistics
Daniel Previdoli	Head Retail Banking
Markus Bachofen Rösner	Head Products & Services
Dr. Stephanino Isele	Head Investment Banking
Roger Müller	Head Credit Office

Rudolf Sigg	Head Finance
Heinz Kunz	Head Corporate Banking
Christoph Weber	Head Private Banking

dd) External auditors / group auditors

Ernst & Young AG, Maagplatz 1, 8005 Zurich serves as the external auditor under corporate law and banking law and is the Group auditor.

c) Business activities

aa) Core business

Zürcher Kantonalbank conducts the business of a universal bank. It does not enter into any transactions for its own account which subject it to disproportionately large risks.

The field of business activities geographically comprises the Zurich economic area. Transactions in the rest of Switzerland and abroad are permitted to the extent the bank is not subject to any disproportionately large risks. The details of the business activities are governed by the business regulation.

bb) Court, arbitration and administrative proceedings

On 29 August 2013, Switzerland signed a Joint Statement with the US to settle the longstanding tax dispute between the banks and the US. The Program for Non-Prosecution Agreements or Non-Target Letters for Swiss Banks launched by the US Ministry of Justice is aimed at those banks against which the US judicial authorities had not launched an investigation by 29 August 2013. It does not therefore apply to Zürcher Kantonalbank, against which an investigation has been ongoing since September 2011. The Bank continues to cooperate with the competent authorities in these proceedings.

A team of specialists analysed the consequences of the Swiss Federal Supreme Court ruling of 30 October 2012 with regard to retrocessions for Zürcher Kantonalbank and made selective adjustments to the contracts and the client information. Zürcher Kantonalbank has given much attention to this matter in the past and already implemented appropriate measures in 2001, 2008 and 2009 in line with the Supreme Court's rulings and the requirements of the supervisory authorities.

In addition, Zürcher Kantonalbank is not involved in any court, arbitration or administrative proceedings that could have a material, adverse effect on its financial condition, nor to the best knowledge of the directors, officers and external auditors of the Zürcher Kantonalbank are any such proceedings threatened.

d) Capital

aa) Capital structure

The core capital of the Zürcher Kantonalbank comprises the endowment capital and the participation capital. The endowment capital is provided to the Zürcher Kantonalbank by the Canton of Zurich. It is determined by the *Kantonsrat* and as of 31 December 2013 amounts to CHF 1,925 million (2012: CHF 1,925 million) and is fully paid.

The Bank raises participation capital by issuing participation certificates. It may not exceed one half of the endowment capital. The Basel III rules have applied in Switzerland since 1 January 2013. This has resulted in additional capital requirements, particularly for the risk of possible valuation adjustments due to the counterparty credit risk of derivatives (CVA charge), which directly resulted in a 0.5 percentage point reduction in capital ratios. Zürcher Kantonalbank had a Tier 1 capital ratio of 16.2 percent at the end of 2013 (previous year: 14.7 percent adjusted) and was thus able to strengthen its capital base further. It achieved this mainly thanks to the profit retention from the 2013 annual result coupled with lower credit risks.

As of the date of this issuance programme, there was no participation capital. The Bank obtains further equity capital by accumulating reserves. As of 31 December 2013, retained earnings came to CHF 6,443 million before the appropriation of profit (2012: CHF 6,250 million).

bb) Outstanding conversion and option rights and bonds

As of the reporting date for the financial statements for the 2013 business year, there were no option rights outstanding. Zürcher Kantonalbank issued a subordinated Tier 1 bond with a conditional debt waiver in order to strengthen its capital base further. In issuing this subordinated bond Zürcher Kantonalbank is anticipating the stricter regulatory requirements regarding capital over the next few years and is creating scope for further organic growth, especially in the Bank's strategically important lending business.

As of the reporting date for the financial statements for the 2013 business year, the Zürcher Kantonalbank had certificates of deposit (*Kassenobligationen*) outstanding of more than CHF 460 million (2012: CHF 642 million), bonds outstanding of more than CHF 8,104 million (2012: CHF 7,558 million) and Pfandbrief bonds of CHF 6,212 million (2012: CHF 5,082 million) outstanding. Interest rates, maturity dates and currencies for these bonds may be found on p. 85 ff. of the Financial Report for the Business Year 2013 (Annex 1B) submitted herewith.

cc) Participation rights in its own capital

As of the date of this issuance program, Zürcher Kantonalbank held no participation rights in its own capital.

e) Rating

As of the date of this document, the ratings assigned by the rating agencies to Zürcher Kantonalbank are as follows:

<u>Rating Agency</u>	<u>Date</u>	<u>Long-term</u>
Standard&Poor's	2 December 2013	AAA
Moody's	16 September 2013	Aaa
FitchRatings	11 February 2014	AAA

f) Financial reports

Annex 1 contains the financial reports for the business years 2012 (Annex 1A) and 2013 (Annex 1B, as audited by the auditors). The reporting date for the last audited financial report is 31 December 2013 and is therefore not older than 18 months before the date of this issuance program.

The audit report of the auditors can be found on page 125 ff. of the financial report for the 2013 business year (Annex 1B) and on page 198 ff. of the financial report for the 2012 business year (Annex 1A).

g) Current business developments and business prospects

Political and regulatory changes will continue to affect the banking sector in 2014. Despite challenging competitive conditions, Zürcher Kantonalbank is convinced that it is able to generate positive results. Over the coming years it aims to expand its leading market position systematically, particularly in the economic area of Zurich but also in selected segments in Switzerland and abroad. It will take account of the potential risks in all its business decisions and act in a responsible manner in dealing with its owners and stakeholders.

h) No material adverse changes in assets, financial condition and income

There have been no material adverse changes in assets, financial condition and income since the reporting date of the financial statements for the 2013 business year.

B. Zürcher Kantonalbank Finance (Guernsey) Limited

a) General information

aa) Name, registered office and principal place of business

Zürcher Kantonalbank Finance (Guernsey) Limited, Regency Court, Glatigny Esplanade, St. Peter Port, Guernsey GY1 3AP, Channel Islands.

bb) Incorporation, duration

Zürcher Kantonalbank Finance (Guernsey) Limited was incorporated on 17 November 2000. The duration is not limited.

cc) Legal authorization, legal form

Zürcher Kantonalbank Finance (Guernsey) Limited is a limited liability company in the form of a so-called "Non-Cellular Company Limited by Shares" under the laws of Guernsey. The fully paid equity capital amounts to one million Swiss francs (CHF 1,000,000).

dd) Purpose

The statutory purpose of the company is to engage in business as a finance company and in the borrowing of funds through the issue of financial instruments of all types.

ee) Register

The first entry into the Commercial Registry in St. Peter Port was made on 17 November 2000.

ff) Group

Zürcher Kantonalbank Finance (Guernsey) Limited is a 100-percent subsidiary of Zürcher Kantonalbank.

b) Information about the board of directors, management and auditors

aa) Board of directors

The following persons are members of the board of directors

Felix Oegerli	Chairman	Employee of the Zürcher Kantonalbank
Beat Gabathuler	Vice-Chairman	Employee of the Zürcher Kantonalbank
John William Renouf	Member	Independent consultant, Guernsey
Paul Hodgson	Member	Managing Director of Butterfield Trust (Guernsey) Limited

bb) Administration

The operative administration of Zürcher Kantonalbank Finance (Guernsey) Limited is performed by Butterfield Trust (Guernsey) Limited, P.O. Box 25, Glatigny Explanade, St. Peter Port, Guernsey GY1 3AG, Channel Islands.

cc) External audit firm

Ernst & Young LLP, 14 New Street, St. Peter Port, Guernsey GY1 4AF, Channel Islands acts as the external audit firm.

c) Business activities

aa) Main activity

Zürcher Kantonalbank Finance (Guernsey) Limited issues structured financial products and sells these to Zürcher Kantonalbank which places them in the market.

bb) Court, arbitration and administrative procedures

Zürcher Kantonalbank Finance (Guernsey), Guernsey is not involved in any court, arbitration or administrative proceedings which could have an adverse effect on its financial condition, nor to the best knowledge of the directors, officers and external auditors of the Zürcher Kantonalbank are any such proceedings threatened.

d) Capital

aa) Capital structure

The issued share capital of Zürcher Kantonalbank Finance (Guernsey) Limited is one million Swiss francs (CHF 1,000,000) and is divided into one thousand (1,000) shares with a par value of one thousand Swiss francs (CHF 1,000) each. The Zürcher Kantonalbank is the owner of all of the shares of Zürcher Kantonalbank Finance (Guernsey) Limited.

bb) Outstanding conversion and option rights and bonds

As of the reporting date for the financial statements for the 2013 business year, there were no conversion or option rights in respect of its own share capital outstanding.

cc) Participation rights in its own capital

As of the date of this issuance program, Zürcher Kantonalbank Finance (Guernsey) Limited held no participation rights in its own share capital.

e) Annual financial statements

Annex 2 contains the financial reports for the business years 2012 (Annex 2A) and 2013 (Annex 2B), as audited by the external auditors. The reporting date for the last audited financial report is 31 December 2013 and is therefore not more than 18 months before the date of this issuance program.

The report of the auditors can be found on page 2 of financial report for the business year 2013 (Annex 2B) and on page 2 of financial report for the business year 2012 (Annex 2A).

f) Current business developments and business prospects

Political and regulatory changes will continue to affect the banking sector in 2014. Despite challenging competitive conditions, Zürcher Kantonalbank Finance (Guernsey) Limited is convinced that it is able to generate positive results. Over the coming years it aims to expand its leading market position systematically, particularly in the economic area of Zurich but also in selected segments in Switzerland and abroad. It will take account of the potential risks in all its business decisions and act in a responsible manner in dealing with its owners and stakeholders.

g) No material adverse changes in assets, financial condition and income

There have been no material adverse changes in assets, financial condition and income since the reporting date of the financial statements for the 2013 business year.

III. INFORMATION ABOUT THE DERIVATIVES

A. Legal Basis

The purpose of this issuance program is the (public) offer of the Derivatives series issued from time to time by the relevant Issuer on the basis of a resolution of the relevant corporate authority.

B. Statement respecting the CISA

Derivatives issued under this issuance program are not collective investments within the meaning of the CISA. They are not subject to any approval requirement nor to supervision by FINMA, and investors do not enjoy the specific investor protection provided under the CISA.

C. Covered categories of Derivatives and economic characteristics

The Derivatives covered by this issuance program are Structured Products issued by an Issuer the investment returns of which are derived from one or more Underlyings. The value of the Derivatives is materially dependent on the positive (so-called "bull derivatives") or negative (so-called "bear derivatives") change in value of one or more Underlyings. The Underlyings for a Derivatives Series can be one or more completely different financial investments (see Section IV below).

a) Categorization

The Derivatives issued under this Issuance program can be fundamentally allocated to the Derivatives categories below. The Issuers are guided in this regard by the categorization used by the Swiss Structured Products Association ("SSPA") which is also used by SIX Swiss Exchange and SIX Structured Products Exchange Ltd, respectively. The Issuer is free to issue under this issuance program other Derivatives than those listed in the table below.

SSPA Derivative Map / Categorization SIX Structured Product Exchange	Product Type Number
Investment Products	1
Capital Protection	11
Capital Protection Certificate with Participation	1100
Convertible Certificate	1110
Capital Protection Certificate with Barrier	1130
Capital Protection Certificate with Coupon	1140
Referencedebtor-Certificate with caused Capital Protection	1410
Yield Enhancement	12
Discount Certificate	1200
Discount Certificate with Barrier	1210
Reverse Convertible	1220
Barrier Reverse Convertible	1230
Express Certificate	1260
Referencedebtor-Certificate with Yield Enhancement	1420
Participation	13
Tracker Certificate	1300
Outperformance Certificate	1310
Bonus Certificate	1320
Bonus Outperformance Certificate	1330
Twin Win Certificate	1340
Referencedebtor-Certificate with Participation	1430
Leverage Products	2
Leverage without Knock-Out	21
Warrant	2100
Spread Warrant	2110
Leverage with Knock-Out	22
Warrant with Knock-Out	2200
Mini-Future	2210
Constant Leverage Certificate	2300

b) IMPORTANT ECONOMIC CHARACTERISTICS OF THE INDIVIDUAL DERIVATIVES

Investors can obtain information about the important economic characteristics of the individual categories of Derivatives in the following sections. Derivatives in the various categories may have characteristics which partially or significantly deviate from those of the described categories of Derivatives. Investors in such products will find the exact description of the economic characteristics in the relevant (indicative) terms sheets, as well as in the Final Terms.

aa) Capital protected products

Capital protected products are Derivatives with an asymmetrical risk profile, for which the Issuer usually guarantees a specific or a minimal redemption amount. The level of the capital protection is set by the Issuer at the time of the issuance and indicates the percentage of the nominal or par value that the investor will be assured on the Settlement Date, regardless of the value of the Underlying. In general, capital protection applies only at the end of the term or at maturity and can be – depending on the terms of the issue – (far) below 100% of the Nominal Value. Capital protection therefore does not mean that the full nominal or par value or the invested capital will be fully repaid at maturity in every case. Pursuant to the provisions of the SSPA, there is capital protection in the event of any guaranteed redemption of at least 90% of the Nominal Value.

Capital protected products consist, considered economically, of a bond and an option component. The option component allows the investor to participate in the positive (bull derivatives) or negative (bear derivatives) performance of one or more Underlyings. At the same time, the risk of loss is limited by the bond component through the assurance of a minimum redemption amount. A return which exceeds the minimum redemption amount can, depending on the structure, be made as a one-time payment in connection the redemption and/or in the form of one or more payments during the term (coupons). Additionally, the redemption amount can be set with or without a maximum amount (Cap).

It should be noted that in the case of a purchase of a Derivative in the capital protection category in the secondary market that the capital protection in relation to the invested amount is reduced if the Derivative already trades above the par or Nominal Value.

(i) Capital Protection Certificate with Participation (1100)

Derivatives in the category Capital Protection Certificate with Participation provide capital protection with simultaneous participation in the positive (bull derivatives) or negative (bear derivatives) change in value of one or more Underlyings above (bull derivatives) or below (bear derivatives) a predefined exercise price. The possible increase in value (potential profit), depending on the product structure, is not limited (no Cap), or there is only a possibility of participation up to a specific threshold (with Cap). If the product is one with a Cap, this will be set out in the Final Terms of the relevant Derivatives Series.

If the value of the Underlying on the Final Fixing Date is below the exercise price (for bull derivatives) or above the exercise price (for bear derivatives), the Issuer pays the investor the Minimum Redemption Amount on the maturity date.

(ii) Convertible Certificate (1110)

Derivatives in the Convertible Certificates category provide capital protection with simultaneous participation in the positive (bull derivatives) or negative (bear derivatives) change in value of one or more Underlyings. The possible increase in value (potential profit) is not limited (no Cap).

The investor has the right to exchange the Derivatives on the relevant conversion date (generally the Final Fixing Date) into a number of Underlyings as defined by the exchange ratio. In the event of a conversion, the Issuer performs through the delivery of the Underlying (physical delivery of the Underlying with cash settlement for fractions thereof that cannot be delivered, not cumulative).

In the case of a non-deliverable Underlying (e.g., indexes), settlement is made through the payment of a corresponding cash amount which is calculated generally by the Issuer or the Calculation Agent based on the closing prices of the Derivatives on the Final Fixing Date.

The conversion of the Derivatives in this category is generally made automatically if the price of the Underlying on the relevant conversion date exceeds the conversion price.

If the value of an Underlying on the Final Fixing Date is lower than the conversion price, the Issuer pays the Holder the Minimum Redemption Amount on the maturity date.

(iii) Capital Protection Certificate with Barrier (1130)

Derivatives in the category Capital Protection with Barrier provide capital protection with simultaneous participation in the positive (bull derivatives) or negative (bear derivatives) change in value of one or more Underlyings; although the possibility of participation lapses if the price of an Underlying reaches or exceeds a specified barrier within a specified time frame. Depending on the structure of the product, it is possible to participate both in the positive as well as the negative change in value of the Underlying or Underlyings. In this case, the product will have both an upper and a lower barrier.

If the price of the relevant Underlying touches or reaches or exceeds the specified barrier within the specified time frame, the possibility of participation in the positive (bull derivatives) or negative (bear derivatives) performance of the Underlying lapses and the investor receives the specified Minimum Redemption Amount on the maturity date. If the product is one with an upper and a lower barrier, when there is a breach of the barrier, only the participation lapses on the side in question. That means that if only the upper barrier is breached, participation in the negative change in value continues; if only the lower barrier is breached, participation in the positive change in value remains. If both barriers are breached, the investor receives the specified Minimum Redemption Amount on the maturity date. Depending on the product structure, a rebate payment is made in addition following breach of the barrier or barriers, which payment is generally set as a percentage of the par value or Nominal Value.

(iv) Capital Protection Certificate with Coupon (1140)

Derivatives in the category Capital Protection with Coupon provide capital protection with simultaneous participation in the positive (bull derivatives) or the negative (bear derivatives) change in the value of one or more Underlyings, although the profit from the change in value of the Underlying is paid by payment of one or more Coupons.

(v) Referencedebtor-Certificate with contingent Capital Protection (1410)

Compared to traditional Derivatives, reference debtor certificates (or structured products with a reference bond) also relate to a reference bond as certain events (hereinafter referred to as credit events) in relation to the reference bond (default or redemption event, as defined in the corresponding Final Terms) might have an adverse impact on the value and result in the early redemption of the respective product. Providing that no default or redemption event occurs with regard to the reference bond, reference debtor certificates normally work in the same way as a conventional structured product.

Reference debtor certificates are highly sophisticated and complex financial products whose particular characteristic is the fact that the investor not only assumes the usual risks such as market and currency risks and the risk of default by the structured product issuer, but also a corresponding additional risk via the reference bond.

The reference debtor certificate with contingent capital protection may have one or more reference debtors. In addition to the reference debtor's solvency (non-occurrence of a credit event), the redemption of the reference debtor certificate with contingent capital protection is also dependent on the issuer risk. Redemption will take place at least in the amount of the contingent capital protection on expiration provided that no credit event affecting the reference debtor has occurred. If a credit event affecting the reference debtor has occurred during the term, the contingent capital protection no longer applies. Due to the credit event, the reference debtor certificate with contingent capital protection will be redeemed early in an amount to be determined.

During its term the reference debtor certificate with contingent capital protection, which refers only to the nominal, not to the purchase price, may fall under the contingent capital protection, for example as a result of a negative assessment of the reference debtor's creditworthiness.

If during the term of the reference debtor certificate with contingent capital protection no credit event affecting the reference debtor has occurred, the investor will participate in the performance of the price of the Underlying.

bb) Yield Enhancement Products

Yield enhancement products are derivatives, whose redemption amount is limited to a maximum amount and which bear the risk of a total loss at redemption. They can be structured with or without (fix or variable) payments (coupon) during the term.

(i) Discount Certificate (1200)

Derivatives in the category Discount Certificates, are issued at a discount, i.e., with a discount or rebate in relation to the actual value of the Underlying. The determination of the redemption on the Final Fixing Date is made with reference to the final closing price of the relevant Underlying on the Final Fixing Date. The maximum redemption amount is based on the Cap.

The redemption of these Derivatives is made, subject to any provisions in the Final Terms specifying otherwise, as follows: if the final closing price of the Underlying on the Final Fixing Date is at or above the strike or the exercise price, the maximum amount (Cap) is repaid. Generally, the exercise price or the strike corresponds to the Initial Fixing Value of the Underlying or Underlyings unless otherwise specified in the Final Terms of the relevant Derivatives Series. If the closing price of the relevant Underlying is below the strike or the exercise price on the Final Fixing Date, a physical delivery will be made on the redemption date for each Discount Certificate (if the conditions provide for physical delivery) of a predefined number (ratio) of the relevant Underlyings (fractions thereof, even in the case of the purchase of several Discount Certificates, may not be aggregated and will always be paid in cash) or a cash payment in an equivalent amount. The amount of the cash payment is set on the basis of the closing price determined by the Relevant Exchange for the Underlying and the ratio.

(ii) Discount Certificate with Barrier (1210)

Derivatives in the category Discount Certificate with Barrier are issued as discount certificates at a discount or with a rebate from the actual value of the Underlying or Underlyings. The discount is lower than that of comparable discount certificates because a barrier is specified in relation to the value of the Underlying or Underlyings and when this barrier is reached or exceeded, depending on the specific terms of the Derivative, either the relevant Underlying is delivered or a cash payment in the amount of the ratio multiplied by the closing price on the Final Fixing Date is paid.

(iii) Reverse Convertible (1220)

Derivatives in the category Reverse Convertibles distinguish themselves through payment of one or more Coupons. The determination of the redemption amount on the Settlement Date depends on the closing price of the Underlying or Underlyings on the Final Fixing Date.

The redemption of these Derivatives is typically made as follows: if the closing price of the relevant Underlying on the Final Fixing Date is at or above the exercise price or strike, the par value or nominal amount is repaid. The exercise price or the strike generally corresponds to the Initial Fixing Value of the Underlying or Underlyings unless otherwise specified in the Final Terms of the relevant Derivatives Series. If the closing price of the relevant Underlying on the Final Fixing Date is below the strike or exercise price, physical delivery of a predefined number of units (ratio) of the relevant Underlying (with fractions, even where there is a purchase of several Reverse Convertibles, not being cumulative and always paid in cash) is made on the redemption date (if the terms provide for physical delivery) for each Reverse Convertible or a cash payment in an equivalent amount. The cash payment is determined based on the relevant closing price of the relevant Underlying specified at the Reference Exchange and the ratio. In every situation, a Coupon that is defined at issuance as a percentage of the Nominal Value is paid on the Coupon Date or dates.

(iv) Barrier Reverse Convertible (1230)

Derivatives in the category Barrier Reverse Convertible are equivalent to those in the category Reverse Convertible, although regardless of the closing price of the relevant Underlying the par value or Nominal Value is repaid if during the Observation Period the relevant barrier was never reached or exceeded. If the barrier was reached or exceeded and the relevant Underlying on the final valuation day is below the exercise price or the strike, then, analogously to the category Reverse Convertible, a physical delivery of the number of the relevant Underlyings as determined by the ratio (if the terms provide for physical delivery) or a cash payment in an equivalent amount is made. Generally, the exercise price or the strike corresponds to the Initial Fixing Value of the Underlying or Underlyings unless otherwise specified in the Final Terms of the relevant Derivatives Series. In this category of Derivatives, the Coupon is owed in every situation.

(v) Express Certificate (1260)

Derivatives in the Express Certificate category are typically dependent for their term and redemption amount on the closing price of the Underlying(s) on the observation dates specified for them or the Final Fixing Date. If the closing price of the relevant Underlying is at or above the exercise price (call level) on an observation date, then these Derivatives are redeemed immediately thereafter. At the same time, the investor receives, in addition to the par or Nominal Value, a coupon, the amount of which was defined as of the Initial Fixing Date for each relevant observation date. Depending on the product structure, a barrier may also be specified for the observation dates; if the closing price of the relevant Underlying is below the exercise price on the observation date, but above the barrier, the product will not be redeemed early, but the investor receives a coupon payment. If the closing price of the relevant Underlying is at or below the barrier on the observation date, the product will not be redeemed early, nor will any coupon payment be made. Depending on product structure, Express Certificates may have a so-called memory effect, which makes it possible to make up for coupon payments not made on a subsequent observation date, provided all the requirements for a coupon payment on the observation date are met.

If no early redemption has occurred, the following redemption conditions apply on the Settlement Date: If the relevant Underlying on the Final Fixing Date is at or above the exercise price or strike, the redemption consists of the par or Nominal Value, plus the maximum possible Coupon defined at issue. If the closing price of the relevant Underlying is below the exercise or strike price, but above a predefined barrier, the Nominal Value without a Coupon will be repaid. If the closing price of the relevant Underlying on the Final Fixing Date is at or below the barrier, a physical delivery of a predefined number of units (ratio) of the relevant Underlying (with fractions, even where there is a purchase of several Express Certificates, not being cumulative and always paid in cash) is made for each Express Certificate on the repayment date (if the terms provide for physical delivery) or a cash payment in an equivalent amount is made. The cash payment is determined based on the relevant closing price of the relevant Underlying specified at the Reference Exchange and the ratio.

(vi) Referencedebtor-Certificate with Yield Enhancement (1420)

Compared to traditional derivatives, reference debtor certificates (or structured products with a reference bond) also relate to a reference bond as certain events (hereinafter referred to as credit events) in relation to the reference bond (default or redemption event, as defined in the corresponding Final Terms) might have an adverse impact on the value and result in the early redemption of the respective product. If no default or redemption event occurs with regard to the reference bond, reference debtor certificates normally work in the same way as a conventional structured product.

Reference debtor certificates are highly sophisticated and complex financial products whose particular characteristic is the fact that the investor not only assumes the usual risks such as market and currency risks and the risk of default by the structured product issuer, but also a corresponding additional risk via the reference bond.

The reference debtor certificate with yield enhancement may have one or more reference debtors. In addition to the reference debtor's solvency (non-occurrence of a credit event), the redemption of the reference debtor certificate with yield enhancement is also dependent on the issuer risk, provided that no credit event affecting the reference debtor has occurred. If a credit event affecting the reference debtor has occurred during the term, the reference debtor certificate with yield enhancement will be redeemed early at an amount to be determined on account of the credit event.

The value of the reference debtor certificate with yield enhancement may fall during the term, for example as a result of a negative assessment of the reference debtor's creditworthiness. If the Underlying is below the strike or exercise price at expiration, the Underlying will be delivered to the investor and/or cash settlement will be made provided that no credit event affecting the reference debtor has occurred. If the Underlying is above the strike or exercise price at expiration, the nominal will be repaid, provided that no credit event affecting the reference debtor has occurred. The opportunity to make gains is, however, limited to the amount of the strike or exercise price. Depending on the terms of the reference debtor certificate with yield enhancement, either a coupon or discount on the Underlying may be granted.

A coupon will be paid irrespective of the performance of the Underlying provided that no credit event affecting the reference debtor has occurred. The reference debtor certificate with yield enhancement may also include a barrier. Several Underlyings permit higher coupons, higher discounts or lower barriers subject to greater risk.

(cc) Participation Products

Participation products are derivatives with a payment profile that generally linearly reproduces the change in value of the Underlying and so makes it possible for the investor to participate in the performance of the Underlying. Depending on the structure of the product, a disproportionate participation in the positive performance of the Underlying is also possible. The redemption amount is theoretically unlimited, but there is, however, the risk of a total loss. They can be structured with or without payments during the term (coupon) and do not have, or only have a limited capital protection.

Participation products can, depending on their structure, have a limited capital protection. This limits the potential loss in comparison to a direct investment in the Underlying so long as a certain threshold (a so-called barrier or knock-out) is not reached during the Observation Period. If the barrier is reached or exceeded (either above or below), the investor loses the (limited) capital protection. Derivatives in this category with limited capital protection may trade during the term at prices well below the issuance price, even if the barrier has not been reached or exceeded (either above or below).

The redemption in the case of Derivatives in this category can, depending on the structure or the Underlying, be made by payment of a cash Settlement Amount or the physical delivery of the relevant Underlying, adjusted in accordance with the ratio.

Participation products can be issued with a limited or unlimited term.

(i) Tracker Certificate (1300)

Derivatives in the Tracker Certificate category permit an indirect investment in one or more Underlyings which are equally or unequally weighted. The profit and loss potential of these Derivatives corresponds to a large extent to that of the Underlying.

(ii) Outperformance Certificate (1310)

Derivatives in the Outperformance Certificate category are typically characterized by a participation in the change in value of the relevant Underlying that is increased by a specified participation factor, i.e. disproportional and unlimited if the Underlying is above the exercise price or the strike on the Final Fixing Date. The participation factor, however, ceases to apply if the closing price of the relevant Underlying on the Final Fixing Date is below the exercise price or strike. If the closing price of the relevant Underlying on the Final Fixing Date is below the initial value, the potential return is basically comparable with that of the Underlying on which it is based. Depending on the product structure, a limit on profits (Cap) is also possible. Above the exercise price or the strike, the investor participates in the change in value of the relevant Underlying up to the Cap in accordance with the participation factor, although the maximum return potential is achieved at the Cap.

(iii) Bonus Certificate (1320)

Derivatives in the Bonus Certificate category are typically characterized by an unlimited participation in the performance of the Underlying. They also offer a limited capital protection, i.e., a minimum redemption in the amount of the bonus level. This limited capital protection and the minimum redemption cease to apply as soon as one or more of the Underlyings reaches or falls below the specified barrier during the Observation Period. The determination of the repayment on the Final Fixing Date depends on the price history and the closing price of the relevant Underlying: if the Underlying has not reached or has fallen below the barrier during the Observation Period or no Underlying has reached or fallen below the barrier, the repayment is made at the closing price of the relevant Underlying multiplied by the ratio, but at least, however, in the amount of the bonus level. If, however, the Underlying reached or fell below the barrier during the Observation Period or at least one of the Underlyings reached its barrier or fell below it, this results in either a physical delivery of the Underlying or the payment of a Cash Settlement Amount equal to the closing price of the Underlying multiplied by the ratio (physical delivery of the Underlying with cash settlement for fractions thereof that cannot be delivered, not cumulative).

(iv) Bonus-Outperformance Certificate (1330)

Derivatives in the Bonus Outperformance Certificate category, are essentially similar to the Derivatives in the category Bonus Certificate, with the difference that they allow for a disproportionate (i.e., leveraged) participation in the performance of the relevant Underlying above the exercise price or the strike.

(v) Twin Win Certificate (1340)

Derivatives in the Twin Win Certificate category are generally suitable for investors who expect a certain price performance of the Underlying, but also want to profit from the opposite performance up to a certain level (i.e., the barrier). Even though protection for the invested capital is generally provided with this mechanism until the barrier is reached, the investor in this Derivative bears the market risk of the relevant Underlying.

Typically, Derivatives in this category reflect the performance of the Underlying one-to-one or disproportionately. In addition, they convert losses into profits on the maturity date, provided the Underlying does not touch or fall below the barrier during the Observation Period. Three scenarios are possible on the Final Fixing Date: If the closing price of the relevant Underlying exceeds the exercise price or strike, the investor participates one-to-one or disproportionately in the performance of the Underlying. If the closing price of the relevant Underlying is below the exercise price or strike and the Underlying did not touch or fall below the barrier during the Observation Period, then losses on the Underlying are converted into profits. If the closing price of the relevant Underlying is below the exercise price or strike and the barrier was reached during the Observation Period, either a Cash Settlement Amount is paid corresponding to the closing price of the Underlying on the Final Fixing Date multiplied by the ratio or, if provided for, a physical delivery of the Underlying is made.

(vi) Referencedebtor-Certificate with Participation (1430)

Compared to traditional derivatives, reference debtor certificates (or structured products with a reference bond) also have a reference bond as certain events (hereinafter referred to as credit events) in relation to the reference bond (default or redemption event, as defined in the corresponding Final Terms) might have an adverse impact on the value and lead to the early redemption of the product. Provided that no default or repayment event occurs with regard to the reference bond, reference debtor certificates normally work in the same way as a conventional structured product.

Reference debtor certificates are highly sophisticated and complex financial products whose particular characteristic is the fact that the investor not only assumes the usual risks such as market and currency risks and the risk of default by the structured product issuer, but also a corresponding additional risk via the reference bond.

The reference debtor certificate with participation may have one or more reference debtors. In addition to the reference debtor's solvency (non-occurrence of a credit event), the redemption of the reference debtor certificate with participation is also dependent on issuer risk provided that no credit event affecting the reference debtor has occurred. If a credit event affecting the reference debtor has occurred during the term, the reference debtor certificate with participation will be redeemed early at an amount to be determined on account of the credit event.

The value of the reference debtor certificate with participation may fall during the term, for example on account of a negative assessment of the reference debtor's creditworthiness.

If during the term of the reference debtor certificate with participation no credit event affecting the reference debtor has occurred, the investor will participate in the performance of the price of the Underlying.

dd) Leverage Products

Leverage products are Derivatives whose invested amount is subject to a leverage effect both in the direction of profits and losses, i.e., changes in the value of the Underlying have a disproportionate effect on the value and/or the redemption amount than would be the case with a direct investment in the Underlying. The leverage effect permits the investor in a leveraged product to use less capital than if he or she would invest directly in the Underlying. As a result of the leverage effect, higher profits are possible, on the one hand, than in the case of a direct investment in the Underlying, but there is the risk of a total loss of the invested capital.

(i) Warrant (2100)

The essential attribute of Derivatives in the Warrant category is the so-called leverage effect. Changes in the market value of the Underlying or even the absence of expected changes can have a disproportionate effect on the value of the Derivative, up to a total loss.

Depending on the structure, investors profit from rising (call warrants) or falling (put warrants) market prices for the Underlying. The leverage effect causes the value of the Derivatives to react proportionally more strongly to changes in the market price of the Underlying. The leverage is the result of the fact that the invested capital in a warrant is smaller than for a direct investment in the Underlying and indicates how many warrants or options the investor may purchase for the current price of the Underlying. The leverage effect acts in both directions – not only to the advantage of the Holder of the warrants or the option Holder in the case of favorable developments in the market price of the Underlying, but also to the disadvantage of the Holder of the warrants or the option Holder in the case of unfavorable developments in the market price of the Underlying. The risk with an investment in the warrant is therefore greater than that of a direct investment in the Underlying. The potential for loss comprises the total of the invested capital (the so-called option premium).

Considering the limited term of the warrant, the investor or purchaser cannot expect a timely recovery of a negative performance of the Underlying for the investor. Warrants expire worthless if the market value of the Underlying is below (call warrants) or above (put value) the exercise price or the strike. The loss equals the price paid for the warrant (option premium).

In the case of warrants with physical delivery of securities, the investor acquires a claim on the delivery (call warrants) or purchase (put warrants) of a quantity of the Underlying at a price specified in advance, the exercise price or strike.

In the case of warrants with Cash Settlement, the investor acquires a claim for the payment of a Cash Settlement Amount which is the difference between the exercise or strike price and the market price of the Underlying when exercised or on the expiration date.

(ii) Spread Warrant (2110)

Similar to products in the Warrants category, spread warrants are characterised by a leverage effect, resulting in a corresponding disproportionately large potential for gains or losses (including the total loss of the entire amount invested; see the relevant explanations in section i "Warrants").

The risk of investing in spread warrants is greater than that of a direct investment in the Underlying. On expiration the spread warrants allow their Intrinsic Value to be preserved. In contrast to conventional warrants, the Intrinsic Value and the associated potential for gains are limited by a spread consisting of an Upper and Lower Exercise Price.

Call spread warrants enable investors to benefit from rising prices of the Underlying, while put spread warrants allow them to benefit from falling prices; call spread warrants expire worthless, limited to the amount invested, if the Final Fixing Value of the Underlying is below the Lower Exercise Price; by contrast, put spread warrants expire worthless, limited to the amount invested, if the Final Fixing Value of the Underlying is above the Upper Exercise Price.

As mentioned above, the potential gains of an investment in spread warrants are limited, namely by the Upper Exercise Prices in the case of call spread warrants and by the Lower Exercise Prices in the case of put spread warrants. This means that an investor may benefit from rising (in the case of call spread warrants) or falling (in the case of put spread warrants) prices of the individual Underlyings up to a maximum of these (price) thresholds or threshold values. Once the said threshold values have been reached, the highest possible payout of a spread warrant has been reached. The daily loss of time value, which increases towards the end of the term, requires regular monitoring of the spread warrants.

(iii) Warrant with Knock-Out (2200)

Derivatives in the Warrant with Knock category-Out are typically characterized by immediate expiration, without value, if the price of the Underlying falls below a barrier (in the case of a "knock-out call", through which the investor profits from a rising market price) or rises above a barrier (in the case of a "knock-out put", through which the investor profits from a falling market price). Generally, the closer the current market price is to the barrier, the greater the leverage effect. The price of the Derivatives in this category is, in contrast to the price of warrants, only marginally influenced by volatility or current market value. Upon expiration of the instrument, the repayment is based on the current market price of the Underlying and the exercise price or strike.

(iv) Mini-Future (2210)

Derivatives in the Mini-Future category combine characteristics of futures contracts (i.e., contracts in which two parties agree to settle a transaction at a later time) and those of leverage products. Because of the generally low capital requirement, they permit a disproportional participation in the price change of the Underlying and may, therefore, be used for speculation or to hedge positions. Derivatives in this category do not have a fixed term (open-ended), but nevertheless expire immediately upon the market price falling below the barrier (Long Mini-Futures) or exceeding the barrier (Short Mini-Futures), the so-called stop-loss levels, although in this case the repayment of the realized residual value is made. Because of these characteristics, these Derivatives constitute an alternative to classic, exchange-traded futures contracts. In contrast to Derivatives in the warrants category, these Derivatives do not have a time value (Zeitwert), accordingly the price of these Derivatives during their term approximates their intrinsic value, i.e., (in the case of long mini-futures) the market price of the Underlying minus the current financing level or (in the case of short mini-futures) the current financing level minus the market price of the Underlying.

(v) Constant-Leverage Certificate (2300)

Derivatives of the Constant Leverage Certificate category enable investors to make long-term leveraged investments in an Underlying where the risk and the leverage are kept constant. Derivatives of this category do not have a fixed term (they are open-ended).

The main characteristic of this derivative is the constant leverage. The amount invested by the investor is periodically invested with the performance of the Underlying and the desired leverage. The leverage and the current price of the Underlying provide the basis for recalculating the amount invested with the nearest price of the Underlying to ensure that the leverage remains constant. The subscription ratio of the Constant Leverage Certificate is adjusted to reflect the reallocation. If the stop-loss level is reached, the amount invested is lost; however, the loss is limited to the stop-loss level. This prevents the value of this Derivative producing a negative performance.

D. Issuance and Sale of Derivatives

This section sets forth the conditions applicable to the procedures for the issuance of Derivatives. They apply to all Derivatives which are issued by the Issuer under this issuance program.

a) Terms and conditions

The terms of an offer are constituted by the relevant (indicative) term sheet for the individual Derivatives Series. The (indicative) term sheet is merely a marketing document which contains the most important economic terms of the relevant Derivatives Series (if marked as "indicative", merely in indicative form; see Section III.D.a)cc). It does not create any

rights in relation to the Issuer and the Issuer can, in its sole discretion, change or supplement or even cancel it at any time.

The rights and obligations of Holders of the Derivatives in relation to the Issuer are determined solely by the Derivatives Terms specified in this issuance program, as well as the Final Terms.

aa) Subscription

Derivatives can, as specified in the relevant (indicative) term sheet for an individual Derivatives Series, be subscribed for during the subscription period during normal banking business hours at the Issuer or any branch of the Zürcher Kantonalbank. Any minimum or maximum amounts for the subscription will be specified in the (indicative) term sheet for an individual Derivatives Series.

The Issuer reserves the right, in its sole discretion, to shorten, lengthen or cancel the subscription period. The Issuer is not obliged to accept subscriptions.

bb) Allocation

During the subscription period, all subscriptions will be received without any special subscription procedure until the maximum issue size is reached. After the maximum issue size is reached, no further subscriptions will be accepted and the subscription period will be closed without notice. The Issuer will decide, in its sole discretion, whether an allocation will be made.

The results of the offer will not be disclosed. Persons who have subscribed will be informed about their allocation pursuant to the offer or about other matters in respect of the issue by SIX SIS AG and their own bank.

cc) Determination of the issue price

The issue price of a Derivatives Series will be determined by the Calculation Agent on the Initial Fixing Date on the basis of the then current market situation and the price or level of the Underlying, consistent with the terms published in the (indicative) term sheet. In the indicative term sheet, the issue may specify "indicative" issue prices which are based on the fair values at the time of the publication of the relevant indicative term sheet. "Indicative" issue prices are not binding on the Issuer and the legally binding issue price will be specified in the final term sheet and in the Final Terms for a Derivatives Series.

The determination [of the issue price] is made on the basis of the fair value of the components of the Derivatives in accordance with financial mathematical methods. The issue price can include a surcharge that is not apparent to the investor, the amount of which is determined in the discretion of the Issuer and that over time reduces the market price set for the Derivative. Margins and fees can be included in the calculation of the issue price, which in part may be paid as distribution fees to distribution companies. The Issuer is not required to disclose such margins and fees, provided that the fees are not shown via the Total Expense Ratio (TER) described above.

No subscription or issue costs are imposed on the buyer or subscriber by the Issuer.

dd) Placement and Underwriting

If not specified otherwise in the (indicative) Term Sheet for a Derivatives Series, the placement will be made by the Zürcher Kantonalbank (referred to in this capacity as the "Lead Manager").

A calculation agent serves only as service provider to the Issuer and does not assume any obligations or responsibility towards the Holders of the Derivatives.

b) Listing and admission to trading

To the extent not otherwise specified in the (indicative) Term Sheet or the Final Terms for a Derivatives Series, a listing on the SIX Swiss Exchange and trading through SIX Structured Products Exchange Ltd. will be applied for in respect of all Derivatives issued under this issuance program. The Issuer gives no guarantee that a Derivatives Series will, in fact, be listed on the SIX Swiss Exchange and admitted to trading through SIX Structured Products Exchange Ltd.

There are no binding commitments from intermediaries in respect of secondary trading. Zürcher Kantonalbank intends, under customary market terms, to regularly provide ask and bid prices for the Derivatives, but it assumes no legal obligation to do so to the extent not otherwise specified in the Final Terms.

c) Sales Restrictions

aa) In general

To the extent not explicitly specified in the Final Terms, the Issuer has not taken any action and will not take any action to permit the public offer, the holding or the distribution of the offering documentation with respect to the Derivatives in any jurisdiction outside Switzerland. The delivery of this issuance program or other issuance documentation and the offer of the Derivatives may be restricted in certain countries by legal requirements. Persons to whom this issuance program or other issue documentation, such as term sheets, Final Terms, promotional materials or other sales materials are delivered are hereby requested by the Issuer to verify and adhere to the then applicable restrictions.

bb) European Economic Area ("EEA")

In a member state of the EEA which has implemented the directive 2003/71/EG (the "Prospectus Directive"), the Derivatives, including the relevant documents may only be offered from (and including) the date of the entry into force of this implementation if this is permitted pursuant to the applicable law and other regulations; and

- (i) the public offer commences or is completed within twelve months after the publication of a prospectus in respect of the Structured Products approved by the relevant supervisory authority pursuant to the regulations of the member state where the offer originates and, to the extent a public offer is made in a different member state than the member state where the offer originates, a certification or approval from the supervisory authority of the member state where the offer originates has been issued; or
- (ii) an exception from the prospectus obligation exists, which is specified in the implementing legislation of the member state where the offer originates.

"Public offer" means (i) a communication directed at the public in any form and in any manner which contains sufficient information about the terms of the offer and the terms of the structured products to be offered to equip a person to decide whether to purchase or subscribe for the structured products, as well as (ii) any further specifications contained in the implementing legislation of the relevant member state in which the offer is made.

In a member state of the EEA which has not implemented the Prospectus Directive, a public offer in or from this jurisdiction can only be made if this is permitted under applicable law and other regulations and no obligations are imposed on the Issuer. The Issuer has not and will not take action to make a public offer, the holding or the distribution of documentation with respect to the Derivatives permissible in this jurisdiction if special action must be taken for this purpose.

cc) United Kingdom ("U.K.")

With respect to Derivatives with a term of less than one year, the following applies:

The Derivatives may only be sold by persons whose regular business activity, consistent with their business purpose, is the acquisition, holding, management and sale of investments (as principal or as agent).

These persons have not offered or sold any Derivatives and will not offer or sell any Derivatives except to persons whose regular business activity, consistent with their business purpose, is the acquisition, holding, management and sale of investments (as principal or as agent) because the issue of Derivatives otherwise would constitute a violation by the Issuer of Section 19 des Financial Services and Markets Act of 2000 (the "FSMA")

An invitation to take part in investment activities (as defined in Section 21 of the FSMA) was or will only be communicated or made in connection with the issue or the sale of Derivatives under conditions under which Section 21(1) of the FSMA does not apply to the Issuer and all applicable provisions of the FSMA in respect of all activities in relation to the Derivatives which will be carried out in or from the United Kingdom or in this regard are otherwise involved are, were or will be observed.

dd) United States of America ("U.S.A./U.S. persons")

The Derivatives have not been and will not be registered under the Securities Act of 1933 (the "Securities Act") in its current form and trading in the Derivatives has not been and will not be approved by the United States Commodity Futures Trading Commission (the "CFTC") under the United States Commodity Exchange Act (the "Commodity Exchange Act"). The Derivatives may not, directly or indirectly, be offered, sold, resold, delivered or traded at any time in the U.S.A. or to or for account of U.S. persons. Derivatives may not be exercised or redeemed for the benefit of a U.S. person or a person in the U.S.A. In this context, "U.S.A." means the United States of America (the states and the Dis-

trict of Columbia), its territories and possessions and other sovereign territory and "U.S. persons" means "U.S. persons" as defined in Rule 902 of Regulation S under the Securities Act, as well as persons not falling under the definition of "Non-United States Persons" in accordance with Section 4.7 of the CFTC regulations.

ee) Bailiwick of Guernsey ("Guernsey")

Derivatives issued by the Issuer Zürcher Kantonalbank Finance (Guernsey) Limited have not and will not be sold to persons in the Bailiwick of Guernsey.

E. Derivative Terms

The following provisions set forth the general derivatives terms and conditions to be applied in respect of all Derivatives which are issued by the Issuer under this issuance program. These comprise the general investment terms and conditions in general form for all Derivatives issued under this issuance program ("General Derivative Terms and Conditions", see Section III.E.a)), as well as the general special terms applicable to the individual categories of Derivatives (see Section III.E.b) and they apply, subject to any contrary provisions in the specific terms for an individual series of Derivatives which are included in the relevant Final Terms.

The general derivatives terms included in this issuance program and the general special conditions generally do not include all of the information that is necessary for an investment decision because the structuring of the individual Derivatives Series is made immediately before the beginning of the offer and not already at the time of the publication of this issuance program. The issuance program therefore provides a summary of the possible structure of the derivatives, which summary is not exhaustive.

The Final Terms for a specific Derivatives Series may in part deviate significantly from the following general derivatives terms. The investor should, without fail, read and understand the Final Terms, in particular the differences from the typical conditions described below, before he or she invests in a specific Derivative.

a) General derivatives terms

aa) Aggregate amount and further issuances

The aggregate amount of a Derivatives Series as well as the number of Derivatives or the nominal amount are indicated in the relevant Final Terms. This statement does not give any information about the amount of a Derivatives Series that was actually publicly placed in the market by the Issuer or the Lead Manager.

The Issuer is entitled to issue further Derivatives of the same kind at any time and without the consent of the Holders of the Derivatives so that, with the previously issued Derivatives, they constitute a single issue and increase its size. Such an increase will be published pursuant to Section III.G.

The Issuer or other Zürcher Kantonalbank companies are entitled at any time during the term of the Derivatives to buy and sell these. These companies have no obligation to inform the Holders of the Derivatives about such a purchase or sale.

Derivatives which the Issuer did not place in the market or repurchased in the market may, without notice to the Holders of the Derivatives, be cancelled, held as trading assets, resold or used in another way.

bb) Currencies

Derivatives can be issued in Swiss francs (CHF) or another freely convertible currency. The currency of a Derivatives Series is specified in the Final Terms. To the extent not otherwise specified in the Final Terms, all payments from a Derivatives Series are to be made in the specified currency of the relevant series.

cc) Issue price

The issue price is set on a binding basis in the relevant Final Terms. The price can be indicated as price per unit or as nominal amount / par value, with a percentage increase or discount, expressed as a percentage of the nominal. Regarding the specification of the issue price and indicative price information, reference is made to the provisions in Section D.a)cc).

Derivatives are transferable only in units of one Derivative or an integral multiple thereof to the extent the final terms (Final Terms) of a Derivatives Series do not contain any contrary provisions.

dd) Interest payments, dividends and other distributions

(i) General

To the extent not explicitly specified in the Final Terms for a Derivatives Series, the Holder of the Derivatives has no right to the payment of dividends, interest or other distributions in respect of dividends, interest or other distributions that are paid in respect of the Underlying.

For Derivatives for which the Issuer has the obligation to pay interest, this will be specified as an annual interest rate (% p.a.) in the relevant Final Terms.

The interest amount is calculated for each interest period on the basis of the actual number of days in the interest period, divided by 360 unless otherwise specified in the provisions of the Final Terms of a Derivatives Series.

(ii) Rights from Underlyings that are delivered

Underlyings acquired in connection with the redemption of the Derivatives give the right to all dividends payable (in the case of shares) or any other rights linked to the Underlying after the redemption or Settlement Date or after the date of exercise. If the redemption or Settlement Date or the Exercise Date occur on the same date as the loss of the right or entitlement, the Underlying will be delivered ex-dividend or without the right or entitlement.

ee) Interest payment dates

The applicable interest payment dates for a Derivatives Series are specified as calendar days in the relevant Final Terms. If such a specification is missing, interest and distributions are paid on the due date for redemption.

ff) Term and Expiration

The term of the individual Derivatives Series is specified in the relevant Final Terms. The term can be unlimited (open-ended).

If the term for a Derivatives Series is limited, it begins on the Issue Date and ends on the Settlement Date, subject to an early maturity date on account of a termination, exercise of an option or on account of a barrier being reached.

If the term for a Derivatives Series is unlimited, the conditions under which the Issuer or the Holder of a Derivative may properly terminate the Derivative are specified in the Final Terms.

With the exception of Derivatives in the category Leveraged Products (see Section III.C.b)dd) and Section III.E.b)aa)) and open-ended Derivatives, all Derivatives issued under this issuance program expire without special notice from the Issuer or the Holder automatically on the date of redemption or the delivery of the security, as specified in the relevant Final Terms.

The Final Terms for a Derivatives Series may provide that the term of the Derivatives is terminated immediately upon the occurrence of certain events, e.g., if a certain barrier is reached by the Underlying. In this case, the redemption date, the redemption amount or the date of the delivery of the Underlying will be determined by the Issuer or the Calculation Agent in accordance with the provisions in the Final Terms and published according to Section III.G. The redemption amount may also be zero.

gg) Redemption methods

The redemption methods for the individual Derivatives Series are specified in the relevant Final Terms and may provide for a payment of a Cash Settlement Amount and/or the physical delivery of Underlyings.

The Final Terms for a Derivatives Series may provide that the term of the Derivatives is terminated immediately upon the occurrence of certain events, e.g., an Underlying reaching a certain barrier. The Final Terms specify whether the Issuer pays a Cash Settlement Amount in this situation (although the repayment amount paid may also be zero) or is required to deliver Underlyings.

(i) Cash Settlement

If the Issuer is required to pay a redemption amount, such amount is specified in the Final Terms for the relevant Derivatives Series, either as a fixed amount, as a percentage of the par value or nominal amount or as an amount determined by the Issuer or the Calculation Agent on the basis of a formula (with respect to Derivatives in the category Warrants, see also section III.E.b)aa)(iii))

The payment of the Cash Settlement Amount is made in the currency specified in the Final Terms of the respective Derivatives Series by a credit to the account of the relevant Clearing System for the account of the Holder of the Derivatives.

(ii) Physical delivery

To the extent the Issuer is required to physically deliver Underlyings, the number of Underlyings to be delivered is specified in the Final Terms for the relevant Derivatives Series, either as a fixed number or as number to be calculated by the Issuer or the Calculation Agent on the basis of a formula (with respect to Derivatives in the category Warrants, see also section III.E.b)aa)(iii)).

For each individual Derivative, any fractions [of an Underlying] are settled by a cash payment based on the closing price of the Underlying on the date of the delivery. The aggregation of such fractions for all acquired Derivatives held by an investor for the purpose of delivering an Underlying will not be made even if the fractions would, in pure mathematical terms, result in delivery of more Underlyings. If the delivery of Underlyings is impossible on the delivery date, the Issuer has the right to pay the equivalent cash value of the Underlying in the currency of the Derivatives Series. The equivalent cash value will be calculated by the Issuer or the Calculation Agent on the basis of the closing price of the Underlying on the delivery date.

hh) Termination / early redemption

(i) New taxes and laws or administrative measures

The Issuer reserves the right of early termination in respect of all Derivatives issued under this issuance program for tax reasons (such as, e.g., in the situation in which the Issuer would be required on account of new tax laws to pay additional amounts which result from the withholding or deduction of current or future taxes, imposts, charges or fees, regardless of type), as well as in the case of limitations in respect of its activities as Issuer through new laws or administrative measures (e.g., if it is prohibited under supervisory law from issuing derivatives).

The right of early termination is also available to the Issuer upon the occurrence of an extraordinary event in accordance with Section III.E.a)oo)(ii), to the extent that, in the opinion of the Issuer, an appropriate adjustment, for whatever reason, is not possible.

An early termination is effected by a notice pursuant to Section III.G. The termination becomes effective at the time of the notice to the extent that the notice does not specify a following Business Day. In this case, the term of the Derivatives ends early. The Issuer pays a cash amount in the currency of the Derivative that is determined by the Issuer or the Calculation Agent in its absolute discretion, if applicable, taking into account the relevant market price of the Underlying and any costs incurred by the Issuer as a result of the termination (this amount also may be zero). The date for the redemption will be specified in the notice.

(ii) Negative interest

For Derivatives relating to a reference interest rate, the Issuer reserves the right of early termination at any time with respect to all Derivatives issued under this issuance program in the event that the reference interest rate becomes a negative value.

ii) Statute of limitation

Claims for payment in respect of the Derivatives lapse 10 years after their due date. Claims for the payment of interest in respect of the Derivatives lapse 5 after their due date.

jj) Taxes

(i) General

Potential investors should be aware that they may be required to pay taxes or other charges any levy in accordance with the laws and practice of the jurisdiction, in which the Derivatives issued under this issuance program are transferred, or follow the legal rules of the country, which will then be applicable if the Underlying is considered to be shares and possibly the laws and practices of other jurisdictions. In certain jurisdictions there may not be any official statements of tax authorities or court decisions in relation to derivatives. Potential investors should rely on the summarized tax information contained in this issuance program or in the Final Terms, but should consult their own tax advisers about the tax implications of purchasing, selling and performances of Derivatives. Only those advisers can advise on the

individual tax implications for a potential investor. Such individual tax implications in relation to a potential investor may have a negative impact on the returns, which a potential investor may receive under the Derivatives.

(ii) Guernsey

Transfers and payments or deliveries of such Derivatives are not subject to any withholding tax in Guernsey. Furthermore, Guernsey does not levy any capital gains tax upon any gains made by non-Guernsey resident investors on such Derivatives.

(iii) Swiss taxes

On 7 February 2007, the Federal Tax Administration issued Circular Letter No. 15 concerning bonds and derivative financial instruments under the direct federal tax, the withholding tax, as well as the stamp duty (issuance and transfer tax). The Derivatives issued under this issuance program are categorized as derivative financial instruments as defined in Circular Letter No. 15.

The Issuer will specify in the Final Terms for each Derivatives Series which taxes, in its opinion, the relevant Derivative is subject to under the mentioned circular letter.

The Final Terms may include additional tax information, in particular about the then applicable EU taxation of interest. The Swiss Federation has entered into an agreement on 26 October 2004 with the European Community providing for measures equivalent to those laid down in the Council Directive 2003/48/EC on taxation of savings income of 3 June 2003 in the form of interest payments effective as of 1 July 2005. According to this agreement, certain specified interest payments from a Swiss paying agent to a beneficial owner who is an individual with residence in an EU Member State are subject to a withholding tax at the current rate of 35%.

The information set forth in the Final Terms concerning taxation is merely a summary of how the Issuer understands the taxation of the relevant Derivatives Series under the then applicable law and current practice of the Federal Tax Administration in Switzerland. Because this summary does not take into account every aspect of Swiss tax law and, in particular, not the specific tax situation of an investor resident outside Switzerland, potential investors should obtain the advice of their personal tax adviser in respect of the tax consequences of the purchase, ownership, sale or redemption of the Derivatives, in particular the tax consequences in a different jurisdiction. In addition, it should be noted that the cantons may have a tax law system and practice that deviates from that of the Federal Tax Administration.

(iv) Taxes and fees applicable to a transfer of Underlyings

Any fees, costs and taxes that arise in connection with the exercise of the rights linked to the Derivatives and the transfer of Underlyings (physical delivery) are to be borne by the Holder of Derivatives to the extent not otherwise specified in the Final Terms for an individual Derivatives Series.

kk) Security

Subject to any provisions specifying otherwise in the Final Terms for a specific Derivatives Series, the Issuer's Derivatives are not secured.

In any case, all claims for payment against the Zürcher Kantonalbank are protected by the government guarantee of the Canton of Zurich pursuant to § 6 para. 1 of the Law concerning the Zürcher Kantonalbank, the text of which is: "The canton is liable for all liabilities of the bank to the extent that its own funds are not sufficient".

A Keep-Well Agreement entered into between Zürcher Kantonalbank Finance (Guernsey) Limited and the Zürcher Kantonalbank provides an indirect protection in respect of the payment claims of Zürcher Kantonalbank Finance (Guernsey) Limited's investors. In this Keep-Well Agreement, the Zürcher Kantonalbank has agreed to capitalize Zürcher Kantonalbank Finance (Guernsey) Limited so that investor and customer confidence in the Zürcher Kantonalbank Group is not endangered (the complete text of the Keep-Well Agreement is included in Annex 3). Investors should note that this contractual relationship has not been made as a guarantee for the benefit of third parties.

II) Status of the derivatives

To the extent not provided otherwise by mandatory provisions of law, the Derivatives constitute unsecured and unsubordinated liabilities of the Issuer which rank equally with each other and with all other unsubordinated liabilities of the relevant Issuer.

mm) APPLICABLE LAW AND JURISDICTION

The Derivatives issued under this issuance program are subject to Swiss law.

All disputes between the Holders of the Derivatives, on one hand, and the Issuer, on the other hand, are subject to the jurisdiction of the ordinary courts of the Canton of Zurich, Switzerland, with the Jurisdiction in Zürich 1, with the possibility of an appeal to the Swiss Supreme Court in Lausanne, whose judgment is final. The Issuer Zürcher Kantonalbank Finance (Guernsey) Limited chooses for this purpose a legal and special domicile in Switzerland at Zürcher Kantonalbank, Bahnhofstrasse 9, 8001 Zurich.

nn) Calculation agent, Paying Agent and Exercise Agent

(i) Calculation Agent

Subject to any contrary provisions for a specific Derivatives Series in the relevant Final Terms, the Zürcher Kantonalbank acts as calculation agent for all Derivatives issued under this issuance program (in this capacity, identified as "Calculation Agent").

The Issuer is entitled at all times to replace the calculation agent, to appoint one or more additional calculation agents and/or to revoke their appointment.

(ii) Paying Agent

To the extent not otherwise specified in the (indicative) Term Sheet or the Final Terms of a Derivatives Series, the Zürcher Kantonalbank acts as paying agent (in this capacity, identified as "Paying Agent").

The funds necessary for payments of principal, interest, costs and any delivery of Underlyings will be made available by the Zürcher Kantonalbank to the Issuer on a timely basis on the relevant due date in the relevant currency. The receipt of such funds from Zürcher Kantonalbank discharges the Issuer from its liabilities for payments on the relevant due dates for principal, interest and costs or, if applicable, any delivery of securities.

The relevant Issuer is entitled at all times and without the consent of investors to replace the Paying Agent with one or more Swiss or foreign banks (the "New Paying Agent") as paying agent for the Derivatives (or to terminate their appointments, provided that (i) the New Paying Agent assumes all obligations of the former Paying Agent that the former Paying Agent owed in respect of the Derivatives and (ii) the New Paying Agent has received all necessary approvals of the authorities in its country of domicile.

Any such paying agent serves only as service provider to the Issuer and does not assume any obligations or responsibility towards the Holders of the Derivatives.

(iii) Exercise Agent

Subject to any contrary provisions for a specific Derivatives Series in the relevant Final Terms, the Zürcher Kantonalbank acts as exercise agent for all Derivatives issued under this issuance program (in this capacity, described as the "Exercise Agent").

Especially in the case of certain Derivatives in the category Leverage Products, an Exercise Notice must be submitted to the Exercise Agent (with a copy to the Issuer and the Clearing System) for the exercise of the option.

The Issuer is entitled at all times to replace the Exercise Agent with one or more additional exercise agents and or to terminate their appointment.

oo) Amendments

(i) Correction of typographical errors

The Issuer is also entitled in the Final Terms to change or supplement (i) obvious errors in the text or a calculation or other obvious errors, as well as (ii) contradictory or incomplete provisions without the consent of the Holders of the Derivatives, provided that in the situations mentioned in (ii), only those changes or additions are permitted that, considering the interests of the Issuer, may be reasonably imposed on the Holders of the Derivatives, i.e., that do not significantly impair the financial situation of the Holders of the Derivatives or the methods of exercise. Amendments of the terms of the Derivatives are to be notified in accordance with Section III.G.a).

(ii) In case of the occurrence of extraordinary events

If during the term of a Derivatives Series (i) in respect of an Underlying or a component of an Underlying (a) an extraordinary event described in Section IV occurs, (b) an extraordinary event described in the Final Terms for a Derivatives Series occurs or (c) the Issuer or the Calculation Agent determines, in its absolute discretion, that an Underlying or component of an Underlying - for whatever reason - is no longer comparable to the Underlying on the Issue Date or (ii) any other exceptional event (force majeure) occurs which makes it unreasonably difficult or impossible for the Issuer to fulfill the rights arising from the Derivatives or to determine the value of the Derivatives, the Issuer shall, in its absolute discretion, select the appropriate measures and, if necessary, amend the terms of the Derivatives in such a way that the economic value of the Derivative, to the fullest extent possible, is equal to the value of the Derivative prior the occurrence of the event.

The specific rules on amendments for the individual types of Underlyings in Section IV or in the Final Terms take precedence over these provisions. Amendments of the terms of the Derivatives are to be notified in accordance with Section III.G.a).

If the Issuer is of the opinion that, following the occurrence of an extraordinary event, an appropriate amendment, for whatever reason, is not possible, the Issuer is entitled to cause the early termination of the Derivatives through a notice in accordance with Section III.G.a) as contemplated by Section III.E.a)ff).

pp) Exercise methods

The exercise methods for Derivatives with exercise rights (option rights) in favor of the Holder of the Derivatives are specified in the Section 'Special terms' (see Section III.E.a)tt)).

qq) Protection against dilution

In the case of Derivatives with equity securities as an Underlying, following the occurrence of a Corporate Action (see the definition in the glossary) which in the determination of the Issuer or the Calculation Agent has a dilutive or concentrating effect on the market value of the Underlying, the Issuer or the Calculation Agent will, in its own discretion, amend the terms of the Derivative so that the economic value of the Derivative before the occurrence of the event is equal to the fullest extent possible to the value of the Derivative prior the occurrence of the event.

rr) Change of the Underlying

The events which can lead to a change of the Underlying or a component of an Underlying, as well as the effects of the occurrence of such an event on the terms of the Derivatives are governed by the Section "Information about the Underlyings" (see. Section IV).

In addition, the Issuer is entitled to amend the terms of the Derivatives in its absolute discretion upon the occurrence of an extraordinary event in accordance with Section III.E.a)oo).

ss) Capital protection

In the case of Derivatives in the category Capital Protection, the Issuer is required to pay a minimum redemption amount on the redemption date (see also, in respect of capital protected products, Section III.C.b)aa)). In the Final Terms for this Derivatives Series, the Minimum Redemption Amount will, as a general rule, be specified as a percentage of the Nominal Value or par value of the Derivative.

The Minimum Redemption Amount is not owed if the Derivatives are repaid before their maturity date, e.g., in the case of an early redemption following the occurrence of a termination event (see Section III.E.a)ff). During the term, this Derivatives Series may have an intrinsic value which is significantly lower than the Minimum Redemption Amount.

tt) Change of obligor

The Issuer is entitled at all times and without the consent of the investors to assign in whole (but not in part) the rights and claims under individual Derivatives or all of them to a Swiss or foreign subsidiary, branch or holding company of the Zürcher Kantonalbank (the "New Issuer") to the extent that (i) the New Issuer assumes all of the obligations arising out of the assigned Derivatives which the previous Issuer owed in respect of these Derivatives, (ii) the Zürcher Kantonalbank enters into a keep-well agreement with the New Issuer with terms equivalent to the one between the Zürcher Kantonalbank and Zürcher Kantonalbank Finance (Guernsey) Limited, (iii) the New Issuer has received from the supervisory authorities of the country in which it is domiciled all necessary approvals for the issue of Derivatives and the assumption of the obligations under the assigned Derivatives. An assignment of Derivatives pursuant to this provision is to be notified to the investors pursuant to Section III.G.

Upon the fulfillment of the conditions mentioned above, the New Issuer assumes in every respect the role of the previous Issuer and the previous Issuer will be released from all of the obligations in relation to the Holders of the Derivatives which were related to the function of the Issuer or related to the structured products.

In the event of such a replacement of the obligor, every reference in this issuance program and in the relevant issue and listing prospectuses to the Issuer is deemed a reference to the New Issuer.

The Issuer bears no responsibility for the harm to individual investors caused by, or the consequences for individual investors of, the exercise of the Issuer's right to substitute another obligor as Issuer. Accordingly, no investor is entitled in this situation to assert legal claims or indemnity claims against the Issuer.

b) Special terms for individual categories of Derivatives (special terms)

aa) Special terms for Warrants

The following specific conditions apply for Derivatives in the category Warrants (see Section III.C.b)dd)(i) and III.C.b)dd)(ii)) in addition to the general terms for all categories of Derivatives.

(i) Types of Warrants

American Style and European Style Warrants

In the case of warrants which are identified in accordance with the Final Terms as "American Style", the Holder of the warrants may exercise his or her option on any Business Day during the option period until, at the latest, the maturity date.

In the case of warrants which are identified in accordance with the Final Terms as "European Style", the Holder of the warrants may only exercise his or her option right on the maturity date.

Warrants with Cash Settlement

Warrants with Cash Settlement grant the Holder the right to receive a Cash Settlement Amount if on the Exercise Date (a) in the case of call warrants, the difference between the closing price of the Underlying on the maturity date or the Exercise Date and the exercise price and (b) in the case of put warrants, the difference between the exercise price and the closing price of the Underlying on the maturity date or the Exercise Date is a positive amount.

To the extent that nothing to the contrary is specified in the Final Terms, warrants on indexes, exchange rates, precious metals, commodities and interest rates provide an entitlement to the payment of a Cash Settlement Amount.

Warrants with physical delivery

Warrants with physical delivery grant the Holder the right, but not the obligation, to buy (call warrant) or sell (put warrant) a specified number of an Underlying at a price specified in advance (exercise price) up to a date specified in advance (expiration date).

To the extent that the Final Terms do not provide to the contrary, Warrants on shares provide an entitlement to the physical delivery of the shares.

(ii) Methods of exercise

Option period

The option period is specified for each Derivatives Series in the Final Terms and specifies the period in which the option must be exercised.

In the case of warrants on equity securities, the Issuer is entitled, to the extent that on a Business Day more than 100,000 warrants are exercised by a Holder or a group of Holders trading together, to defer the Exercise Date for warrants which exceed this number to the next following Business Day.

Automatic exercise and notice of exercise

To the extent that nothing to the contrary is specified in the Final Terms for a Derivatives Series, all warrants with Cash Settlement are deemed automatically exercised on the expiration date, to the extent that (a) in the case of call warrants, the difference between the closing price of the Underlying on the expiration date and the exercise price and (b) in the case of put warrants the difference between the exercise price and the closing price of the Underlying is a positive amount. Otherwise, the warrants expire worthless.

To the extent that the Holder of a warrant with Cash Settlement which is identified in the Final Terms as "**American Style**" wants to exercise during the option period, but before the expiration date, the delivery of an Exercise Notice to the Exercise Agent (see Section III.G.b)) with a copy to the Issuer and the Clearing System is necessary. The written notice of exercise must be received by the Exercise Agent not later than 12:00 CET or a different time specified for a Derivatives Series in the relevant Final Terms and cannot be withdrawn in order for the warrant to be deemed exercised on the relevant date. Any Exercise Notices received later are deemed delivered on the next following Business Day.

To the extent that nothing to the contrary is specified in the Final Terms for a Derivatives Series, the delivery of an Exercise Notice to the Exercise Agent (see Section III.G.b)) with a copy to the Issuer and the Clearing System is necessary for the exercise of **warrants with physical delivery**. The written notice of exercise must be received by the Exercise Agent not later than 12:00 CET or a different time specified for a series of Derivative in the relevant Final Terms and cannot be withdrawn, in order that the warrant is considered exercised on the relevant date. Any Exercise Notices received later are deemed exercised on the next following Business Day.

Accordingly, warrants with physical delivery, or other warrants for which an automatic exercise has not been specified in accordance with the Final Terms, expire worthless if the Exercise Notice is not received by the Exercise Agent not later than 12:00 CET on the expiration date (or a different time specified in the relevant Final Terms).

(iii) Effect of exercise

Cash Settlement

In the case of warrants with Cash Settlement (see Section III.E.b)aa)(i)), the Issuer or the Calculation Agent calculates the amount of the Cash Settlement Amount on the Exercise Date and publishes it in accordance with Section III.G.

The Cash Settlement Amount will be paid, in the case of warrants on indexes, Exchange Rates, precious metals and commodities, on the fourth Business Day after the Exercise Date.

Physical delivery

In the case of warrants with physical delivery (see Section III.E.b)aa)(i)), the delivery of the number of Underlyings specified in the relevant Final Terms is made on the third Business Day after the Exercise Date against payment of the exercise price.

(iv) Application for registration in the case of the physical delivery of registered shares

In the case of registered shares which are delivered following the exercise of call warrants, it is the responsibility of the acquirer to submit an application for registration in the share register of the relevant company. The validity of the exercise of the warrant is not affected by a refusal to confirm the status of a shareholder with voting rights.

(v) Early termination if amendments are not possible

If the Issuer or the Calculation Agent is of the opinion that following the occurrence of a Market Disruption (see Section IV.A.b) or an extraordinary event (see Section III.E.a)oo)(ii)), which in the opinion of the Issuer or the Calculation Agent would make an amendment of the terms of the warrant necessary, but a proper amendment of the terms of the warrant, for whatever reason, is not possible, it is entitled, but not required, to terminate the warrants early.

The termination becomes effective on the date ("Termination Date") of the publication of the notice in accordance with Section III.G. In this case the term of the warrants ends early. In the event of a termination, the Issuer will pay to the relevant Holder of an affected warrant within five Bank Working Days after the Termination Date an amount per warrant which, in its reasonable judgment, is determined to be the appropriate market price.

bb) Special terms for mini-futures

For Derivatives in the category mini-futures (see Section C.b)dd)iv)), the following specific terms apply in addition to the general terms applicable to all categories of Derivatives.

(i) Term

Mini-futures have no fixed term (open ended). The maturity date may occur at any time (even on or immediately after the Issue Date) and is set by (i) a termination by the Issuer, (ii) the occurrence of a stop-loss event or (iii) an Exercise Notice from the Holder of the mini-futures.

Termination by the Issuer

The Issuer is entitled at all times, without a specification of reasons, to terminate the mini-futures. The termination becomes effective at the time of the publication of the notice in accordance with Section III.G.

Stop-loss event

A stop loss event occurs if the market price for an Underlying during the trading hours for the Underlying reaches the stop loss level specified in the relevant Final Terms or exceeds it (in the case of short mini-futures) or falls below it (in the case of long mini-futures).

Exercise Notice of the Holder

To the extent that the Holder of a mini-future wants to exercise during the term, he or she must do this through an Exercise Notice to the Exercise Agent (see Section III.G.b)) with a copy to the Clearing System. The Exercise Notice must be received by the Exercise Agent not later than 11.00 CET or a different time specified in the relevant Final Terms for a Derivatives Series and cannot be withdrawn, in order for the mini-futures to be considered exercised on the relevant date. An Exercise Notice received later is deemed exercised on the next following Business Day. After the delivery of an effective Exercise Notice, an assignment of mini-futures is not permitted.

If a stop-loss event occurs on the date on which the Exercise Notice becomes effective, the Exercise Notice takes precedence.

(ii) Effect of termination, Exercise Notice and automatic exercise

If mini-futures become due for redemption as a result of a termination, the occurrence of a stop loss event or an Exercise Notice from the Holder of the mini-futures, a cash settlement will be paid in accordance with the specific provisions of the relevant Final Terms. In this regard, it is to be noted that the relevant time for the calculation of the Cash Settlement Amount is different depending on why it has become due. In the case of a termination or Exercise Notice, generally the closing price of the Underlying applies; in the case of a stop-loss event, the price of the Underlying during trading hours applies.

To the extent that nothing different is specified in the relevant Final Terms, the Cash Settlement Amount will be paid on the fifth Bank Working Day after termination, occurrence of the stop-loss event or the effectiveness of the Exercise Notice from the Holder of the mini futures.

F. Structure of the Derivatives

Derivatives are issued under this issuance program as book entry securities as defined in Art. 973c Code of Obligations.

The book-entry securities are created by registration in the securities book which the Zürcher Kantonalbank maintains for the Derivatives issued by it as well as for those of Zürcher Kantonalbank Finance (Guernsey) Limited. The book-entry securities are thereupon registered in the main registry of the SIX SIS AG or another custodian recognized by the SIX Swiss Exchange (always referred to as "Custodian") and credited to the account of one or more participants of the Custodian as book-entry securities as defined in the Federal Law on Book-Entry Securities of 3 October 2008 ("BEG").

As long as the Derivatives are registered as book-entry securities with the Custodian, their transfer is governed by the provisions of the BEG. According to Art. 24 BEG, book-entry securities are transferred by an instruction to transfer the securities from the account Holder to the Custodian and by credit of the book-entry securities to the securities account of the acquirer. The transfer is completed with the credit. At the same time, the transferring investor loses his or her rights in the transferred book-entry securities.

The records of the Custodian determine the number of Derivatives held by a participant of the Custodian. The Issuer, as well as the Paying Agent and the Exercise Agent, are entitled to treat each account Holder in the main register of the Custodian in whose securities account Derivatives are registered as book-entry securities and the rightful owner of the Derivatives and to make payments or deliveries to the owner of the securities account in full discharge of its obligations as defined in Art. 5 lit. c BEG.

G. Notices

a) Notices and other disclosures

All notices concerning the Derivatives for the relevant Derivatives Series will be given with legal effect by the Issuer under the internet address: <http://www.zkb.ch/strukturierteprodukte>. Official notices concerning Derivatives Series that are quoted on the SIX Swiss Exchange will, in addition, be published in accordance with the regulations issued by the SIX Swiss Exchange applicable to the IBL (Internet Based Listing) and IBT (Internet Based Terms).

b) Notices by investors to the Issuer, the Paying Agent, Exercise Agent and the Calculation Agent

Notices from investors to the Issuer, as well as to the Paying Agent, Exercise Agent and the Calculation Agent are to be given in writing and sent to:

H. Limitation on transferability and selling restrictions

To the extent that the Final Terms for a Derivatives Series do not provide otherwise, the Derivatives are only transferable in units of a single Derivative or an integral multiple thereof.

For sales restrictions, see Section III.D.c).

I. Symbol, securities number and ISIN

All Derivatives issued under this issuance program will be unambiguously identified by a Swiss securities number and an "International Securities Identification Number" ("ISIN"). The Swiss securities number will be assigned by the business SIX Telekurs. For Derivatives Series which are listed on the SIX Swiss Exchange and traded through SIX Structured Products Exchange AG, SIX Telekurs also assigns a symbol. The symbol, the Swiss securities number and ISIN will be specified in the Final Terms.

J. Trading period

Derivatives which are listed on the SIX Swiss Exchange and traded through Scoach Switzerland may be traded during the trading times of SIX Structured Products Exchange AG up to the last Trading Day which is specified in the relevant Final Terms. The last Trading Day may be before the maturity date.

K. Price quotations

In the case of Derivatives with interest components, it will be specified in the relevant Final Terms whether the price of the Derivatives is stated with accrued interest ("Dirty Price") or if accrued interest is stated separately ("Clean Price").

L. Severability clause, amendments of the terms

If any provision of the Derivatives Terms is or becomes wholly or partially invalid, incomplete or impossible of performance, or in event of omitted terms, then the application of the remaining provisions of the Derivatives Terms will not be affected thereby.

A provision that is consistent with the meaning and purpose of the Derivatives Terms should replace the provision that is invalid, incomplete or impossible of performance or should address any omission.

The relevant Issuer is entitled to improve, correct or supplement any provision of the Derivatives Terms for purposes of clarity and accuracy in the event of ambiguity or uncertainty. The Issuer may also in such a situation correct, supplement or amend the Derivatives Terms in such respect and in such a manner as it considers necessary or desirable, so long as investors do not suffer significant financial losses as a result.

M. Representative

Zürcher Kantonalbank, as a recognized representative under Art. 43 Listing Rules, represents Zürcher Kantonalbank Finance (Guernsey) Limited before the SIX Swiss Exchange.

IV. INFORMATION ABOUT THE UNDERLYINGS

A. General Information

a) Nature of the Underlyings

Various Underlyings may be the basis for the Derivatives issued under this issuance program (in relation to which the value of the Derivatives changes, as described in Section III.C.b) or fluctuates), although the specific Underlying or Underlyings for a specific Derivatives Series are to be found in the Final Terms which alone are controlling.

Potential Underlyings are generally the permitted derivatives under Art. 12 of the Additional Rules for the Listing of Derivatives (Additional Rules for Derivatives, ARD) of 21 July 2010. Among these are included, but not limited to, participating securities (Beteiligungrechte) such as shares (Aktien), participating certificates (Partizipationsscheine) and (profit participating securities (Genussscheine) that are listed on the SIX Swiss Exchange or a foreign securities exchange subject to equivalent regulation. In addition, all derivatives listed or traded on the SIX Swiss Exchange, as well as standardized options and futures contracts which are quoted on a regulated futures exchange, such as Eurex or the Chicago Mercantile Exchange (CME) are also Underlyings. Various indexes, regardless of whether they are published and maintained by the Issuer or by third parties, and reference rates, such as, freely convertible currencies, customary market interest and swap rates, such as 3-month LIBOR or EURIBOR, precious metals, specifically gold, silver, platinum and palladium and also commodities which are traded and/or published on an exchange recognized by the Regulatory Board of SIX Swiss Exchange and their reported spot-market prices or for which the Issuer ensures that the rules and the composition were made transparent for the investor, are permitted as Underlyings. Further, baskets of the foregoing Underlyings may constitute the Derivatives described here. Baskets may be "static", i.e., generally without change during the term of the Derivatives, or also "dynamic".

b) Information about price changes of Underlyings

Information about historical or current price changes of Underlyings as well as their volatility may be obtained from the issuer of the Underlying or a component of an Underlying, an index sponsor or the Relevant Exchange for the Underlying or a component of an Underlying. Investors should note that historical price changes provide no assurance that the Underlying or the component of the Underlying will change in the same or similar way in the future.

c) Market disruptions

aa) Events

The following events, as well as all others identified as such in the Final Terms for a Derivatives Series, constitute a "Market Disruption", if such an event is significant in the determination of the Issuer or the Calculation Agent; provided that the Issuer or the Calculation Agent shall make its determination on the basis of the circumstances it considers, in its reasonable judgment, relevant, including, among other things, taking into account the hedging measures of the Issuer in respect of the Derivatives. There may be a Market Disruption if:

(i) Derivatives based on shares or a basket of shares

(a) trading in the Underlying or a component of the Underlying is suspended or significantly limited on the principal exchange on which it is traded, (b) the trading of options or futures on the Underlying or a component of the Underlying is suspended, or significantly limited on the principal exchange on which they are traded or (c) there are no current reports of Exchange Rates which are required for a calculation in connection with the Derivatives.

(ii) Derivatives based on an index or a basket of indexes

(a) the calculation of the level of the index is suspended by the index sponsor, (b) the trading of options or futures on the Underlying or a component of the Underlying is suspended or significantly limited on the principal exchange on which they are traded or (c) there are no current reports of Exchange Rates which are required for a calculation in connection with the Derivatives.

(iii) Derivatives based on a futures contract or a basket of futures

(a) trading in the Underlying or a component of the Underlying is suspended or significantly limited on the principal exchange on which it is traded, (b) the trading of options or futures on the Underlying or a component of the Underlying is suspended, or significantly limited on the principal exchange on which they are traded or (c) there are no current reports of Exchange Rates which are required for a calculation in connection with the Derivatives.

(iv) Derivatives based on a collective capital investment or a basket of collective capital investments

(a) trading in the Underlying or a component of the Underlying is suspended or significantly limited on the principal exchange on which it is traded, (b) the net asset value is not calculated or reported within the usual time periods (c) the trading of options or futures on the Underlying or a component of the Underlying is suspended, or significantly limited on the principal exchange on which they are traded or (d) there are no current reports of Exchange Rates which are required for a calculation in connection with the Derivatives.

(v) Derivatives based on Exchange Rates

(a) trading in at least one of the currencies of an Underlying is suspended or significantly limited, (b) the convertibility of the relevant currency is limited or (c) it is impossible to obtain an Exchange Rate.

(vi) Derivatives based on an interest rate

the reference rate on which the derivative is based becomes a value lower than zero ("0").

(vii) Derivatives based on other Underlyings

If the Underlying is a bond, a precious metal, a commodity or a Structured Product, or if the Underlying is composed of the foregoing: (a) trading in the Underlying or a component of the Underlying is suspended or significantly limited on the principal exchange on which it is traded, (b) the trading of options or futures on the Underlying or a component of the Underlying is suspended, or significantly limited on the principal exchange on which they are traded, (c) the lack of market prices which are required for a calculation in connection with the Underlying or components of the Underlying or (d) the lack of current reports of Exchange Rates which are required for a calculation in connection with Derivatives.

bb) Effects of a Market Disruption

(i) Effects on the value of a Derivative during the term

If a Market Disruption occurs and continues before the maturity date of a Derivative in respect of an Underlying or a component of an Underlying and therefore a market price cannot be determined, the Issuer or the Calculation Agent shall determine the market price of the relevant Underlying or components of the Underlying before the Market Disruption in its unfettered discretion and subject to general market conditions and the last market price of determined before the Market Disruption for the Underlying or component of the Underlying affected by the Market Disruption. In determining the market price, the Issuer or the Calculation Agent may, if options and futures contracts on the Underlying or the components of the Underlying are traded on an exchange, take into account the rules of the Relevant Exchange for the termination of the market price. If the Underlying is an index, the Calculation Agent may, in addition, in determining the level of the index, use the concept of the index sponsor or refer to determinations of the indexes by persons who have calculated the level of the index in accordance with the concept of the index sponsor. The Issuer or the Calculation Agent is not required to do so. The determination of the market price is binding on the Holders of the Derivatives to the extent that an obvious error has not been made. This provision applies equally to the determination of the value of the Derivative whose Underlying or Underlying components has been affected by a Market Disruption.

(ii) Effects on the maturity date of the Derivatives

If a Market Disruption occurs and continues before the maturity date of a Derivative in respect of an Underlying or a component of an Underlying and therefore a market price cannot be determined, the maturity date will be postponed to the first Trading Day on which the Market Disruption no longer prevails. If a Market Disruption continues for a period of eight Business Days after the maturity date, the eighth Business Day after the maturity date shall be deemed the new maturity date ("New Maturity Date"). In this case, the Issuer or the Calculation Agent shall determine the closing market price of the Underlying which is affected by the Market Disruption or the components of the Underlying affected by the Market Disruption on the New Maturity Date in its unfettered judgment, subject to general market conditions and the last price of the Underlying or component of the Underlying which is affected by the Market Disruption determined before the Market Disruption. The determination of the closing price is binding on the Holders of the Derivatives to the extent that an obvious error has not been made. The closing price of an Underlying or components of an Underlying which have not been affected by the Market Disruption will be determined as of the original maturity date.

If the maturity date is postponed, the new settlement date is the eighth day after the date of the New Maturity Date (the "New Settlement Date"). If this day is not a Business Day, then the immediately next succeeding Business Day is the New Settlement Date.

The Issuer and the Calculation Agent are not liable to the Holder of a Derivative for any losses which result from a Market Disruption.

(iii) Effects on the exercise of warrants

If the Issuer or the Calculation Agent determine on the Exercise Date that a Market Disruption has occurred and is continuing, the Exercise Date will be postponed to the next Trading Day on which, in the opinion of the Issuer or the Calculation Agent, a Market Disruption is no longer occurring. The Issuer or the Calculation Agent shall determine in their unfettered discretion whether a Market Disruption is occurring and the Exercise Date is to be postponed.

cc) Notices

The Issuer or the Calculation Agent shall notify investors in accordance with Section III.G as soon as practicable whether a Market Disruption has occurred on a day on which the Issuer or the Calculation Agent, in the absence of a Market Disruption, would have had to determine the price or value of an Underlying and what consequences the Market Disruption had on the affected Derivative.

B. Additional Provisions for Derivatives based on Participation Rights (Beteiligungsrechte)

a) Market price of the Underlying

The "market price" is the price of the Participation Rights determined and published by the Relevant Exchange. The Relevant Exchange is the securities exchange for the Primary Listing of the Participation Rights, subject to any contrary provision in the Final Terms for a Derivatives Series. If during the term of a Derivative, the Relevant Exchange does not determine and publish the market price for the Participation Rights on a particular day, the Issuer or the Calculation Agent, in its unfettered discretion, shall determine whether another securities exchange on which the Participation Rights are listed and which such securities exchange should be the Relevant Exchange on this date.

The "closing price" is the official closing price of the Participation Rights on a specific date determined and published on the Relevant Exchange.

For the determination of whether any barrier has been reached or breached (upwards or downwards) by the Participation Rights, each market price of the Participation Rights determined on the Relevant Exchange during the Observation Period shall be authoritative.

For the determination of whether any trigger level has been reached or breached (upwards or downwards) by the Participation Rights, the price during the trigger period shall be authoritative.

b) Rights related to the Underlyings

The Underlyings actually acquired upon redemption have the rights to all dividends or other rights and claims linked to the Underlying payable after the Settlement Date or at the time of the exercise. If the Settlement Date or the Exercise Date and payment date for the dividend or the date for the loss of the claim occur on the same date, the Underlying will be delivered without the dividend or the claim.

c) Change of the Underlying

The following events, among others, constitute extraordinary events and may, in the discretion of the Issuer or the Calculation Agent, lead to a change in the share which is the Underlying: (a) Corporate Actions (as defined in the glossary), (b) the exchange of shares for other shares or cash settlements following a merger or acquisition, (c) the delisting or (e) the final termination of trading in the share on the Relevant Exchange.

aa) Corporate Actions

Corporate Actions which have a dilution or concentration effect on an Underlying or a component of an Underlying entitle the Issuer to amend the Derivatives Terms in accordance with Section III.E.a)qq).

bb) Exchange offers

If the shareholders of an Underlying or a component of an Underlying are offered an exchange of shares in connection with the acquisition of a business or a merger, then this leads to an amendment of the terms of the Derivatives to the extent the transaction has closed. A transaction is considered closed with its registration in the relevant commercial register or an equivalent foreign register or with the announcement of the irrevocable making of an offer by the acquiring company ("Merger Closing") The amendment of the terms of the Derivatives occurs with effect on the date on which the exchange to be delivered to the shareholders as specified in the exchange offer are available.

An amendment of the terms as a result of the exchange of the affected Underlying or component of the Underlying only occurs if the exchange to be made by the acquiring company specified in the exchange offer can be delivered through a central custodian or delivery agent recognized by SIX SIS AG, Derivatives linked to this Underlying can be traded, as well as if the trading of the offered shares or other rights on a securities exchange acceptable to the Issuer is possible ("Prerequisites for an Exchange").

To the extent that the exchange is exclusively in shares or shares plus a cash payment, the value of which is not greater than 67 percent of the entire exchange, the Underlyings or the components of the Underlying which are replaced by the securities offered by the exchange offer will be substituted, subject to the relevant exchange ratio. The Issuer shall, if necessary, amend the other terms of the Derivatives, in its unfettered discretion, so that the economic value of the Derivative equals, to the fullest extent possible, the economic value of the Derivative before the exchange of the shares.

To the extent that an exchange is made in cash in excess of 67 percent of the total exchange, or if the Prerequisites for an Exchange have not been fulfilled, then the Issuer must either substitute the affected Underlying or the affected components of the Underlying with another, as described above, or terminate the Derivative with effect on the Closing of the Merger. If the Issuer chooses to terminate the Derivative, then it must pay the holder of the Derivatives a cash amount in the currency of the Derivative which will be determined in the unfettered discretion of the Issuer or the Calculation Agent as the economic value of the Derivative at the time of early termination, taking into account, if applicable, the then relevant market price of the Underlying and the costs incurred by the Issuer as a result of the early termination. The cash amount is to be paid for credit five Business Days after the early termination.

cc) Delisting or termination of trading

If an Underlying or a component of an Underlying is delisted on the Relevant Exchange or trading is finally terminated and at this point in time a listing or trading exists on another securities exchange, the Issuer is entitled to designate this exchange as the relevant exchange pursuant to a notice in accordance with Section III.G.a). In the event of such a substitution, each of the references to the reference exchange in the Derivatives Terms is deemed a reference to the substitute exchange. If the Issuer decides, in its unfettered discretion, against a substitution or if a substitute exchange does not exist, then the Issuer shall amend the terms of the Derivatives, in its unfettered discretion, so that the economic value of the Derivatives after the delisting equals, to the fullest extent possible, the economic value of the Derivative before the relevant event.

C. Additional Provisions for Derivatives Based on Bonds

a) Market value of the Underlying

The "market price" is price of the bond determined by the Relevant Exchange. The Relevant Exchange is the securities exchange for the Primary Listing of the bond, subject to any contrary provision in the Final Terms for a Derivatives Series. If during the term of a Derivative, the Relevant Exchange does not determine and publish the market price for the bond on a particular day, the Issuer or the Calculation Agent, in its unfettered discretion, shall determine whether there is another securities exchange on which the Underlying is listed and which such securities exchange should be the Relevant Exchange on this date.

The "closing price" is the official closing price of the bond on a specific date determined and published on the Relevant Exchange.

For the determination of whether any barrier has been reached or breached (upwards or downwards), each market price of the bond determined on the Relevant Exchange during the Observation Period shall be authoritative.

For the determination of whether any trigger level has been reached or breached (upwards or downwards) by the bond, the closing price or, depending on the structure of the product, the Intraday price on each day during the trigger period shall be authoritative.

b) Change of the Underlying

The following events constitute extraordinary events in respect of a bond which is an Underlying or a component of an Underlying issued under this issuance program: (a) the bond is partially or fully repaid early (b) the rating of the issuer of the bond is reduced, (c) the issuer of the bond is liquidated, becomes subject to bankruptcy proceedings or threatens to enter into bankruptcy proceedings or announces that it is unable to pay its debts when due, (d) another event in respect of the issuer of the bond is threatened which may result in a payment default, (e) the issuer is restructured, (f) any suspension, termination or other restriction on trading in the bond, (g) any change in the tax treatment in respect of coupon payments on the bond, (h) the trading currency of the bond is discontinued, (i) any other event which has or could have material adverse effects on the ability of the Issuer to fulfill its obligations in respect of the Derivative or to hedge its market risks in respect of the Derivative.

The Issuer may, in its unfettered discretion, designate one or more bonds as substitutes for the affected bonds ("Substitute Bonds"). If the Issuer designates a Substitute Bond, the Issuer or the Calculation Agent must make all necessary amendments to the terms of the Derivatives which result of the substitution of the bond. The occurrence of extraordinary events the amendments and the day on which the amendments are effected ("Amendment Date") are to be notified in accordance with Section III.G.a). Every reference in the Derivatives Terms to the bond affected by the substitution is deemed, after the Amendment Date, a reference to the Substitute Bond.

D. Additional Provisions for Derivatives Based on Collective Capital Investments

a) Market price for collective capital investments

The "NAV" of a collective capital investment is the net asset value of the collective capital investment per unit, as it is published on a specific day by the administrator of the collective capital investment.

"Initial Net Asset Value" is the amount which a hypothetical investor (in the same position as the Issuer) would have to pay per unit of collective capital investment if he or she would subscribe for such a unit on the pricing date.

"Final Net Asset Value" is the amount that a hypothetical investor (in the same position as the Issuer) would receive per unit of collective capital investment, if he or she would redeem such a unit on the maturity date.

b) Change of the Underlying

The following events are exceptional events in respect of a collective capital investment which [serve] as an Underlying or component of an Underlying of a Derivative under this issuance program: (a) the dissolution, termination, liquidation, suspension, merger, division of the collective capital investment or the revocation of any license or registration of the collective capital investment (b) a change in the currency in which the net asset value of the collective capital investment is reported, (c) a material change in the investment objectives, the investment guidelines, the investment process, the management or organization of the collective capital investment is reported, provided that non-material changes are considered those that are formal or technical in nature, as well as those of marginal significance, (d) a material change in the type of the assets in which the collective capital investment invests, directly or indirectly, (e) the collective capital investment introduces a sales fee or a redemption fee or increases one of these, (f) the net asset value of the collective capital investment is not calculated or reported or other information in respect of the collective capital investment which, according to the documentation for the collective capital investment is to be reported, is not reported, (g) the net investment value audited by an accounting firm deviates from the reported net asset value or the accounting firm issues a qualified audit report or declines to provide an unqualified audit report, (h) each suspension, termination or restriction of trading in units of a collective capital investment, (i) each suspension, termination or restriction of repayments or subscriptions of units of the collective capital investment, (j) the collective capital investment requires that a holder of units in the collective capital investment redeems them in whole or in part, (k) each change in the tax or supervisory treatment in respect of the collective capital investment, the management company, the investment manager, the investment adviser or the Issuer, (l) the resignation or termination of the management company, the investment adviser or its staff, provided that non-material changes are considered those of a technical nature, as well as those with limited significance, (m) winding up, dissolution, liquidation or the loss of a license or registration of the management company, the investment manager or the investment adviser, (n) the collective capital investment, the management company, the investment manager or the investment adviser become parties to a dispute whether before a court or not, (o) any of the collective capital investment, the management company, the investment manager or the investment adviser or its employees is subject to a regulatory or criminal investigation, a criminal charge or a regulatory disciplinary measure, (p) any change or termination or any agreement between the Issuer and the collective capital investment, the management company or the investment adviser, including such agreements which have an adverse effect on the subscription or redemption of units of the collective capital investment and (q) any other event which has

or could have material adverse effects on the ability of the Issuer to fulfill its obligations in respect of the Derivative or to hedge its market risks in respect of the Derivative

E. Additional Provisions for Derivatives Based on Indexes

a) Types of indexes

Indexes represent the performance of selected financial instruments. The particular index regulations, which may be obtained from the particular index sponsor, indicate which financial instruments are part of a particular index and according to which criteria these instruments were selected. In this regard, the criteria for composition of an index may either be subject to fixed rules or the index sponsor may determine the composition of the index in its discretion. For indexes with the Zürcher Kantonalbank as index sponsor, the general index regulations may be obtained from <https://zkb-finance.mdgms.com/products/stp/classes/zkbmeinindex/index.html>. Specific information on the individual indexes with the Zürcher Kantonalbank as index sponsor may be obtained from <https://zkb-finance.mdgms.com/products/stp/service/documents/index.html>.

b) Level of the index

"Index Level" is the level of the index as it has been calculated and reported by the index sponsor, converted into the currency of the Derivative. In this regard, an index point equals the amount of a unit of the relevant currency.

"Closing Level" is official closing level of the index as it has been calculated and reported by the index sponsor, converted into the currency of the Derivative. In this regard, an index point equals the amount of a unit of the relevant currency.

For the determination of whether any barrier has been reached or breached (upwards or downwards) by the index, every reported level of the index during the term is dispositive.

For the determination of whether a trigger level has been reached or breached (upwards or downwards) by the index, the closing level of the index on each day during the trigger period is dispositive.

c) Change in the Underlying

If the Issuer determines in its unfettered discretion that the concept or calculation of the index is no longer comparable to the concept or calculation at the time of the issue of a Derivatives Series, the Issuer may amend the terms of the Derivatives in its unfettered discretion so that the value of the Derivative after the change in the index is, to the fullest extent possible equal to the value of the Derivative before the change.

In determining to what extent such a change is to be taken into account, the Issuer may, if options and future contracts on the index are traded on an exchange, take into account amendments to the contract terms of the relevant options and futures made or announced by the Relevant Exchange. The Issuer is, however, not required to do so.

F. Additional Provisions for Derivatives based on Exchange Rates

a) Exchange rate

The "Exchange Rate" (also identified as "Spot Price Currency 1/Currency 2") is the relevant Exchange Rate derived from the global foreign exchange market which, for this purpose is considered continuously open each week during the time period from Monday, 05:00 Sydney time until Friday, 17:00 New York time.

For the determination of whether any barrier has been reached or breached (upwards or downwards) by an Exchange Rate, every reported level of the Exchange Rate during the term is dispositive.

V. MODEL FINAL TERMS (FINAL TERMS)

For each Derivatives Series issued under this issuance program, the specific economic and legal terms will be specified in the Final Terms, which supplement the issuance program and together with the issuance program constitute the complete issue and listing prospectus for the individual Derivatives Series.

In Annex 4, a model is presented for the Final Terms for warrants (Annex 4a), for mini-futures (Annex 4b) and for other Derivatives (Annex 4c).

The specific Final Terms may include more definitions, terms or parameters than specified in the model.

VI. DEFINITIONS (GLOSSARY)

The following definitions of individual terms (in alphabetical order) are generally applicable to all categories of Derivatives. Different definitions may be applicable in the general derivatives terms, in the general special terms or in the Final Terms for a single Derivatives series. In case of any conflicts, the definitions, defined terms and meanings in the general specific terms take precedence over those in the General Terms and those in the Final Terms take precedence over all. If for a specific Derivatives Series terms are used which are not defined in the Derivatives Terms, the definition for the Derivatives Series in question takes the meaning that results from taking into account (i) the specifications of the relevant product type and (ii) from any applicable market practice.

"**Settlement**" is either cash settlement ("**Cash Settlement**") or physical delivery of the Underlying or a component of the Underlying ("**Physical Settlement**"), as specified in the relevant Final Terms.

"**Settlement Date**" or "**Redemption Date**" is the calendar day specified in the Final Terms for a Derivatives Series on which the payment of the Cash Settlement or physical delivery becomes due. It can, in particular for warrants, also be specified as a number of calendar days following the Exercise Date.

"**Settlement Currency**" is the currency specified in the Final Terms. If the Final Terms do not specify a specific currency, it is the currency of the relevant Derivatives Series.

"**American Style**" or "American" is a warrant which gives the bearer the right, but not the obligation, to buy from the Issuer ("Call Option") or sell to the Issuer ("Put Option") a specified quantity of a specific Underlying during the term of the warrant up to a specified time at an agreed price ("Exercise Price"). If Cash Settlement has been agreed, the closing price of the Underlying on the Exercise Date is relevant for the determination of the Cash Settlement Amount.

"**Initial Fixing Date**" is the calendar day specified in the Final Terms for a Derivatives Series or, if this day is not a Trading Day, the next Trading Day, if, in the judgment of the Issuer or the Calculation Agent, a Market Disruption Event has not occurred. If on this day, in the judgment of the Issuer or the Calculation Agent, a Market Disruption Event has occurred, the Initial Fixing Date is the next Trading Day on which, in the judgment of the Calculation Agent, a Market Disruption Event is no longer subsisting. If the next Trading Day without a Market Disruption Event in respect of the Underlying does not occur by the eighth Trading Day immediately following the date which would have been the Initial Fixing Date in the absence of the occurrence of the Market Disruption Event, then (1) this eighth Trading Day shall be the Initial Fixing Date regardless of the Market Disruption Event and (2) the Issuer or the Calculation Agent shall determine the Reference Value for the Initial Fixing Day by determining the reference price as of the Initial Fixing Date by specifying the price or level that the Underlying would have had on this eighth Trading Day in the absence of the occurrence of a Market Disruption, taking into account the market conditions prevailing at this point in time, the last reported, published or recorded level or price of the Underlying and, if applicable, each individual security included in the Underlying, as well as, in its opinion, other significant factors.

"**Initial Fixing Level**" or "**Initial Fixing Value**" is, subject to potential adjustments pursuant to the Derivatives Terms and the provisions in the definition of "Initial Fixing Date, an amount as calculated by the Issuer or the Calculation Agent from the Reference Value determined on the Initial Fixing Date, subject to any corrections published later.

"**Issue Date**" is the calendar day specified in the relevant Final Terms or if this day is not a Business Day, the next Business Day.

"**Exercise Date**" is, in the case of Derivatives, the Business Day on which the Exercise Notice to the Issuer pursuant to III.E.b)aa)(ii) and III.E.b)bb)(i) of this issuance program is effective; in the case of Derivatives with automatic exercise, the maturity date.

"**Exercise Notice**" is the exercise notice described in Sections III.E.b)aa)(ii) and III.E.b)bb)(i) of this issuance program.

"**Cash Settlement Amount**" is the amount defined as such in the Final Terms, expressed as fixed amount, as percentage of the Nominal Value or par value or as an amount to be determined by the Issuer or the Calculation Agent on the basis of a formula. The Cash Settlement Amount will be converted into the Settlement Currency at the Exchange Rate on the Business Day immediately after the Final Fixing Date or, if this day is not a Business Day, the immediately following date that is a Business Day. The Cash Settlement Amount will be rounded to two decimal places, provided that 0.005 is rounded down.

"**Underlying**" is the reference asset specified in the Final Terms for a Derivatives Series.

"**Observation Times**" are the points in time specified in the Final Terms.

"**Observation Period**" is, in relation to any Derivatives Series, the period of time from (and including) the Issue Date until (and excluding) the first Observation Time, as well as, if several Coupons are paid, each period of time from (and including) the relevant interest payment date until (and excluding) the next following interest payment date and, if interest must be calculated for a period of time which does not end on the relevant interest payment date (and does not include it), then the period of time from an including the immediately preceding interest payment date (or if none, from the Issue Date) until (and excluding) the relevant payment date.

"**Calculation Agent**" is, subject to a contrary provision in the relevant Final Terms, Zürcher Kantonalbank.

"**Clearing System**" is SIX SIS AG, and any other clearing system approved by the Issuer and disclosed (each a "**Clearing System**" and together the "**Clearing Systems**").

"**Composite**" identifies a Derivative for which the currency of the Derivative and the currency of the Underlying or a component of the Underlying are not the same and the investor is not hedged against the risk resulting from this fact. Any conversions of market prices for an Underlying into the currency of the Derivative are made at current Exchange Rates. To the extent that the description of the Derivative does not expressly use the term "**Quanto**" or "**Quanto-Derivative**", all Derivatives issued under this issuance program for which the currency of the Derivative and the currency of the Underlying or a component of the Underlying are not the same, are not hedged against exchange rate risk, even if the relevant Derivatives Series is not identified as "Composite".

"**Corporate Actions**" are events which have a dilution or concentration effect on the value of a share, such as, e.g., (a) distributions of unusually high dividends, bonuses or other cash distributions, as well as dividends, which are not paid in accordance with the regular dividend policy or which are not declared as regular dividends by the Issuer of the shares (e.g., special dividends or anniversary bonuses), (b) the granting of subscription rights, (c) capital increases from company funds, (d) capital reductions through the reduction of the par value of the shares for purposes of returning share capital to the shareholders, (e) a split or reverse split of the share, (f) the spin-off of a part of the company in a manner that creates an independent entity or if that part of the business is acquired by a third-party business or (g) another event with similar effect on the value of a share.

"**Coupon**" is interest, payable on the Nominal Value of the Derivative. The Coupon provides a maximum return per Derivative for the time period from the Issue Date until the Settlement Date. The Coupon may have interest and capital gains components.

"**Minimum Coupon**" means a minimum interest, payable on the Nominal Value of the Derivative. The Minimum Coupon provides a minimum return per Derivative for the period between the Issue Date and the Settlement Date.

"**Coupon Date**" is the calendar date or dates specified in the Final Terms for a Derivatives Series or, if one of these days is not a Business Day, the next following Business Day.

"**Day Count Fraction**" means the day count fraction 30/360. This means that a year with 360 days and 12 months of 30 days each will be applied. The 31st day of a month is treated as the 30th. February also counts with 30 days, unless the last day of the Determination Period is the last day of February.

"**Derivatives**" means the book-entry securities of linked to Underlyings issued under this issuance program by an Issuer, the relevant issued Derivatives of a series, the "**Derivatives Series**" and the individual book-entry security, a "**Derivative**". The term "Structured Product" is used in this issuance program or in the Final Terms for a Derivatives Series as a synonym for a derivative.

A "**Digital Option**" or "**Binary Option**" may have exactly two payout profiles. In the case of a "Cash-or-Nothing Warrant", a fixed amount will be paid if the Underlying at the end of the term (in the case of an "American Style" warrant, during the term) is above (Digital Call) or below (Digital Put) a predefined exercise price, otherwise it expires worthless. An "Asset-or-Nothing Warrant" differs in that instead of the payment of a fixed amount, the delivery of the Underlying or the payment of the price of the Underlying is made. In the case of a "One-touch Warrant", it depends on whether it is "in-the-money" at specified points in time during the term of the product.

"**Final Fixing Level**" or "**Final Fixing Value**" is, subject to any amendments in accordance with the Derivatives Terms and the provisions in the definition of Final Fixing Date, an amount in the amount of the Reference Value determined by the Calculation Agent on the Final Fixing Date, regardless of any later reported corrections.

"**Final Fixing Date**" means the calendar day specified in the Final Terms of a Derivatives Series or, if this day is not a Business Day, the next Business Day, if in the judgment of the Calculation Agent a Market Disruption Event has not occurred. If on this day a Market Disruption Event has occurred, the Final Fixing Day is the next Trading Day, on which a Market Disruption Event is no longer continuing. If the next Trading Day without a Market Disruption Event does not occur by the eighth Trading Day immediately following the day which would have been the Final Fixing Day in the absence of a Market Disruption Event having occurred, then (a) this eighth Trading Day shall be the Final Fixing Date regardless of the Market Disruption Event and (b) the Issuer or the Calculation Agent shall determine the Reference Value for the Final Fixing Day by determining the reference price as of the Final Fixing Date by specifying the price or level that the Underlying would have had on this eighth Trading Day in the absence of the occurrence of a Market Disruption, taking into account the market conditions prevailing at this point in time, the last reported, published or recorded level or price of the Underlying and, if applicable, each individual security included in the Underlying, as well as, in its opinion, other significant factors.

"**European Style**" or "**European**" is a warrant which gives the Holder of a specified number of warrants the right, but not the obligation, to buy from ("Call-Option") or sell to ("Put-Option") the Issuer a specified quantity of specified Underlying at the end of the term of the warrant (Exercise Date = maturity) for an agreed price ("Exercise Price"). If Cash Settlement has been agreed, the closing price of the Underlying on the Exercise Date is relevant for the determination of the Cash Settlement Amount.

"**Business Day**" or "**Bank Working Day**" means a day (except for Saturday and Sunday), on which business banks and currency markets in Zurich settle payments and are open for business (including the trading of currencies and foreign currency deposits) and on which all clearing systems are open for business and, if applicable, for purposes of payment transactions in Euro, a day, on which the Trans-European Automated Real-Time Gross Settlement Express Transfer (TARGET2) System is operating.

"**Creditor**" or "**Holder**" of a Derivative means the person who is the creditor of the right to claim payment from the Issuer under the Derivative under Swiss law.

"**Creditor Expenses**" means all taxes, charges and or/costs, including if applicable custody charges, transaction or exercise costs, stamp duties, turnover tax, issue, admission, transfer taxes or charges and/or other taxes or charges or charges in connection with (i) the exercise of the relevant Derivative and/or (ii) a payment or the delivery of Underlyings which will become due upon the exercise of the Derivative or otherwise.

"**Trading Day**" is a day on which the Relevant Exchange for an Underlying or of a component of the Underlying, to the extent this is an exchange or a trading system which is open for trading during regular trading hours; and, to the extent the Relevant Exchange is not a securities exchange or trading system, a Business Day, except for days on which business banks and currency markets in the country in which the Relevant Exchange is located, are closed.

"**Highest Amount**" or "Cap" is, if applicable, the maximum Cash Settlement Amount specified in the relevant Final Terms, which is owed in respect of the relevant Derivative on the Settlement Date (increased, if applicable, by a bonus amount).

"**Highest Amount Factor**" is, if applicable, the amount in the Final Terms specified as a percentage of the nominal amount of the relevant Derivative which on the Settlement Date is the maximum Cash Settlement Amount which is owed (increased, if applicable, by a bonus amount).

„**CISA**“ is the abbreviation for the Federal Law on Collective Capital Investments of 23 June 2006 (Kollektivanlagegesetz, CISA) (as per 1 March 2013), SR 951.31.

"**Knock-in Level**" is the value specified in the Final Terms for a Derivatives Series which must be reached during the Observation Period in order for the exercise rights under a down-and-in option component or an up-and-in option component of certain categories of Derivatives can be exercised.

"**Knock-Out Level**" is the value specified in the Final Terms for a Derivatives Series which must be reached during the Observation Period in order for the exercise rights under a down-and-out option component or an up-and-out option component of certain categories of Derivatives can be exercised.

"**Market Disruption**" is any event which is identified in Section IV.A.c) or in the relevant Final Terms as a Market Disruption Event.

"**Minimum Redemption Amount**" or "**Floor**" is, if applicable, the minimum Cash Settlement Amount specified in the Final Terms which on the Settlement Date is owed in respect of the relevant Derivative (increased, if applicable, by a bonus amount).

"**Minimum Repayment Factor**" is, if applicable, the amount in the Final Terms specified as a percentage of the nominal amount of the relevant Derivative which on the Settlement Date is the minimum Cash Settlement Amount which is owed (increased, if applicable, by a bonus amount).

"**Nominal Value**" means, subject to possible amendments in accordance with the Derivatives Terms, the nominal value of a Derivative of a Derivatives Series.

"**Primary Listing**" means the first listing of a participating security, a bond or a Derivative on an official exchange.

"**Quanto**" is used in the product name if the currency of a Derivative and the currency of the Underlying or a component of the Underlying are not the same and the investor is hedged against the resulting Exchange Rate risk. Such a Derivative is also identified as a "Quanto Derivative". The redemption methods are modified in such a way that a change in the Exchange Rate between the relevant currencies does not have any influence on the redemption, but just on the relative performance of the Underlying in its reference currency. It should be noted that the difference between the two currencies during the term of the Derivative influence the fair value of the Derivative. If the interest level of the currency of the Underlying or components of the Underlying is lower than the interest level of the currency of the Derivative, the fair value of the Derivative decreases.

"**Reference Exchange**" means with respect to the Underlying the reference exchange(s) specified in the Final Terms, or each successor of such a Reference Exchange, as accepted and specified by the Calculation Agent. To the extent that a Reference Exchange is not listed in the Final Terms, the Reference Exchanges listed in this issuance program for the relevant type of Underlying shall apply.

"**Reference Currency**" is the currency specified in the Final Terms.

"**Reference Value**" is, with respect to a day, subject to any amendments in accordance with the Derivatives Conditions, an amount (to be considered a monetary equivalent in the Settlement Currency or Reference Currency) in the amount of the closing price of the Underlying or a component of the Underlying, as reported by the Reference Exchange and determined by the Calculation Agent.

"**SIX SIS AG**" is the clearing system, which is located at Baslerstrasse 100, 4600 Olten, Switzerland.

"**Symbol**" means the symbol that corresponds to the relevant Swiss securities number for listed Derivatives. The Symbol is generated by the Issuer or the Lead Manager and agreed with Telekurs.

"TER" is the abbreviation for the Total Expense Ratio (TER). The TER specifies the production and distribution costs that have been charged in the product. One-off costs are spread over the entire term when calculating the TER. If the effective holding period of the structured product differs from the actual product term, the TER may differ. Zürcher Kantonalbank does not indicate the cost as a range, but instead states the specific cost for the product in question.

"**Associated Entity**" means a legal entity under direct or indirect control of the Zürcher Kantonalbank or which directly or indirectly controls the Zürcher Kantonalbank or which is under common control together with the Zürcher Kantonalbank. The determining factor for the interpretation of the terms "**Control**" and "**to control**" is a majority of the voting rights in the legal entity or the Zürcher Kantonalbank.

"**Exchange Rate**" means, with respect to the Underlying and any relevant date, the Exchange Rate at the specified time on that date and for each currency pair (or at a time as close as possible as fixed by the calculation) between the Reference Currency and the Settlement Currency (indicated as a number of units or fractions of units of the Reference Currency which show the corresponding value of a unit of the Settlement Currency), which will be determined at this time by the Calculation Agent in accordance with sources which it considers, in its reasonable judgment, to be appropriate.

"**Paying and Exercise Agent**" is, subject to any contrary provisions in the relevant Final Terms, Zürcher Kantonalbank.

VII. RESPONSIBILITY FOR THE ISSUANCE PROGRAM

Zürcher Kantonalbank accepts responsibility for the content of this issuance program and hereby states that to its knowledge the statements in this issuance program are accurate and no significant circumstances have been omitted.

Zürcher Kantonalbank Finance (Guernsey) Limited accepts responsibility for the content of this issuance program and hereby states that to its knowledge the statements in this issuance program, to the extent that they relate to Zürcher Kantonalbank Finance (Guernsey) Limited, are accurate and no significant circumstances have been omitted.

ZÜRCHER KANTONALBANK FINANCE (GUERNSEY) LIMITED

DIRECTORS' REPORT

The directors submit their report and the audited financial statements for the year ended 31 December 2012.

Activities

The principal activity of Zürcher Kantonalbank Finance (Guernsey) Limited ("the company") is to carry on business as a finance company and to borrow or raise money by the issue of financial instruments of whatsoever nature.

Results

The results of the company are shown in the Statement of Comprehensive Income on page 3.

Dividend

The directors do not recommend the payment of a dividend.

Directors

The directors of the company are those listed in the Company Information.

Statement of directors' responsibilities in respect of the financial statements

The directors are responsible for preparing the financial statements in accordance with applicable Guernsey Law and generally accepted accounting principles.

Guernsey Company Law requires the directors to prepare financial statements for each financial year which give a true and fair view of the state of affairs of the company and of the profit or loss of the company for that period. In preparing those financial statements, the directors should:

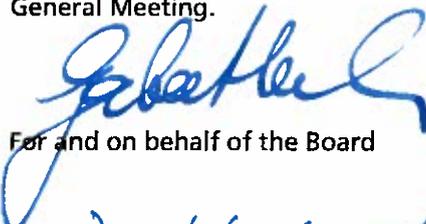

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the company will continue in business.

The directors are responsible for keeping proper accounting records that disclose with reasonable accuracy at any time the financial position of the company and to enable them to ensure that the financial statements comply with the Companies (Guernsey) Law, 2008. They are also responsible for safeguarding the assets of the company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

So far as each of the directors is aware, there is no relevant audit information of which the company's auditor is unaware, and each has taken all the steps he ought to have taken as a director to make himself aware of any relevant audit information, and to establish that the company's auditor is aware of that information.

Auditors

A resolution to reappoint Ernst & Young LLP as auditors will be put to the members at the Annual General Meeting.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF ZÜRCHER KANTONALBANK FINANCE (GUERNSEY) LIMITED

We have audited the financial statements of Zürcher Kantonalbank Finance (Guernsey) Limited for the year ended 31 December 2012 which comprise the Statement of Comprehensive Income, the Statement of Financial Position, the Statement of Changes in Equity, the Statement of Cash Flows and the related notes 1 to 17. The financial reporting framework that has been applied in their preparation is applicable law and International Financial Reporting Standards (IFRSs) as adopted by the European Union.

This report is made solely to the company's members, as a body, in accordance with Section 262 of the Companies (Guernsey) Law, 2008. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

Respective responsibilities of directors and auditors

As explained more fully in the Directors' Responsibilities Statement set out on page 1, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view. Our responsibility is to audit and express an opinion on the financial statements in accordance with applicable law and International Standards on Auditing (UK and Ireland). Those standards require us to comply with the Auditing Practices Board's Ethical Standards for Auditors.

Scope of the audit of the financial statements

An audit involves obtaining evidence about the amounts and disclosures in the financial statements sufficient to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or error. This includes an assessment of: whether the accounting policies are appropriate to the company's circumstances and have been consistently applied and adequately disclosed; the reasonableness of significant accounting estimates made by the directors; and the overall presentation of the financial statements. In addition, we read all the financial and non-financial information in the annual report to identify material inconsistencies with the audited financial statements. If we become aware of any apparent material misstatements or inconsistencies, we consider the implications for our report.

Opinion on financial statements

In our opinion the financial statements:

- give a true and fair view of the state of the company's affairs as at 31 December 2012 and of its net income for the year then ended;
- have been properly prepared in accordance with IFRSs as adopted by the European Union; and
- have been prepared in accordance with the requirements of the Companies (Guernsey) Law, 2008.

Matters on which we are required to report by exception

We have nothing to report in respect of the following matters where the Companies (Guernsey) Law, 2008 requires us to report to you if, in our opinion:

- proper accounting records have not been kept; or
- the financial statements are not in agreement with the accounting records; or
- we have not received all the information and explanations we require for our audit.

ZÜRCHER KANTONALBANK FINANCE (GUERNSEY) LIMITED
NOTES TO THE FINANCIAL STATEMENTS
For the year ended 31 December 2012

1 Corporate information

Zürcher Kantonalbank Finance (Guernsey) Limited ("the company") is a finance company and borrows or raises money by the issue of financial instruments of whatsoever nature. The company was incorporated and is registered in Guernsey with the registered office being at Regency Court, Glatigny Esplanade, St Peter Port, Guernsey, GY1 3AP.

2 Principal accounting policies

The following accounting policies have been applied consistently in dealing with items which are considered material in relation to the financial statements of the company.

Basis of preparation

The financial statements have been prepared under the historical cost convention as modified by the revaluation to fair value through profit or loss of derivative financial instruments, over-the-counter (OTC) options, securities, term deposits with banks and financial liabilities and in accordance with International Financial Reporting Standards ("IFRS") as adopted by the European Union.

Statement of compliance

The financial statements of the company have been prepared in accordance with IFRS as adopted by the European Union.

Standards, interpretations and amendments issued but not yet effective

At the date of authorisation of these financial statements, the following relevant standards and interpretations, which have not been applied, were in issue but not yet effective:-

IAS 1: Presentation of Items of Other Comprehensive Income - Amendments to IAS 1. The amendments change the grouping of items presented in other comprehensive income. The standard is effective for annual periods beginning on or after 1 July 2012. The company expects no impact from the adoption of the amendments on its financial position or performance.

IFRS 7: Financial Instruments: Disclosures - Offsetting Financial Assets and Financial Liabilities (Amendment). The amendments require an entity to disclose information about rights of set-off and related arrangements (e.g., collateral agreements). The disclosures would provide users with information that is useful in evaluating the effect of netting arrangements on an entity's financial position. The standard is effective for annual periods beginning on or after 1 January 2013. The company expects no impact from the adoption of the amendments on its financial position or performance.

IFRS 9: Financial Instruments - Classification and Measurement. The standard reflects the first phase of the replacement of IAS 39 and applies to classification and measurement of financial assets and financial liabilities as defined in IAS 39. The standard is effective for annual periods beginning on or after 1 January 2015. In subsequent phases, IASB will address hedge accounting and impairment of financial assets. The company expects no impact from the adoption of the amendments on its financial position or performance.

IFRS 10: Consolidated Financial Statements (Amendment). The standard provides an exception to consolidation requirements for entities that meet the definition of an investment entity. The exception to consolidation requires investment entities to account for subsidiaries at fair value through profit or loss in accordance with IFRS 9. The standard is effective for annual periods beginning on or before 1 January 2014. At present no assessment has been made by the company of the impact from the adoption of the amendments on its financial position or performance.

IFRS 11: Joint Arrangements. The standard provides a more realistic reflection of joint arrangements by focusing on the rights and obligations of the arrangement rather than its legal form. The standard is effective for annual periods beginning on or after 1 January 2013. The company expects no impact from the adoption of the amendments on its financial position or performance.

IFRS 12: Disclosure of Interests in Other Entities. The standard includes disclosure requirements for all forms of interests in other entities, including joint arrangements, associates, special purpose vehicles and other off balance sheet vehicles. The standard is effective for annual periods beginning on or after 1 January 2013. The company expects no impact from the adoption of the amendments on its financial position or performance.

IFRS 13: Fair Value Measurement. The standard improves consistency and reduces complexity by providing a precise definition of fair value and a single source of fair value measurement and disclosure requirements for use across IFRS. The standard is effective for annual periods beginning on or after 1 January 2013. The company expects no impact from the adoption of the amendments on its financial position or performance.

There are no other standards, interpretations or amendments to existing standards that are not yet effective that would be expected to have a significant impact on the company's financial position or performance. The directors have adopted a policy of applying new standards and interpretations when they become effective.

Changes in accounting policies and disclosures

The accounting policies adopted are consistent with those of the previous financial year. Amendments to IFRS resulting from the following new and amended standards and interpretations did not have any impact on the accounting policies, financial position, or performance of the company:

IFRS 7: Financial Instruments: Disclosures - Transfers of Financial Assets (Amendment) - effective for annual periods beginning on or after 1 July 2011.

IAS 12: Deferred Tax: Recovery of Underlying Assets (Amendment) - effective for annual periods beginning on or after 1 January 2012.

Cash and cash equivalents

Cash and cash equivalents, as referred to in the statement of cash flows, comprises of cash in hand, current accounts with banks and amounts due from banks on demand or with an original maturity of three months or less.

Reverse repurchase (reverse repo) agreements

The company has entered into secured reverse repurchase (reverse repo) agreements which are recognised in the statement of financial position as financial assets designated at fair value through profit or loss. The deposits are backed by collateral in the form of securities which are held with a third party, and are not shown on the statement of financial position. This accurately reflects the financial nature of the transactions.

Foreign exchange

Assets and liabilities denominated in foreign currencies are translated into Swiss francs based on the rates of exchange ruling at the statement of financial position date. Foreign currency transactions during the period are translated at the rates of exchange ruling at the date of the transactions. Foreign exchange gains and losses are included in the statement of comprehensive income.

The Swiss franc is the functional and presentational currency of the company, as it is of Zürcher Kantonalbank, the parent company. Also, a significant proportion of the company's transactions is done in Swiss francs.

ZÜRCHER KANTONALBANK FINANCE (GUERNSEY) LIMITED
NOTES TO THE FINANCIAL STATEMENTS
For the year ended 31 December 2012

2 Principal accounting policies (continued)

Investment income

Investment income comprises of interest receivable on the maturity of the company's term deposits with banks. Interest income is recognised as it accrues.

Provisions

Provisions are recognised when the company has a present obligation (legal or constructive) as a result of a past event, and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

Financial instruments designated at fair value through profit or loss - initial recognition, derecognition and subsequent measurement

The company recognises a financial asset or a financial liability when, and only when, it becomes a party to the contractual provisions of the instrument. Purchases and sales of financial instruments, over-the-counter options, securities and term deposits with banks are recognised on the trade date and are initially designated and measured at fair value through profit or loss consistent with the company's documented risk management strategy.

Financial instruments, over-the-counter options, securities and term deposits with banks are derecognised when the maturity date or final fixing date has expired and the rights to receive cashflows or meet obligations has passed. Gains and losses on maturity are recognised in net trading income in the statement of comprehensive income.

The financial instruments, over-the-counter options, securities, reverse repurchase agreements and term deposits with banks are subsequently valued according to the fair value principle. Changes in fair value are recorded in net gains or losses on financial assets and liabilities designated at fair value through profit or loss.

The accrued interest receivable and payable, prepayments and accrued expenses at the year end are valued according to the fair value principle.

Fair value of financial instruments

The fair value of financial instruments traded in active markets at statement of financial position date is based on their quoted market price (offer price for share options and bid price for other financial instruments). Where the fair values of financial assets and liabilities recorded in the statement of financial position cannot be derived from active markets, they are determined using a variety of valuation techniques that include the use of mathematical models.

The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. The judgements include considerations of liquidity and model inputs such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported value of financial instruments. The models are calibrated regularly and tested for validity using prices from any observable current market transactions in the same instrument (without modification or repackaging) or based on any available observable market data.

Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously. This is not generally the case with master netting agreements, and the related assets and liabilities are presented gross in the statement of financial position.

Financial assets held to maturity and bonds payable

After initial recognition at fair value plus attributable transaction costs, financial assets held to maturity and bonds payable are subsequently measured at amortised cost using the effective interest rate method. Gains and losses are recognised in the statement of comprehensive income when either the assets and liabilities are derecognised or through the amortisation process.

Amortised cost is computed using the effective interest rate method less any allowance for impairment and principal repayment or reduction. The calculation takes into account any premium or discount on acquisition and includes transaction costs and fees that are an integral part of the effective rate.

Impairment of financial assets

The company assesses at each statement of financial position date whether there is any objective evidence that a financial asset or a group of financial assets is impaired. A financial asset or a group of financial assets is deemed to be impaired if, and only if, there is objective evidence of impairment as a result of one or more events that has occurred after the initial recognition of the asset (an incurred 'loss event' or 'events') which has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated.

3 Taxation

With effect from 1 January 2008, Guernsey abolished the exempt company regime. The company is taxed at the company standard rate (0%) from that date.

4 Net trading income

	Year ended 31 December 2012 CHF	Year ended 31 December 2011 CHF

13 Fair value of financial instruments

The following tables show financial instruments recognised at fair value, analysed between those whose fair value is based on:-
- Quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1);
- Those involving inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices) (Level 2); and
- Those with inputs for the asset or liability that are not based on observable market data (unobservable inputs) (Level 3).

Derivative financial instruments held at fair value through profit or loss	(209,122,312)	-	(209,122,312)	-
Financial liabilities held at fair value through profit or loss	(3,684,657,074)	-	(3,684,657,074)	-

The fair values of securities are based on market prices which are available in active markets. The fair value of such securities is included within Level 1.

The fair values of term deposits with banks are calculated using a bank discount rate on an interest curve interpolated from market data. The fair value of such term deposits with banks is included within Level 2.

The fair values of over-the-counter options are calculated using an option pricing model based on direct market data, e.g., bond or share prices, and indirect market data, e.g., interest, implied volatility and dividend estimates. The fair value of such over-the-counter options is included within Level 2.

The fair values of interest rate swaps are calculated using a bank discount rate on an interest curve interpolated from market data. The fair value of such interest rate swaps is included within Level 2.

The fair values of structured products, which are set up as combinations of the components of the respective structured product, are calculated based on the sum of the valuations of its components. As the fair values of the components of the structured products are either Level 1 (securities) or Level 2 (term deposits with banks, over-the-counter options and interest rate swaps), the fair value of such structured products is included within Level 2.

ZÜRCHER KANTONALBANK FINANCE (GUERNSEY) LIMITED
NOTES TO THE FINANCIAL STATEMENTS
For the year ended 31 December 2012

14 Risk management and policies

The company's financial products comprise of term deposits, money market assets, securities, options and various types of derivative instruments, cash and liquid resources and various other items that arise directly from its operations.

14.1 Risk management framework

The directors have included information in the notes to the financial statements which discloses the market risk sensitivity analysis which is performed by the parent company Zürcher Kantonalbank, and is appropriate to the nature of the company's business and the market risks to which it is subject, in accordance with the requirements of IFRS 7. The company's directors and the company's management use sensitivity analysis as described in note 14 of this report to evaluate the nature and extent of risks arising from financial instruments.

The main risks arising from the company's financial products are credit risk, liquidity risk and market risk. The directors review and agree policies for managing each of these risks and they are summarised below. The directors approved new risk management guidelines for the company on 17 June 2011. The document sets out guidelines for identifying, managing and monitoring default, liquidity and market risks to which the company is exposed.

In particular, the document:

- i) defines the rules and procedures for managing default, liquidity and market risks;
- ii) sets out the applicable long-term risk policies of the company and Zürcher Kantonalbank;
- iii) defines the entity to which duties and responsibilities in relation to risk management are assigned;
- iv) defines the entity to which duties and responsibilities in relation to risk monitoring are assigned;
- v) provides an overview of relevant powers and responsibilities.

The general guidelines are:

- i) Default, liquidity and market risks shall be managed in accordance with the rules and policies laid down in the Guidelines on Risk Management at Zürcher Kantonalbank, and Group risk policies.
- ii) Subject to the constraints of the applicable Group risk policies, the company shall define appropriate limits with a view to mitigating default and market risks.
- iii) Zürcher Kantonalbank shall be responsible for managing risks subject to approved limits.
- iv) Zürcher Kantonalbank shall be responsible for quantifying risk, preparing reports on risk monitoring conducted, and reporting on risks.
- v) The directors of the company shall be entitled to limit the level of risk exposure and the list of approved products at any time.

The management of risks within the limits in sections 14.1 a), b), c), and d), has been delegated to Zürcher Kantonalbank.

With regard to risk monitoring, the Chief Executive Officer (CEO) of the company is responsible for:

- i) monitoring liquidity and solvency of the company and informing the directors of any issues arising or exceptional events;
- ii) monitoring adherence to risk limits and informing the directors in the event of a limit breach;
- iii) defining actions to be taken in case of limit breaches;
- iv) informing the directors of actions defined; and
- v) documenting limits, limit breaches and actions defined.

Risk measurement, preparation of risk monitoring reports and risk reporting have been delegated to Zürcher Kantonalbank. To ensure a constant monitoring of risk by the company's management, a risk report is prepared by Zürcher Kantonalbank on a daily basis and is sent to the management of the company.

One of the major changes made in 2011 was the replacement of the Value-at-Risk methodology, with sensitivity limits, volume limits, credit spread limits and loss limits as described in the risk management guidelines. The following sections detail the limit types, methods used for exposure calculation and exposures as per year end.

14.1 a) Sensitivity limits ("Delta limits")

The directors of the company define sensitivity limits for interest rate, foreign currency and default risks, which are calculated on a daily or weekly basis.

Interest rate

An interest rate sensitivity limit of +/- CHF 100,000 means that the current Rho exposure must not exceed CHF 100,000 per basis point. Rho is the derivative of the option value with respect to the risk free interest rate for the relevant outstanding term, and is expressed as the amount of money, per share of the underlying, that the value of the option will gain or lose as the risk free interest rate rises or falls by one basis point.

	Limit	Limit status	Value 31.12.12	Value 31.12.11
Additional information on interest rate risk: table 14.4 a)	+/- CHF 100,000	ok	(29,773)	16,421

Foreign exchange sensitivity limit per CHF 0.01

The foreign exchange sensitivity limit of +/- CHF 1,000,000 means that the effect of our foreign exchange exposure must not cause a profit or loss of greater than CHF 1,000,000. The calculation of foreign exchange sensitivity is performed by Zürcher Kantonalbank (Risk Control Department). The amount disclosed means the effect on profit or loss when the Swiss Franc FX-rates move by 1%.

	Limit	Limit status	Value 31.12.12	Value 31.12.11
Additional information on foreign exchange rate risk: table 14.4 b)	+/- CHF 1,000,000	ok	1,790	1,591

Default risk sensitivity limits: Credit risk money markets

Credit risk money markets relates to the daily change of synthetic portfolio hedging, i.e. a portfolio of credit default swaps (CDS) with reference to named money market counterparties. The sensitivity limit defines the maximum profit and loss daily change limit permitted on the theoretical hedging costs on the Guernsey Risk Manager portfolio.

The credit risk money markets limit of +/- CHF 1,000,000 means that the current credit delta exposure on money market investments must not exceed CHF 1,000,000 per credit point.

	Limit	Limit status	Value 31.12.12	Value 31.12.11
Additional information on money market exposure: table 14.2 c)	+/- CHF 1,000,000	ok	(244,000)	(2,638,000)

ZÜRCHER KANTONALBANK FINANCE (GUERNSEY) LIMITED
NOTES TO THE FINANCIAL STATEMENTS
For the year ended 31 December 2012

14 Risk management and policies (continued)

14.1 a) Sensitivity limits ("Delta limits") (continued)

Default risk

Credit risk others refer to bonds and reverse repurchase agreements, and is related to daily changes of the Z-Spread. The sensitivity limit defines the maximum profit and loss daily change limit permitted on the theoretical hedging costs on the Guernsey Risk Manager portfolio.

The credit risk others limit of +/- CHF 5,000,000 means that the current credit delta exposure on bonds and reverse repurchase agreements must not exceed CHF 5,000,000 per credit point.

Additional information on the company's exposure: tables 14.2 d)	Limit +/- CHF 5,000,000	Limit status ok	Value 31.12.12 366,514	Value 31.12.11 467,102
--	----------------------------	--------------------	---------------------------	---------------------------

14.1 b) Entity volume limits for funds invested with third parties

The directors define maximum volumes for each counterparty with a view to mitigating the risk of default on investments with third parties (money market investments and reverse repurchase agreements). The directors may lower the limits defined for the company at any time.

Exposure of term deposits and money market assets with corresponding counterparty limits are disclosed in table 14.2 c).

14.1 c) Entity volume limits and counterparty limit monitoring for securities investments

The directors have defined minimum credit ratings and maximum permitted volumes per issuer for each rating category with a view to mitigating the default risk associated with securities (bonds, Pfandbriefe, etc).

Volume limits per counterparty must not exceed Group policy. Counterparty volume limits for securities investments are:

	Limit CHF	Limit Status
Total Limit	1,500,000,000	ok
Counterparty Limits AAA	100,000,000	ok
Counterparty Limits AA	50,000,000	ok
Counterparty Limits A	30,000,000	ok
Counterparty Limits BBB or lower	-	ok

Additional information on the company's exposure: table 14.2 d) i)

14.1 d) Credit spread limit (DV01) and loss limit

The directors have defined the maximum credit spread sensitivity (DV01) per issuer with a view to mitigating the credit risk associated with securities and a maximum daily loss limit. DV01 is the sensitivity of a contract to a 1 basis point fluctuation in the credit spread curve.

The DV01 limit is CHF 35,000 per issuer. At 31 December 2012, the potential loss per issuer was within the prescribed limit.

The maximum daily loss limit is CHF 5,000,000. At 31 December 2012, the potential daily loss was CHF 366,514, and within the prescribed limit.

14.2 Credit risk

Definition: Credit risk is the risk that a counterparty will be unable or unwilling to meet a commitment that it has entered into with the company.

Zürcher Kantonalbank manages counterparty credit risk at a group level to optimise the use of credit availability and to avoid excessive risk concentration. The company's policy is that all credit facilities are entered into with group approved banks with an appropriate credit rating. The Standard & Poor's long term deposits ratings at 31 December 2012 are shown in the note below.

With respect to credit risk arising from the financial assets of the company, which comprise of term deposits, money market assets, reverse repurchase agreements, securities, debtors and various types of derivative instruments, the company's exposure to credit risk arises from default of the counterparty, with a maximum exposure equal to the carrying amount of these instruments.

The company's management team and directors receive regular reports on any credit exposure.

14.2 a) Financial assets held to maturity

As at 31 December 2012:	Value at 31 December 2012	Rating	%
Bonds receivable	8,000,000	AAA	100.00%
Total	<u>8,000,000</u>		<u>100.00%</u>
As at 31 December 2011:	Value at 31 December 2011	Rating	%
Bonds receivable	13,000,000	AAA	100.00%
Total	<u>13,000,000</u>		<u>100.00%</u>

14.2 b) Reverse repurchase (reverse repo) agreements

The company has entered into secured reverse repurchase (reverse repo) agreements. The securities held as collateral are held by a third party agent.

	31 December 2012 CHF	31 December 2011 CHF
Book value of cash collateral due for securities borrowed in connection with reverse repurchase agreements	750,000,000	250,000,000
Fair value gains	181,192	35,831
At fair value	<u>750,181,192</u>	<u>250,035,831</u>
Fair value of securities with unrestricted right to resell or repledge, held by third parties as collateral in connection with reverse repurchase agreements	818,035,712	260,314,409
	<u>818,035,712</u>	<u>260,314,409</u>

ZÜRCHER KANTONALBANK FINANCE (GUERNSEY) LIMITED
NOTES TO THE FINANCIAL STATEMENTS
For the year ended 31 December 2012

14 Risk management and policies (continued)

14.2 c) Term deposits and money market assets

As at 31 December 2012:	Total internal limit	Deposits at 31 December 2012	Rating	%
Term deposits	-	-	AAA	0.00%
Term deposits	350,000,000	-	AA	0.00%
Term deposits	1,350,000,000	326,906,332	A	70.77%
Term deposits	165,000,000	134,990,225	BBB	29.23%
Total	1,865,000,000	461,896,557		100.00%
As at 31 December 2011:	Total internal limit	Deposits at 31 December 2011	Rating	%
Term deposits	200,000,000	12,139,000	AAA	1.32%
Term deposits	1,500,000,000	726,557,783	AA	78.92%
Term deposits	900,000,000	181,885,370	A	19.76%
Term deposits	65,000,000	-	BBB	0.00%
Total	2,665,000,000	920,582,153		100.00%

If the limit for a counterparty is amended by resolution of the directors, and the counterparty usage is higher than the new limit at that time, the company brings their exposure to that counterparty within the new limit in due course, by not renewing term deposits with that counterparty upon their maturity.

14.2 d) i) Securities held for trading - Guernsey Risk Management

As at 31 December 2012:	Value at 31 December 2012	Rating	%

The securities listed above are held as direct hedging instruments and are not subject to the limits outlined in 14.1 c).

ZÜRCHER KANTONALBANK FINANCE (GUERNSEY) LIMITED
NOTES TO THE FINANCIAL STATEMENTS
For the year ended 31 December 2012

14 Risk management and policies (continued)

14.3 Liquidity risk

Definition: Liquidity risk is the risk that the company will encounter difficulty in realising assets or otherwise raising funds to meet commitments.

The policy throughout the year has been to ensure liquidity by maintaining at all times sufficient cash deposits. The company's liquidity risk is constantly monitored as an important part of the risk management process. For short term liquidity management, cash inflows and outflows are forecasted and monitored in detail for each of the upcoming 40 working days for each currency. This daily analysis is complemented by a long term liquidity analysis (forecast on 3 months basis).

	2012 Up to one year CHF	2012 From one year to two years CHF	2012 From two years to three years CHF	2012 From three years to four years CHF	2012 From four years to five years CHF	2012 From five years and over CHF	31 December 2012 Total CHF

Derivative financial instruments held at fair value through profit or loss	(29,008,153)	(24,376,026)	(21,496,508)	(6,235,433)	(5,713,030)	(16,486,003)	(103,315,153)
Financial liabilities held at fair value through profit or loss	(1,332,847,817)	(1,018,960,410)	(593,269,384)	(252,720,941)	(83,168,347)	(125,631,389)	(3,406,598,288)
Net Liquidity	(41,775,492)	(574,550,707)	266,817,643	236,170,317	85,536,438	85,801,567	57,999,766

The contractual liabilities of the company at 31 December 2012 are as follows:

Financial liabilities held at fair value through profit or loss	(1,243,876,827)	(962,933,135)	(567,328,575)	(245,663,946)	(66,779,224)	(56,958,531)	(3,143,540,238)
---	-----------------	---------------	---------------	---------------	--------------	--------------	-----------------

The liquidity risk profile shows a net deficit in the periods up to one year and from one to two years. However, the bond portfolio is considered to be held for trading, and while bonds are classified according to their final maturity date, the portfolio is sufficiently liquid that the bonds could be sold at any time to meet liquidity requirements.

ZÜRCHER KANTONALBANK FINANCE (GUERNSEY) LIMITED
NOTES TO THE FINANCIAL STATEMENTS
For the year ended 31 December 2012

14 Risk management and policies (continued)

14.4 Market risk

Definition: Market risk is the risk that the fair value or future cash flows of financial instruments will fluctuate due to changes in market variables such as interest rates and foreign exchange rates, and sensitivity to changes in market pricing.

As in previous years, the company's exposure to changes in market pricing is limited, as all fair value adjustments on the individual instruments which comprise of each of the company's products will reverse on the maturity of that product.

14.4 a) Interest rate risk

Definition: Exposure to interest rate risk is the risk that arises when there is an imbalance between rate and non-rate sensitive assets and liabilities.

The assets (see notes 6 to 9) of the company are exposed to interest rate risk, the liabilities are not exposed to interest rate risk. At 31 December 2012, the amount of interest rate risk exposure to the assets of the company was 94.20% (2011: 94.48%).

As at 31 December 2012, the Delta Position calculation of exposure to interest rate risk which gives the potential gain or loss for a change in interest rates showed that an increase of the interest rate curve by one basis point would result in a loss of CHF 29,773 (2011: gain of CHF 16,421), within the prescribed limit of +/- CHF 100,000.

The interest rate profile of the company at 31 December 2012:	Total CHF	Variable rate CHF	Fixed rate CHF	No interest received/paid CHF

NOTES TO THE FINANCIAL STATEMENTS
For the year ended 31 December 2012

14 Risk management and policies (continued)

14.4 b) Foreign currency risk

Definition: Foreign currency risk is the risk that the value of the financial instruments will fluctuate because of changes in foreign exchange rates.

The company's foreign exchange exposure arises from the issuance of the company's products. The company does not enter into foreign exchange transactions for speculative purposes.

ZÜRCHER KANTONALBANK FINANCE (GUERNSEY) LIMITED
NOTES TO THE FINANCIAL STATEMENTS
For the year ended 31 December 2012

15 Capital management

The company is not subject to externally imposed capital requirements and has no restrictions on the issue or repurchase of ordinary shares.

The company's objectives for managing capital are:

- To achieve consistent returns while safeguarding capital.
- To maintain sufficient liquidity to meet the expenses of the company and to meet its liabilities as they arise.

To achieve the above objectives, the company invests in term deposits with group approved banks and bonds with an appropriate credit rating (see note 14).

16 Related party disclosures

The immediate and ultimate parent undertaking is Zürcher Kantonalbank, a company incorporated in Switzerland.

Mr PDH Hodgson is a director of Butterfield Trust (Guernsey) Limited, who act as administrators for Zürcher Kantonalbank Finance (Guernsey) Limited. Butterfield Trust (Guernsey) Limited are owed GBP 150,000 (CHF 223,185) [2011: GBP 150,461 (CHF 218,655)] for services rendered.

Remuneration of key management during the year

A non-executive director, and chairman of the audit committee, was paid an amount of GBP 7,000 (CHF 10,445) [2011: GBP 7,000 (CHF 10,067)] for services rendered.

ZÜRCHER KANTONALBANK FINANCE (GUERNSEY) LIMITED

DIRECTORS' REPORT

The directors submit their report and the audited financial statements for the year ended 31 December 2013.

Activities

The principal activity of Zürcher Kantonalbank Finance (Guernsey) Limited ("the company") is to carry on business as a finance company and to borrow or raise money by the issue of financial instruments of whatsoever nature.

Results

The results of the company are shown in the Statement of Comprehensive Income on page 3.

Dividend

The directors do not recommend the payment of a dividend.

Directors

The directors of the company are those listed in the Company Information.

Statement of directors' responsibilities in respect of the financial statements

The directors are responsible for preparing the financial statements in accordance with applicable Guernsey Law and generally accepted accounting principles.

Guernsey Company Law requires the directors to prepare financial statements for each financial year which give a true and fair view of the state of affairs of the company and of the profit or loss of the company for that period. In preparing those financial statements, the directors should:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the company will continue in business.

The directors are responsible for keeping proper accounting records that disclose with reasonable accuracy at any time the financial position of the company and to enable them to ensure that the financial statements comply with the Companies (Guernsey) Law, 2008. They are also responsible for safeguarding the assets of the company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

So far as each of the directors is aware, there is no relevant audit information of which the company's auditor is unaware, and each has taken all the steps he ought to have taken as a director to make himself aware of any relevant audit information, and to establish that the company's auditor is aware of that information.

Auditors

A resolution to reappoint Ernst & Young LLP as auditors will be put to the members at the Annual General Meeting.

For and on behalf of the Board

For and on behalf of Butterfield Management Services (Guernsey) Limited

Date

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF ZÜRCHER KANTONALBANK FINANCE (GUERNSEY) LIMITED

We have audited the financial statements of Zürcher Kantonalbank Finance (Guernsey) Limited for the year ended 31 December 2013 which comprise the Statement of Comprehensive Income, the Statement of Financial Position, the Statement of Changes in Equity, the Statement of Cash Flows and the related notes 1 to 18. The financial reporting framework that has been applied in their preparation is applicable law and International Financial Reporting Standards (IFRSs) as adopted by the European Union.

This report is made solely to the company's members, as a body, in accordance with Section 262 of the Companies (Guernsey) Law, 2008. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

Respective responsibilities of directors and auditors

As explained more fully in the Directors' Responsibilities Statement set out on page 1, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view. Our responsibility is to audit and express an opinion on the financial statements in accordance with applicable law and International Standards on Auditing (UK and Ireland). Those standards require us to comply with the Auditing Practices Board's Ethical Standards for Auditors.

Scope of the audit of the financial statements

An audit involves obtaining evidence about the amounts and disclosures in the financial statements sufficient to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or error. This includes an assessment of: whether the accounting policies are appropriate to the company's circumstances and have been consistently applied and adequately disclosed; the reasonableness of significant accounting estimates made by the directors; and the overall presentation of the financial statements. In addition, we read all the financial and non-financial information in the annual report to identify material inconsistencies with the audited financial statements and to identify any information that is apparently materially incorrect based on, or materially inconsistent with, the knowledge acquired by us in the course of performing the audit. If we become aware of any apparent material misstatements or inconsistencies, we consider the implications for our report.

Opinion on financial statements

In our opinion the financial statements:

- give a true and fair view of the state of the company's affairs as at 31 December 2013 and of its net income for the year then ended;
- have been properly prepared in accordance with IFRSs as adopted by the European Union; and
- have been prepared in accordance with the requirements of the Companies (Guernsey) Law, 2008.

Matters on which we are required to report by exception

We have nothing to report in respect of the following matters where the Companies (Guernsey) Law, 2008 requires us to report to you if, in our opinion:

- proper accounting records have not been kept; or
- the financial statements are not in agreement with the accounting records; or
- we have not received all the information and explanations we require for our audit.

ZÜRCHER KANTONALBANK FINANCE (GUERNSEY) LIMITED
NOTES TO THE FINANCIAL STATEMENTS
For the year ended 31 December 2013

1 Corporate information

Zürcher Kantonalbank Finance (Guernsey) Limited ("the company") is a finance company and borrows or raises money by the issue of financial instruments of whatsoever nature. The company was incorporated and is registered in Guernsey with the registered office being at Regency Court, Glatigny Esplanade, St Peter Port, Guernsey, GY1 3AP.

2 Principal accounting policies

The following accounting policies have been applied consistently in dealing with items which are considered material in relation to the financial statements of the company.

Basis of preparation

The financial statements have been prepared under the historical cost convention as modified by the revaluation to fair value through profit or loss of derivative financial instruments, over-the-counter (OTC) options, securities, term deposits with banks and financial liabilities and in accordance with International Financial Reporting Standards ("IFRS") as adopted by the European Union.

Going concern

The Company's financial position, its cash flows and liquidity position are set out in the financial statements. In addition, notes 14 to the financial statements include the company's risk management and policies, details of its financial instruments, its exposures to credit risk and liquidity risk and its objectives, policies and processes for managing its capital. Based on the review for the 2014 and 2015 financial forecast, the Directors consider that the Company has adequate financial resources and believe that the Company is well placed to manage its business risks successfully and to continue in operational existence for the foreseeable future. As such the Directors are satisfied that it is appropriate to prepare the financial statements on the going concern basis.

Statement of compliance

The financial statements of the company have been prepared in accordance with IFRS as adopted by the European Union.

Standards, interpretations and amendments issued but not yet effective

At the date of authorisation of these financial statements, the following relevant standards and interpretations, which have not been applied, were in issue but not yet effective:-

IFRS 7: Financial Instruments - Disclosures. Amendments resulting from the deferral of mandatory effective date of IFRS 9 and amendments to transition disclosures, and additional hedge accounting disclosures resulting from amendments to IFRS 9. The standard was effective for annual periods beginning on or after 1 January 2015, but this date has been removed (see IFRS 9). The company expects no impact from the adoption of the amendments on its financial position or performance.

IFRS 9: Financial Instruments - Classification and Measurement. The standard has been reissued to incorporate a hedge accounting chapter and permit the early application of the requirements for presenting in other comprehensive income the 'own credit' gains or losses on financial liabilities designated under the fair value option without early applying the other requirements of IFRS 9. There is currently no mandatory effective date but it will be no earlier than annual periods beginning on or after 1 January 2017. At present no assessment has been made by the company of the impact from the adoption of the amendments on its financial position or performance.

IFRS 10: Consolidated Financial Statements. The standard provides an exception to consolidation requirements for entities that meet the definition of an investment entity. The exception to consolidation requires investment entities to account for subsidiaries at fair value through profit or loss in accordance with IFRS 9. The standard is effective for annual periods beginning on or after 1 January 2014. The company expects no impact from the adoption of the amendments on its financial position or performance.

IFRS 12: Disclosure of Interests in Other Entities. Amendments in relation to investment entities. The standard is effective for annual periods beginning on or after 1 January 2014. The company expects no impact from the adoption of the amendments on its financial position or performance.

IFRS 13: Fair Value Measurement. Amendments resulting from the Annual Improvements 2011-2013 Cycle in relation to the scope of portfolio exception. The standard is effective for annual periods beginning on or after 1 July 2014. The company expects no impact from the adoption of the amendments on its financial position or performance.

IAS 32: Financial Instruments - Presentation. Amendments relating to the offsetting of assets and liabilities. The standard is effective for annual periods beginning on or after 1 January 2014. The company expects no impact from the adoption of the amendments on its financial position or performance.

IAS 39: Financial Instruments - Recognition and Measurement. Amendments for novations of derivatives. The standard is effective for annual periods beginning on or after 1 January 2014. The company expects no impact from the adoption of the amendments on its financial position or performance.

IAS 39: Financial Instruments - Recognition and Measurement. Amendments to permit an entity to elect to continue to apply the hedge accounting requirements in IAS 39 for a fair value hedge of the interest rate exposure of a portion of a portfolio of financial assets or financial liabilities when IFRS 9 is applied, and to extend the fair value option to certain contracts that meet the 'own use' scope exception. The standard is effective when IFRS 9 is applied. At present no assessment has been made by the company of the impact from the adoption of the amendments on its financial position or performance.

There are no other standards, interpretations or amendments to existing standards that are not yet effective that would be expected to have a significant impact on the company's financial position or performance. The directors have adopted a policy of applying new standards and interpretations when they become effective.

Changes in accounting policies and disclosures

The accounting policies adopted are consistent with those of the previous financial year. Amendments to IFRS resulting from the following new and amended standards and interpretations did not have any impact on the accounting policies, financial position, or performance of the company:

IAS 1: Presentation of Items of Other Comprehensive Income (Amendment) - effective for annual periods beginning on or after 1 July 2012.

IFRS 7: Financial Instruments: Disclosures (Amendment) - effective for annual periods beginning on or after 1 January 2013.

IFRS 11: Joint Arrangements - effective for annual periods beginning on or after 1 January 2013.

IFRS 12: Disclosures of Interests in Other Entities - effective for annual periods beginning on or after 1 January 2013.

IFRS 13: Fair Value Measurement - effective for annual periods beginning on or after 1 January 2013.

Cash and cash equivalents

Cash and cash equivalents, as referred to in the statement of cash flows, comprises of cash in hand, current accounts with banks and amounts due from banks on demand or with an original maturity of three months or less.

ZÜRCHER KANTONALBANK FINANCE (GUERNSEY) LIMITED
NOTES TO THE FINANCIAL STATEMENTS
For the year ended 31 December 2013

2 Principal accounting policies (continued)

Reverse repurchase (reverse repo) agreements

The company has entered into secured reverse repurchase (reverse repo) agreements which are recognised in the statement of financial position as financial assets designated at fair value through profit or loss. The deposits are backed by collateral in the form of securities which are held with a third party, and are not shown on the statement of financial position. This accurately reflects the financial nature of the transactions.

Foreign exchange

Assets and liabilities denominated in foreign currencies are translated into Swiss francs based on the rates of exchange ruling at the statement of financial position date. Foreign currency transactions during the period are translated at the rates of exchange ruling at the date of the transactions. Foreign exchange gains and losses are included in the statement of comprehensive income.

The Swiss franc is the functional and presentational currency of the company, as it is of Zürcher Kantonalbank, the parent company. Also, a significant proportion of the company's transactions is done in Swiss francs.

Investment income

Investment income comprises of interest receivable on the maturity of the company's term deposits with banks. Interest income is recognised as it accrues.

Provisions

Provisions are recognised when the company has a present obligation (legal or constructive) as a result of a past event, and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

Financial instruments designated at fair value through profit or loss - initial recognition, derecognition and subsequent measurement

The company recognises a financial asset or a financial liability when, and only when, it becomes a party to the contractual provisions of the instrument. Purchases and sales of financial instruments, over-the-counter options, securities and term deposits with banks are recognised on the trade date and are initially designated and measured at fair value through profit or loss consistent with the company's documented risk management strategy.

Financial instruments, over-the-counter options, securities and term deposits with banks are derecognised when the maturity date or final fixing date has expired and the rights to receive cashflows or meet obligations has passed. Gains and losses on maturity are recognised in net trading income in the statement of comprehensive income.

The financial instruments, over-the-counter options, securities, reverse repurchase agreements and term deposits with banks are subsequently valued according to the fair value principle. Changes in fair value are recorded in net gains or losses on financial assets and liabilities designated at fair value through profit or loss.

The accrued interest receivable and payable, prepayments and accrued expenses at the year end are valued according to the fair value principle.

Fair value of financial instruments

The company measures financial instruments at fair value at each balance sheet date. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

IFRS 13 establishes a single source of guidance under IFRS for all fair value measurements. IFRS 13 does not change when an entity is required to use fair value, but provides guidance on how to measure fair value under IFRS. IFRS 13 defines fair value as an exit price. As a result of the guidance in IFRS 13, the company re-assessed its policies for measuring fair values, in particular, its valuation inputs such as non-performance risk for fair value measurement of liabilities. Application of IFRS 13 has not materially impacted the fair value measurements of the company. All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, as described in note 13.

For assets and liabilities that are recognised in the financial statements on a recurring basis, the company determines whether transfers have occurred between Levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period. There have been no transfers between Levels during the year.

Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously. This is not generally the case with master netting agreements, and the related assets and liabilities are presented gross in the statement of financial position.

Financial assets held to maturity and bonds payable

After initial recognition at fair value plus attributable transaction costs, financial assets held to maturity and bonds payable are subsequently measured at amortised cost using the effective interest rate method. Gains and losses are recognised in the statement of comprehensive income when either the assets and liabilities are derecognised or through the amortisation process.

Amortised cost is computed using the effective interest rate method less any allowance for impairment and principal repayment or reduction. The calculation takes into account any premium or discount on acquisition and includes transaction costs and fees that are an integral part of the effective rate.

Impairment of financial assets

The company assesses at each statement of financial position date whether there is any objective evidence that a financial asset or a group of financial assets is impaired. A financial asset or a group of financial assets is deemed to be impaired if, and only if, there is objective evidence of impairment as a result of one or more events that has occurred after the initial recognition of the asset (an incurred 'loss event' or 'events') which has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated.

3 Taxation

With effect from 1 January 2008, Guernsey abolished the exempt company regime. The company is taxed at the company standard rate (0%) from that date.

13 Fair value of financial instruments

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1: Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2: Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly
- Level 3: Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For the purpose of fair value disclosures, the company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

Fair value of financial instruments at 31 December 2013:	Total CHF	Level 1 CHF	Level 2 CHF	Level 3 CHF
Assets				
Securities designated at fair value through profit or loss	1,726,161,613	1,726,161,613	-	-

Financial liabilities held at fair value through profit or loss	(3,406,598,288)	-	(3,406,598,288)	-

The fair values of securities are based on market prices which are available in active markets. The fair value of such securities is included within Level 1.

The fair values of term deposits with banks are calculated using a bank discount rate on an interest curve interpolated from market data. The fair value of such term deposits with banks is included within Level 2.

The fair values of over-the-counter options are calculated using an option pricing model based on direct market data, e.g., bond or share prices, and indirect market data, e.g., interest, implied volatility and dividend estimates. The fair value of such over-the-counter options is included within Level 2.

The fair values of interest rate swaps are calculated using a bank discount rate on an interest curve interpolated from market data. The fair value of such interest rate swaps is included within Level 2.

The fair values of structured products, which are set up as combinations of the components of the respective structured product, are calculated based on the sum of the valuations of its components. As the fair values of the components of the structured products are either Level 1 (securities) or Level 2 (term deposits with banks, over-the-counter options and interest rate swaps), the fair value of such structured products is included within Level 2.

ZÜRCHER KANTONALBANK FINANCE (GUERNSEY) LIMITED
NOTES TO THE FINANCIAL STATEMENTS
For the year ended 31 December 2013

14 Risk management and policies

The company's financial products comprise of term deposits, money market assets, securities, options and various types of derivative instruments, cash and liquid resources and various other items that arise directly from its operations.

14.1 Risk management framework

The directors have included information in the notes to the financial statements which discloses the market risk sensitivity analysis which is performed by the parent company Zürcher Kantonalbank, and is appropriate to the nature of the company's business and the market risks to which it is subject, in accordance with the requirements of IFRS 7. The company's directors and the company's management use sensitivity analysis as described in note 14 of this report to evaluate the nature and extent of risks arising from financial instruments.

The main risks arising from the company's financial products are credit risk, liquidity risk and market risk. The directors regularly review and agree policies for managing each of these risks and they are summarised below. The risk management guidelines for the company set out guidelines for identifying, managing and monitoring default, liquidity and market risks to which the company is exposed.

In particular, the document:

- i) defines the rules and procedures for managing default, liquidity and market risks;
- ii) sets out the applicable long-term risk policies of the company and Zürcher Kantonalbank;
- iii) defines the entity to which duties and responsibilities in relation to risk management are assigned;
- iv) defines the entity to which duties and responsibilities in relation to risk monitoring are assigned;
- v) provides an overview of relevant powers and responsibilities.

The general guidelines are:

- i) Default, liquidity and market risks shall be managed in accordance with the rules and policies laid down in the Guidelines on Risk Management at Zürcher Kantonalbank, and Group risk policies.
- ii) Subject to the constraints of the applicable Group risk policies, the company shall define appropriate limits with a view to mitigating default and market risks.
- iii) Zürcher Kantonalbank shall be responsible for managing risks subject to approved limits.
- iv) Zürcher Kantonalbank shall be responsible for quantifying risk, preparing reports on risk monitoring conducted, and reporting on risks.
- v) The directors of the company shall be entitled to limit the level of risk exposure and the list of approved products at any time.

The management of risks within the limits in sections 14.1 a), b), c), and d), has been delegated to Zürcher Kantonalbank.

With regard to risk monitoring, the Chief Executive Officer (CEO) of the company is responsible for:

- i) monitoring liquidity and solvency of the company and informing the directors of any issues arising or exceptional events;
- ii) monitoring adherence to risk limits and informing the directors in the event of a limit breach;
- iii) defining actions to be taken in case of limit breaches;
- iv) informing the directors of actions defined; and
- v) documenting limits, limit breaches and actions defined.

Risk measurement, preparation of risk monitoring reports and risk reporting have been delegated to Zürcher Kantonalbank. To ensure a constant monitoring of risk by the company's management, a risk report is prepared by Zürcher Kantonalbank on a daily basis and is sent to the management of the company.

One of the major changes made in 2011 was the replacement of the Value-at-Risk methodology, with sensitivity limits, volume limits, credit spread limits and loss limits as described in the risk management guidelines. The following sections detail the limit types, methods used for exposure calculation and exposures as per year end.

14.1 a) Sensitivity limits ("Delta limits")

The directors of the company define sensitivity limits for interest rate, foreign currency and default risks, which are calculated on a daily or weekly basis.

Interest rate sensitivity limit per basis point (Rho exposure)

An interest rate sensitivity limit of +/- CHF 100,000 means that the current Rho exposure must not exceed CHF 100,000 per basis point. Rho is the derivative of the option value with respect to the risk free interest rate for the relevant outstanding term, and is expressed as the amount of money, per share of the underlying, that the value of the option will gain or lose as the risk free interest rate rises or falls by one basis point.

	Limit	Limit status	Value 31.12.13	Value 31.12.12
Additional information on interest rate risk: table 14.4 a)	+/- CHF 100,000	ok	(12,171)	(29,773)

Foreign exchange sensitivity limit per CHF 0.01

The foreign exchange sensitivity limit of +/- CHF 1,000,000 means that the effect of our foreign exchange exposure must not cause a profit or loss of greater than CHF 1,000,000. The calculation of foreign exchange sensitivity is performed by Zürcher Kantonalbank (Risk Control Department). The amount disclosed means the effect on profit or loss when the Swiss Franc FX-rates move by 1%.

	Limit	Limit status	Value 31.12.13	Value 31.12.12
Additional information on foreign exchange rate risk: table 14.4 b)	+/- CHF 1,000,000	ok	170	1,790

Default risk sensitivity limits: Credit risk money markets

Credit risk money markets relates to the daily change of synthetic portfolio hedging, i.e. a portfolio of credit default swaps (CDS) with reference to named money market counterparties. The sensitivity limit defines the maximum profit and loss daily change limit permitted on the theoretical hedging costs on the Guernsey Risk Manager portfolio.

The credit risk money markets limit of +/- CHF 1,000,000 means that the current credit delta exposure on money market investments must not exceed CHF 1,000,000 per credit point.

	Limit	Limit status	Value 31.12.13	Value 31.12.12
Additional information on money market exposure: table 14.2 c)	+/- CHF 1,000,000	ok	(111,000)	(244,000)

ZÜRCHER KANTONALBANK FINANCE (GUERNSEY) LIMITED
NOTES TO THE FINANCIAL STATEMENTS
For the year ended 31 December 2013

14 Risk management and policies (continued)

14.1 a) Sensitivity limits ("Delta limits") (continued)

Default risk sensitivity limits: Credit risk others

Credit risk others refer to bonds and reverse repurchase agreements, and is related to daily changes of the Z-Spread. The sensitivity limit defines the maximum profit and loss daily change limit permitted on the theoretical hedging costs on the Guernsey Risk Manager portfolio. The credit risk others limit of +/- CHF 5,000,000 means that the current credit delta exposure on bonds and reverse repurchase agreements must not exceed CHF 5,000,000 per credit point.

Additional information on the company's exposure: tables 14.2 d)	+/- CHF 5,000,000	Limit ok	Value 31.12.13 272,380	Value 31.12.12 366,514
--	-------------------	-------------	---------------------------	---------------------------

14.1 b) Entity volume limits for funds invested with third parties

The directors define maximum volumes for each counterparty with a view to mitigating the risk of default on investments with third parties (money market investments and reverse repurchase agreements). The directors may lower the limits defined for the company at any time.

Exposure of term deposits and money market assets with corresponding counterparty limits are disclosed in table 14.2 c).

14.1 c) Entity volume limits and counterparty limit monitoring for securities investments

The directors have defined minimum credit ratings and maximum permitted volumes per issuer for each rating category with a view to mitigating the default risk associated with securities (bonds, Pfandbriefe, etc).

Volume limits per counterparty must not exceed Group policy. Counterparty volume limits for securities investments are:

	Limit CHF	Limit Status
Total Limit	1,500,000,000	ok
Counterparty Limits AAA	100,000,000	ok
Counterparty Limits AA	50,000,000	ok
Counterparty Limits A	30,000,000	ok
Counterparty Limits BBB or lower	-	ok

Additional information on the company's exposure: table 14.2 d) i)

14.1 d) Credit spread limit (DV01) and loss limit

The directors have defined the maximum credit spread sensitivity (DV01) per issuer with a view to mitigating the credit risk associated with securities and a maximum daily loss limit. DV01 is the sensitivity of a contract to a 1 basis point fluctuation in the credit spread curve.

The DV01 limit is CHF 35,000 per issuer. At 31 December 2013, the potential loss per issuer was within the prescribed limit.

The maximum daily loss limit is CHF 5,000,000. At 31 December 2013 the potential daily loss was CHF 272,380 (2012: 366,514), and within the prescribed limit.

14.2 Credit risk

Definition: Credit risk is the risk that a counterparty will be unable or unwilling to meet a commitment that it has entered into with the company.

Zürcher Kantonalbank manages counterparty credit risk at a group level to optimise the use of credit availability and to avoid excessive risk concentration. The company's policy is that all credit facilities are entered into with group approved banks with an appropriate credit rating. The Standard & Poor's long term deposits ratings at 31 December 2013 are shown in the note below.

With respect to credit risk arising from the financial assets of the company, which comprise of term deposits, money market assets, reverse repurchase agreements, securities, debtors and various types of derivative instruments, the company's exposure to credit risk arises from default of the counterparty, with a maximum exposure equal to the carrying amount of these instruments.

The company's management team and directors receive regular reports on any credit exposure.

14.2 a) Financial assets held to maturity

As at 31 December 2013:	Value at 31 December 2013	Rating	%
Bonds receivable	8,210,803	AAA	79.77%
Bonds receivable	2,082,572	AA	20.23%
Total	10,293,375		100.00%
	Value at 31 December 2012	Rating	%
Bonds receivable	8,000,000	AAA	100.00%
Total	8,000,000		100.00%

14.2 b) Reverse repurchase (reverse repo) agreements

The company has entered into secured reverse repurchase (reverse repo) agreements. The securities held as collateral are held by a third party agent.

	31 December 2013 CHF	31 December 2012 CHF
Book value of cash collateral due for securities borrowed in connection with reverse repurchase agreements	700,000,000	750,000,000

NOTES TO THE FINANCIAL STATEMENTS
For the year ended 31 December 2013

14 Risk management and policies (continued)

14.2 c) Term deposits and money market assets

As at 31 December 2013:	Total internal limit	Deposits at 31 December 2013	Rating	%
Term deposits	-	-	AAA	0.00%
Term deposits	200,000,000	-	AA	0.00%
Term deposits	1,290,000,000	314,362,790	A	76.79%
Term deposits	115,000,000	95,000,000	BBB	23.21%
Total	1,605,000,000	409,362,790		100.00%

As at 31 December 2012:	Total internal limit	Deposits at 31 December 2012	Rating	%
Term deposits	-	-	AAA	0.00%
Term deposits	350,000,000	-	AA	0.00%
Term deposits	1,350,000,000	326,906,332	A	70.77%
Term deposits	165,000,000	134,990,225	BBB	29.23%
Total	1,865,000,000	461,896,557		100.00%

If the limit for a counterparty is amended by resolution of the directors, and the counterparty usage is higher than the new limit at that time, the company brings their exposure to that counterparty within the new limit in due course, by not renewing term deposits with that counterparty upon their maturity.

14.2 d) i) Securities held for trading - Guernsey Risk Management

As at 31 December 2013:	Value at 31 December 2013	Rating	%
Bonds receivable	821,842,341	AAA	70.44%
Bonds receivable	81,384,875	AA+	6.97%

Stocks held	22,453	No rating	0.00%
Total	856,723,081		100.00%

The securities listed above are held as direct hedging instruments and are not subject to the limits outlined in 14.1 c).

ZÜRCHER KANTONALBANK FINANCE (GUERNSEY) LIMITED
NOTES TO THE FINANCIAL STATEMENTS
For the year ended 31 December 2013

14 Risk management and policies (continued)

14.3 Liquidity risk

Definition: Liquidity risk is the risk that the company will encounter difficulty in realising assets or otherwise raising funds to meet commitments.

The policy throughout the year has been to ensure liquidity by maintaining at all times sufficient cash deposits. The company's liquidity risk is constantly monitored as an important part of the risk management process. For short term liquidity management, cash inflows and outflows are forecasted and monitored in detail for each of the upcoming 40 working days for each currency. This daily analysis is complemented by a long term liquidity analysis (forecast on 3 months basis).

	2013 Up to one year CHF	2013 From one year to two years CHF	2013 From two years to three years CHF	2013 From three years to four years CHF	2013 From four years to five years CHF	2013 From five years and over CHF	31 December 2013 Total CHF

The contractual liabilities of the company at 31 December 2013 are as follows:

Financial liabilities held at fair value through profit or loss	(1,610,455,271)	(573,445,718)	(387,262,341)	(110,163,945)	(42,917,851)	(47,756,243)	(2,772,001,369)
---	-----------------	---------------	---------------	---------------	--------------	--------------	-----------------

The liquidity risk profile shows a net deficit in the period up to one year. However, the bond portfolio is considered to be held for trading, and while bonds are classified according to their final maturity date, the portfolio is sufficiently liquid that the bonds could be sold at any time to meet liquidity requirements.

ZÜRCHER KANTONALBANK FINANCE (GUERNSEY) LIMITED
NOTES TO THE FINANCIAL STATEMENTS
For the year ended 31 December 2013

14 Risk management and policies (continued)

14.4 Market risk

Definition: Market risk is the risk that the fair value or future cash flows of financial instruments will fluctuate due to changes in market variables such as interest rates and foreign exchange rates, and sensitivity to changes in market pricing.

As in previous years, the company's exposure to changes in market pricing is limited, as all fair value adjustments on the individual instruments which comprise of each of the company's products will reverse on the maturity of that product.

14.4 a) Interest rate risk

Definition: Exposure to interest rate risk is the risk that arises when there is an imbalance between rate and non-rate sensitive assets and liabilities.

The assets (see notes 6 to 9) of the company are exposed to interest rate risk, the liabilities are not exposed to interest rate risk. At 31 December 2013, the amount of interest rate risk exposure to the assets of the company was 93.74% (2012: 94.20%).

As at 31 December 2013, the Delta Position calculation of exposure to interest rate risk which gives the potential gain or loss for a change in interest rates showed that an increase of the interest rate curve by one basis point would result in a loss of CHF 12,171 (2012: loss of CHF 29,773), within the prescribed limit of +/- CHF 100,000.

The interest rate profile of the company at 31 December 2013:	Total CHF	Variable rate CHF	Fixed rate CHF	No interest received/paid CHF

ZÜRCHER KANTONALBANK FINANCE (GUERNSEY) LIMITED
NOTES TO THE FINANCIAL STATEMENTS
For the year ended 31 December 2013

14 Risk management and policies (continued)

14.4 b) Foreign currency risk

Definition: Foreign currency risk is the risk that the value of the financial instruments will fluctuate because of changes in foreign exchange rates.

The company's foreign exchange exposure arises from the issuance of the company's products. The company does not enter into foreign exchange transactions for speculative purposes.

* Accrued interest receivable and prepayments do not correspond to the 2012 financial statements and reflects adjustments made, refer note 18.

The following table discloses the sensitivity (effect on the company's P&L) to a change in the EUR/CHF exchange rate, with all other variables held constant, due to changes in the fair value of monetary assets and liabilities including non-designated foreign currency derivatives. The company's exposure to foreign currency changes for all other currencies is not material.

	Change in EUR versus CHF rate %	Effect on net income / equity CHF
2013	+/- 1%	+/- 170
2012	+/- 1%	+/- 1,790

14.5 Internal control framework

The company's internal controls which were revised in 2012 according to the methodology applied at group level were further improved in 2013 with a special focus on accounting controls due to the introduction of a new accounting system. Furthermore, a standardised reporting to the parent company was introduced.

14.6 Mitigation of risk

As part of its overall risk management, Zürcher Kantonalbank uses derivatives and other financial instruments to manage exposures resulting from changes in foreign currency and interest rates, credit risks and equity risks.

ZÜRCHER KANTONALBANK FINANCE (GUERNSEY) LIMITED
NOTES TO THE FINANCIAL STATEMENTS
For the year ended 31 December 2013

15 Capital management

The company is not subject to externally imposed capital requirements and has no restrictions on the issue or repurchase of ordinary shares.

The company's objectives for managing capital are:

- To achieve consistent returns while safeguarding capital.
- To maintain sufficient liquidity to meet the expenses of the company and to meet its liabilities as they arise.

To achieve the above objectives, the company invests in term deposits with group approved banks and bonds with an appropriate credit rating (see note 14).

16 Related party disclosures

The immediate and ultimate parent undertaking is Zürcher Kantonalbank, a company incorporated in Switzerland.

Mr PDH Hodgson is a director of Butterfield Trust (Guernsey) Limited, who act as administrators for Zürcher Kantonalbank Finance (Guernsey) Limited. Butterfield Trust (Guernsey) Limited are owed GBP 125,000 (CHF 185,028) [2012: GBP 150,000 (CHF 223,185)] for services rendered.

Remuneration of key management during the year

A non-executive director, and chairman of the audit committee, was paid an amount of GBP 7,000 (CHF 10,202) [2012: GBP 7,000 (CHF 10,445)] for services rendered.

Annex 3

Keep-Well Agreement between Zürcher Kantonalbank and Zürcher Kantonalbank Finance (Guernsey) Limited

KEEP-WELL AGREEMENT

Agreement dated: May 31, 2010 (this Agreement shall entirely replace the previous Agreement dated as of May 2, 2001) between Zürcher Kantonalbank (the Parent) and Zürcher Kantonalbank Finance (Guernsey) Limited (the Subsidiary).

WHEREAS the Parent owns directly all the capital stock of the Subsidiary and

WHEREAS the Subsidiary plans to incur indebtedness, liabilities and obligations to third parties from time to time for interest rate and currency swap transactions as well as for other financial transactions including but not limited to structured products such as „RUNNERS“ and „PROTEINS“ and others (all such forms of indebtedness, liabilities and obligations being herein referred to as „Debt“).

NOW, THEREFORE the Subsidiary and the Parent agree as follows:

1. Stock ownership of the Subsidiary. As long as there is any Debt outstanding, the Parent shall directly or indirectly own and hold the legal title to and beneficial interest in all the outstanding shares of stock of the Subsidiary having the right to vote for the election of members of the Board of Directors of the Subsidiary and will not directly or indirectly pledge or in any other way encumber or otherwise dispose of any such shares of stock, unless required to dispose of any or all such shares of stock pursuant to a court decree or order of any governmental authority which, in the opinion of counsel to the Subsidiary, may not be successfully challenged.
2. Maintenance of a liquidity reserve designated for fulfillment of payment obligations on Debt issued under any law other than German law. The Parent agrees that it shall cause the Subsidiary to maintain a liquidity reserve designated for payment obligations on Debt issued under any law other than German law of at least CHF 1'000'000.00 (Swiss Francs one million) or its equivalent in another currency, at all times. If the Subsidiary at any time will run short of cash or other liquid assets to meet any payment obligation on its Debt issued under any law other than German law then or subsequently to mature and shall have insufficient unused commitments then the Subsidiary will promptly notify the Parent of the shortfall and the Parent will make available to the Subsidiary, before the due date of any such payment obligation, funds sufficient to enable it to fulfil any such payment obligation in full as it falls due. The Subsidiary will use the funds made available to it by the Parent solely for the payment at maturity of its Debt issuance under any law other than German law.

- 2 -

3. Waiver. The Parent hereby waives any failure or delay on the part of the Subsidiary in asserting or enforcing any of its rights or in making any claims or demands hereunder.
4. Not a guarantee. This agreement is not, and nothing herein contained and nothing done pursuant hereto by the Parent shall be deemed to constitute a guarantee, direct or indirect, by the Parent of any Debt or other obligation arising out of a swap or other transaction, indebtedness or liability, of any kind or character whatsoever, of the Subsidiary.
The Subsidiary has undertaken that, whenever it incurs any Debt, it will in advance in the documentation for the borrowing directed to noteholders or other lenders properly refer to this agreement and in particular include information substantially in accordance with Schedule I hereto.
5. Modification amendment or termination. This Agreement may be modified, amended or terminated only by the written agreement of the Parent and the Subsidiary, provided, however, that no such modification, amendment or termination shall have any adverse effect upon any holder of any Debt of the Subsidiary outstanding at the time of such modification, amendment or termination.
The Parent and the Subsidiary agree that they shall give written notice to each statistical rating agency that has issued a rating in respect of the Subsidiary or any of its obligations, at least 30 days prior to making any modification, amendment or termination of this Agreement.
6. Bankruptcy, liquidation or moratorium. Any rights and obligations which either of the parties has under this Agreement will remain valid and binding notwithstanding any bankruptcy or liquidation of, or moratorium involving, the Subsidiary.
7. Successors. The agreements herein set forth shall be mutually binding upon, and inure to the mutual benefit of, the Parent and the Subsidiary and their respective successors.
8. Governing law. This agreement shall be governed by **the laws of Switzerland**.

IN WITNESS WHEREOF, the parties hereto have caused this agreement to be executed and delivered by their respective officers thereunto duly authorised as of the day and year first above written.

Zürcher Kantonalbank

Dr. Philipp Halbherr
Head Investment Banking

Christoph Theler
Deputy Head Investment Banking

Schedule I

General

The Subsidiary is directly wholly owned Subsidiary of the Parent.

Keep-Well Agreement

The Subsidiary and the Parent have entered into a keep-well agreement dated as of May 31, 2010 (the „Keep-Well Agreement“) and governed by the laws of Switzerland. The following is a summary of certain of the terms of the Keep-Well Agreement, a copy of which is available for inspection in connection the prospectus of any issued structured products and/or Debt.

- (i) The Parent will own, directly or indirectly, all the outstanding capital stock of the Subsidiary so long as the Subsidiary has any indebtedness, liabilities or obligations for interest rate or currency swap transactions or for other financial transactions entered into by the Subsidiary with parties other than the Parent (all such forms of indebtedness, liabilities and obligations being herein referred to as „Debt“).
- (ii) The Parent agrees that it shall cause the Subsidiary to maintain a liquidity reserve designated for payment obligations on Debt issued under any law other than German law of at least CHF 1'000'000.00 (Swiss Francs one million) or its equivalent in another currency, at all times.
- (iii) If the Subsidiary at any time will run short of cash or other liquid assets to meet any payment obligation on its Debt issued under any law other than German law then or subsequently to mature and shall have insufficient unused commitments then the Subsidiary will promptly notify the Parent of the shortfall and the Parent will make available to the Subsidiary, before the due date of any such payment obligation, funds sufficient to enable it to fulfil any such payment obligation in full as it falls due. The Subsidiary will use the funds made available to it by the Parent solely for the payment at maturity of its Debt issuance under any law other than German law.

The Keep-Well Agreement provides that it may be modified, amended or terminated by the written agreement of the Parent and the Subsidiary at any time, provided, however, that no such modification, amendment or termination shall have any adverse effect upon any holder of any Debt of the Subsidiary outstanding at the time of such modification, amendment or termination.

The Parent and the Subsidiary have agreed that they shall give written notice to each statistical rating agency that has issued a rating in respect of the Subsidiary or any of its obligations, at least 30 days prior to making any modification, amendment or termination of the Keep-Well Agreement.

- 4 -

The Keep-Well Agreement is not a guarantee by the Parent of the payment of any indebtedness, liability or obligation of the Subsidiary. Holders of notes or other Debt are not parties to the Keep-Well Agreement. The only parties to the Keep-Well Agreement are the Subsidiary and the Parent. Consequently, the Keep-Well Agreement does not confer to any note holders or holders of other Debt any rights or claims against the Parent. The Keep-Well Agreement will not be enforceable against the Parent. The Keep-Well Agreement will not be enforceable against the Parent by anyone other than the Subsidiary (and/or its liquidator or administrator in the event of bankruptcy or, as the case may be, moratorium). In the event of a breach by the Parent in performing a provision of the Keep-Well Agreement and of the insolvency of the Subsidiary while any notes or other Debt were outstanding, the remedies of note holders or holders of other Debt could include the acceleration of the Debt (if it has not already matured) and (if the Debt remained unpaid and unless such a proceeding had already been commenced by another creditor of the Subsidiary) the filing as a creditor of the Subsidiary of a petition for the winding-up of the Subsidiary, with a view to the liquidator (appointed by the competent court) pursuing the Subsidiary's rights under the Keep-Well Agreement against the Parent. The granting of a winding-up order would be in the discretion of the court and might be delayed by the grant of a moratorium order, in which event the Subsidiary's rights against the Parent would be exercisable by the court-appointed administrator and the managing directors of the Subsidiary jointly.

Financial and other information concerning the Parent is provided for background purposes only in view of the importance to the Subsidiary of the Keep-Well Agreement: it should not be treated as implying that the Keep-Well Agreement can be viewed as a guarantee.

for Warrants (incl. Knock-out Warrants)

NAME OF THE PRODUCT

Terms and Conditions

a) Product Description

Product Category/Name: [●]

Key Features of the Product: [●]

CISA Notification: **These Warrants do not constitute collective investment schemes in the meaning of the Swiss Federal Act on Collective Investment Schemes (CISA). They are not subject to an authorisation or supervision by the FINMA and investors do not benefit from protection under the CISA.**

Essential Product Attributes Investors can profit from both increasing (Call Warrant) or falling (Put Warrant) prices and increasing volatility of the Underlying. Warrants are suitable for investors with a high risk tolerance, by investing a premium in order to speculate on the future performance of the Underlying or to hedge a portfolio against market fluctuations. The potential yield on the investment amount is disproportional higher than the direct investment in the Underlying due to the Gearing.

Issuer: Zürcher Kantonalbank

Paying Agent, Exercise Agent and Calculation Agent: Zürcher Kantonalbank, Zürich

Rating of the Issuer: Standard & Poor's AAA, Moody's Aaa, Fitch AAA

Taxes:	The information above is a summary only of the Issuer's understanding of the current Swiss law and practice of the Swiss Federal Tax Authority relating to the taxation of these Warrants on the Issue Date. The relevant tax law and practice may change. The Issuer does not assume any liability in connection with the above information. Despite this general information investors should consult with their own tax advisers on the tax implications of an investment in these Warrants.
Documentation:	This document is a non-binding English translation of the Endgültige Bedingungen (Final Terms) published in German

and constituting the Final Terms in accordance to article 21 of the Additional Rules for the Listing of Derivatives of the SIX Swiss Exchange. The German text shall be controlling and binding. The English language translation is provided for convenience only.

The binding German version of these Final Terms supplement the Issuance Program of the Issuer dated 15 April 2014 and published in German in the currently valid version. The binding German version Final Terms and the Issuance Program constitute the complete Issuance and Listing Prospectus for this issuance (the "Listing Prospectus").

Except as otherwise defined in these Final Terms, capitalised terms used in these Final Terms have the meaning as defined in the Glossar in the Issuance Program. In case of discrepancies between information or the provisions in these Final Terms and those in the Issuance Program, the information and provisions in these Final Terms shall prevail.

Warrants will be issued as uncertified rights (Wertrechte) and registered as book entry securities (Bucheffekten) with SIX SIS AG. No certificates will be issued for the Warrants.

These Final Terms and the Issuance Program can be ordered free of charge at Zürcher Kantonalbank Bahnhofstrasse 9, 8001 Zurich or by e-mail at documentation@zkb.ch.

This document is not a prospectus in accordance with articles 652a or 1156 of the Swiss Code of Obligations.

Information on the Underlying:

Information on the performance of the Underlying is publicly available on www.bloomberg.com. Current annual reports are published on the website of the respective business entity. The transfer of the Underlying is conducted in accordance with their respective statutes.

Notices:

Any notice by the Issuer in connection with these Warrants, in particular any notice in connection with modifications of the terms and conditions will be validly published on the website https://zkb-finance.mdgms.com/products/warrants/product_categories/warrants/index.html under the relevant Warrants. With the valor search function (Valorensuchfunktion) the relevant Warrants can be located. If these Warrants are listed on the SIX Swiss Exchange, the notices will be published in accordance with the rules issued by the SIX Swiss Exchange for IBL (Internet Based Listing) on the website http://www.six-swiss-exchange.com/news/official_notices/search_de.html

Governing Law/Jurisdiction:

Swiss Law / Zurich 1

b) Profit and Loss Expectation at Maturity

Profit and Loss Expectation at

Warrants offer the opportunity to participate on a leveraged basis to price movements in the Underlying. The

Maturity:

value of Put-Warrants generally deteriorates, if the value of the Underlying increases. Due to the leverage effect, the value of the Warrants will deteriorate faster than the value of the Underlying. The value of Warrants may decrease even if the value of the Underlying does not change, because the time value decreases or the demand for warrants deteriorates.

c) Material Risks for Investors**Credit Risk relating to Issuer:**

Obligations under these Warrants constitute direct, unconditional and unsecured obligations of the Issuer and rank pari passu with other direct, unconditional and unsecured obligations of the Issuer. The value of the Warrants does not only depend on the performance of the Underlying and other developments in the financial markets, but also on the solvency of the Issuer, which may change during the term of these Warrants.

Specific Product Risks:

Warrants entail the risk to lose the entire initially paid Premium (Issue Price). They are only suitable for investors who have the requisite knowledge and experience and understand thoroughly the risks connected with an investment in these Warrants and are capable of bearing the economic risks.

d) Additional Terms**Modifications:**

If an Extraordinary Event as described in Section IV of the Issuance Programme occurs in relation to the Underlying / a component of the Underlying or if any other extraordinary event (force majeure) occurs, which makes it impossible or particularly cumbersome for the Issuer, to fulfil its obligations under the Warrants or to calculate the value of the Warrants, the Issuer shall at its free discretion take all the necessary actions and, if necessary may modify the terms and conditions of these Warrants at its free discretion in such way, that the economic value of the Warrants after occurrence of the extraordinary event corresponds, to the extent possible, to the economic value of the Warrants prior to the occurrence of the extraordinary event. Specific modification rules for certain types of Underlying stated in Section IV of the Issuance Programme shall prevail. If the Issuer determines, for whatever reason, that a adequate modification is not possible, the Issuer has the right to redeem the Warrants early.

Market Disruptions:

If, due to the occurrence of a Market Disruption in relation to the Underlying / a component of the Underlying no market price can be determined, the Issuer or the Calculation Agent shall determine the market price of the Underlying / the component of the Underlying at its free discretion, considering the general market conditions and the last market price of relevant Underlying / component of the Underlying affected by the Market Disruption and has the right, if the Market Disruption persists on the Redemption Date, to postpone the Redemption Date to the first Banking Day on which the Market Disruption has

terminated. The specific provisions in Section IV.A.c) of the Issuance Program shall prevail.

This provision shall apply accordingly for the determination of the value of the Warrants, if its Underlying / a component of the Underlying is affected by a Market Disruption.

Selling Restrictions:

The selling restrictions contained in the Issuance Program are applicable (EEA, U.S.A. / U.S. persons, United Kingdom, [Guernsey]).

The Issuer has not undertaken any actions to permit the public offering of the Warrants or the possession or the distribution of any document produced in connection with the issuance of the Warrants in any jurisdiction other than Switzerland. The distribution of these Final Terms or other documents produced in connection with the issuance of the Warrants and the offering, sale and delivery of the Warrants in certain jurisdictions may be restricted by law. Persons, which have received these Final Terms or any other documents produced in connection with the issuance of the Warrants, such as the Issuance Program, Term Sheets, marketing or other selling material, are required by the Issuer to inform themselves about and to observe any such restrictions.

Prudential Supervision:

Zürcher Kantonalbank is a bank according to the Swiss Federal Act on Banks and Saving Institutions (BankG; SR 952.0) and a securities dealer according to the Swiss Federal Act on Securities Exchanges and Securities Trading (BEHG; SR 954.1) and subject to the prudential supervision of the FINMA, Einsteinstrasse 2, CH-3003 Bern, <http://www.finma.ch>

b) Profit and Loss Expectation at Maturity

Profit and Loss Expectation at Maturity::

Mini-Futures are structured products, which risk is higher than the risk of investing in the relevant underlying due to the leverage effect. Upon occurrence of a Stop-Loss Event, the actual price for the close-out of the Mini-Futures may, particularly in volatile markets, deviate considerably from the current Stop-Loss Level, which is to be considered as the trigger for a Stop-Loss Event only, but not an indication for the Redemption Amount. The potential maximum loss of Mini-Futures is limited to the amount invested in the product.]

c) Material Risks for Investors

Credit Risk relating to Issuer:

Obligations under these Structured Products constitute direct, unconditional and unsecured obligations of the Issuer and rank pari passu with other direct, unconditional and unsecured obligations of the Issuer. The value of the Structured Products does not only depend on the performance of the Underlying and other

developments in the financial markets, but also on the solvency of the Issuer, which may change during the term of this Series of Structured Products.]

Specific Product Risks:

Mini-Futures bear the risk of losing the entire invested capital (Issuance Price). They are suitable for experienced investors, who understand the risks involved in an investment and are capable of bearing such loss.

[•]

d) Additional Terms

Modifications:

If an Extraordinary Event as described in Section IV of the Issuance Programme occurs in relation to the Underlying / a component of the Underlying or if any other extraordinary event (force majeure) occurs, which makes it impossible or particularly cumbersome for the Issuer, to fulfil its obligations under the Structured Products or to calculate the value of the Structured Products, the Issuer shall at its free discretion take all the necessary actions and, if necessary may modify the terms and conditions of these Structured Products at its free discretion in such way, that the economic value of the Structured Products after occurrence of the extraordinary event corresponds, to the extent possible, to the economic value of the Structured Products prior to the occurrence of the extraordinary event. Specific modification rules for certain types of Underlying stated in Section IV of the Issuance Programme shall prevail. If the Issuer determines, for whatever reason, that an adequate modification is not possible, the Issuer has the right to redeem the Structured Products early.

Market Disruptions:

If, due to the occurrence of a Market Disruption in relation to the Underlying / a component of the Underlying no market price can be determined, the Issuer or the Calculation Agent shall determine the market price of the Underlying / the component of the Underlying at its free discretion, considering the general market conditions and the last market price of relevant Underlying / component of the Underlying affected by the Market Disruption and has the right, if the Market Disruption persists on the Redemption Date, to postpone the Redemption Date to the first Banking Day on which the Market Disruption has terminated. The specific provisions in Section IV.A.c) of the Issuance Program shall prevail.

This provision shall apply accordingly for the determination of the value of the Structured Products, if its Underlying / a component of the Underlying is affected by a Market Disruption.

Selling Restrictions:

The selling restrictions contained in the Issuance Program are applicable (EEA, U.S.A. / U.S. persons, United Kingdom, [Guernsey]).

The Issuer has not undertaken any actions to permit the public offering of the Structured Products or the possession or the distribution of any document produced in connection with the issuance of the Structured Products in any jurisdiction other than Switzerland. The distribution of these Final Terms or other documents produced in connection with the issuance of the Structured Products and the offering, sale and delivery of the Structured Products in certain jurisdictions may be restricted by law.

Persons, which have received these Final Terms or any other documents produced in connection with the issuance of the Structured Products, such as the Issuance Program, Term Sheets, marketing or other selling material, are required by the Issuer to inform themselves about and to observe any such restrictions.

Prudential Supervision:

Zürcher Kantonalbank is a bank according to the Swiss Federal Act on Banks and Saving Institutions (BankG; SR 952.0) and a securities dealer according to the Swiss Federal Act on Securities Exchanges and Securities Trading (BEHG; SR 954.1) and subject to the prudential supervision of the FINMA, Einsteinstrasse 2, CH-3003 Bern, <http://www.finma.ch>

Recording of Telephone conversations:

Investors are reminded, that telephone conversations with trading or sales units of the Zürcher Kantonalbank are recorded. Investors, who have telephone conversations with these units consent tacitly to the recording.

No Material Change

Since the date of the Issuance Program there have not been any material changes in the assets, financial standing or revenue of the Issuer.

Responsibility for the Final Terms

The Issuer accepts responsibility for the information contained in these Final Terms and declare, that the information contained in these Final Terms is, to the best knowledge, in accordance with the facts and contains no omission likely to affect its import

The information above is a summary only of the Issuer's understanding of the current Swiss law and practice of the Swiss Federal Tax Authority relating to the taxation of this Series of Derivatives on the Issue Date. The relevant tax law and practice may change. The Issuer does not assume any liability in connection with the above information. Despite this general information investors should consult with their own tax advisers on the tax implications of an investment in this Derivatives.

Documentation: This document is a non-binding English translation of the Endgültige Bedingungen (Final Terms) published in German and constituting the Final Terms in accordance to article 21 of the Additional Rules for the Listing of Derivatives of the SIX Swiss Exchange. The German text shall be controlling and binding. The English language translation is provided for convenience only.

The binding German version of these Final Terms supplement the Issuance Program of the Issuer dated 15 April 2014 and published in German in the currently valid version. The binding German version Final Terms and the Issuance Program constitute the complete Issuance and Listing Prospectus for this issuance (the "Listing Prospectus").

Except as otherwise defined in these Final Terms, capitalised terms used in these Final Terms have the meaning as defined in the Glossar in the Issuance Program. In case of discrepancies between information or the provisions in these Final Terms and those in the Issuance Program, the information and provisions in these Final Terms shall prevail.

Derivatives will be issued as uncertified rights (Wertrechte) and registered as book entry securities (Bucheffekten) with SIX SIS AG. No certificates will be issued for the Derivatives.

These Final Terms and the Issuance Program can be ordered free of charge at Zürcher Kantonalbank Bahnhofstrasse 9, 8001 Zurich or by e-mail at documentation@zkb.ch.

Information on the Underlying:

Information on the performance of the Underlying is publicly available on www.bloomberg.com. Current annual reports are published on the website of the respective business entity. The transfer of the Underlying is conducted in accordance with their respective statutes.

Notices:

Any notice by the Issuer in connection with this Series of Structured Products, in particular any notice in connection with modifications of the terms and conditions will be validly published on the website <https://zkb-finance.mdgms.com/products/stp/index.html> under the relevant Series of Structured Products. With the valor search function (Valorensuchfunktion) the relevant Series of Structured Products can be located. If this Series of Structured Products is listed on the SIX Swiss Exchange, the notices will be published in accordance with the rules issued by the SIX Swiss Exchange for IBL (Internet Based Listing) on the website http://www.six-swiss-exchange.com/news/official_notices/search_de.html

Governing Law/Jurisdiction:

Swiss law / Zurich 1

b) Profit and Loss Expectation at Maturity

Profit and Loss Expectation at Maturity:

[●
This list is valid as of Maturity and is not to be read as a price indication of the Issuer for the Series of Derivatives during the term of the product. During the term of the Series of Derivatives additional risk factors may have a material effect on the value of the Series of Derivatives. The price quoted on the secondary market may deviate considerably from the above list.]

c) Material Risks for Investors

Credit Risk relating to Issuer:

Obligations under these Derivatives constitute direct, unconditional and unsecured obligations of the Issuer and rank pari passu with other direct, unconditional and unsecured obligations of the Issuer. The value of the Derivatives does not only depend on the performance of the Underlying and other developments in the financial markets, but also on the solvency of the Issuer, which may change during the term of this Series of Derivatives. [for Derivatives issued by Zürcher Kantonalbank Finance (Guernsey) Limited: Zürcher Kantonalbank Finance (Guernsey) Limited does not have any rating.]

Specific Product Risks:

Derivate are complex financial instruments, which entail considerable risks and, accordingly, are only suitable for investors who have the

requisite knowledge and experience and understand thoroughly the risks connected with an investment in these Derivatives and are capable of bearing the economic risks.

[●]

d) Additional Terms

Modifications:

If an Extraordinary Event as described in Section IV of the Issuance Programme occurs in relation to the Underlying / a component of the Underlying or if any other extraordinary event (force majeure) occurs, which makes it impossible or particularly cumbersome for the Issuer, to fulfil its obligations under the Derivatives or to calculate the value of the Derivatives, the Issuer shall at its free discretion take all the necessary actions and, if necessary may modify the terms and conditions of these Derivatives at its free discretion in such way, that the economic value of the Derivatives after occurrence of the extraordinary event corresponds, to the extent possible, to the economic value of the Derivatives prior to the occurrence of the extraordinary event. Specific modification rules for certain types of Underlying stated in Section IV of the Issuance Programme shall prevail. If the Issuer determines, for whatever reason, that a adequate modification is not possible, the Issuer has the right to redeem the Derivatives early.

Market Disruptions:

If, due to the occurrence of a Market Disruption in relation to the Underlying / a component of the Underlying no market price can be determined, the Issuer or the Calculation Agent shall determine the market price of the Underlying / the component of the Underlying at its free discretion, considering the general market conditions and the last market price of relevant Underlying / component of the Underlying affected by the Market Disruption and has the right, if the Market Disruption persists on the Redemption Date, to postpone the Redemption Date to the first Banking Day on which the Market Disruption has terminated.

The specific provisions in Section IV.A.c) of the Issuance Program shall prevail.

This provision shall apply accordingly for the determination of the value of the Derivative, if its Underlying / a component of the Underlying is affected by a Market Disruption.

Change of Obligor:

The Issuer is entitled at all times and without the consent of the investors to assign in whole (but not in part) the rights and claims under individual Derivatives or all of them to a Swiss or foreign subsidiary, branch or holding company of the Zürcher Kantonalbank (the "New Issuer") to the extent that (i) the New Issuer assumes all of the obligations arising out of the assigned Derivatives which the previous Issuer owed in respect of these Derivatives, (ii) the Zürcher Kantonalbank enters into a keep-well agreement with the New Issuer with terms equivalent to the one between the Zürcher Kantonalbank and Zürcher Kantonalbank Finance (Guernsey) Limited, (iii) the New Issuer has received from the supervisory authorities of the country in which it is domiciled all necessary approvals for the issue of Derivatives and the assumption of the obligations under the assigned Derivatives.

Selling Restrictions:

The selling restrictions contained in the Issuance Program are applicable (EEA, U.S.A. / U.S. persons, United Kingdom, [Guernsey]).

The Issuer has not undertaken any actions to permit the public offering of the Derivatives or the possession or the distribution of any document produced in connection with the issuance of the Derivatives in any jurisdiction other than Switzerland. The distribution of these Final Terms or other documents produced in connection with the issuance of the Derivatives and the offering, sale and delivery of the Derivatives in certain jurisdictions may be restricted by law. Persons, which have received these Final Terms or any other documents produced in connection with the issuance of the Derivatives, such as the Issuance Program, Term Sheets, marketing or other selling material, are required by the Issuer to inform themselves about and to observe any such restrictions.

Prudential Supervision:

Zürcher Kantonalbank is a bank according to the Swiss Federal Act on Banks and Saving Institutions (BankG; SR 952.0) and a securities dealer according to the Swiss Federal Act on Securities Exchanges and Securities Trading (BEHG; SR 954.1) and subject to the prudential supervision of the FINMA, Einsteinstrasse 2, CH-3003 Bern, <http://www.finma.ch>

Zürcher Kantonalbank Finance (Guernsey) Limited is not subject to any direct prudential supervision neither in Guernsey nor in Switzerland, but is a fully owned and fully consolidated subsidiary of Zürcher Kantonalbank.

Recording of Telephone conversations:

Investors are reminded, that telephone conversations with trading or sales units of the Zürcher Kantonalbank are recorded. Investors, who have telephone conversations with these units consent tacitly to the recording.

No Material Change

Since the date of the Issuance Program there have not been any material changes in the assets, financial standing or revenue of the Issuer [insert, if the Derivatives are issued by Zürcher Kantonalbank Finance (Guernsey) Limited: and of Zürcher Kantonalbank].

Responsibility for the Final Terms

The Issuer [insert, if the Derivatives are issued by Zürcher Kantonalbank Finance (Guernsey) Limited: and of Zürcher Kantonalbank] accept[s] responsibility for the information contained in these Final Terms and declare[s], that the information contained in these Final Terms is, to the best knowledge, in accordance with the facts and contains no omission likely to affect its import
