Redemption Method	If none of the Underlyings close on the Final Fixing Date at or below the Knock-in Level, the Redemption Amount will be 100% of the Denomination. In addition, if the value of the weighted Basket at Final Fixing is above the Strike Level, the positive performance of the weighted basket between Initial Fixing and Final Fixing, multiplied by the Participation Rate, is distributed. If one or more Underlyings close at or below the Knock-in Level on the Final Fixing Date ("Knock-in Event"), the investor will receive a cash repayment corresponding to the Denomination minus the percentage difference between the Closing price on Initial Fixing Date and the Closing price on Final Fixing Date of the worst performance of the weighted basket between Initial Fixing and Final Fixing, multiplied by the Participation Rate. The Coupon will be paid out on the defined Coupon Date(s) independent of the performance of the Underlyings.

If the prices of the Underlyings do not close at or below the Knock-in Level on the Final Fixing Date, the performance of the ZKB Barrier Reverse Convertible Last Look on worst of with participation is given by the Coupons paid out over the lifetime (according to Coupon Payment Date(s)) gegeben, in this case 0.63%, see column "Knock-in Level untouched" plus any positive performance of the weighted Basket multiplied by the Participation rate. If on the Final Fixing Date the worst performing Underlying closes at or below the Knock-In Level, the performance of the ZKB Barrier Reverse Convertible Last Look on worst of with participation is determined by the performance of the worst Underlying and the 0.63% Coupons paid out over the lifetime (according to Coupon Payment Date(s)), plus any positive performance of the weighted Basket multiplied by the Participation rate. The basket performance results from the performance of all basket components. It can be positive, although the performance of the worst Underlying is negative, as assumed in both tables. Therefore, the investor may suffer a partial or total loss.

The table above is valid at maturity only and is by no means meant as a price indication for this structured product throughout its lifetime. The price of this structured product depends on additional risk factors between the Initial Fixing Date and the Final Fixing Date. The price quoted on the secondary market can therefore deviate substantially from the above table. It was assumed, that Siemens rs was the worst performing Underlying. This selection is just a representative example of the possible alternatives.

#### 3. Material Risks for Investors

Obligations under this structured product constitute direct, unconditional and unsecured obligations of the Issuer and rank pari passu with other direct, unconditional and unsecured obligations of the Issuer. The value of the structured product not only depends on the performance of the Underlying and other developments in the financial markets, but also on the solvency of the Issuer, which may change during the term of this structured product.

Structured products are complex financial instruments, which entail considerable risks and, accordingly, are only suitable for investors who have the requisite knowledge and experience and understand thoroughly the risks connected with an investment in these structured products and are capable of bearing the economic risks. The loss potential of an investment in ZKB Barrier Reverse Convertible Last Look on worst of with participation of is limited to the difference between the purchase price of the ZKB Barrier Reverse Convertible Last Look on worst of with participation and the cash redemption defined according to Redemption Method. The guaranteed Coupon reduces the loss of the ZKB Barrier Reverse Convertible Last Look on worst of with participation compared to a direct investment in the Underlying with the worst relative performance. The value of the Underlying can then be lower than the Initial Fixing Level. The ZKB Barrier Reverse Convertible Last Look on worst of with participation is denominated in EUR. If the investor's reference currency differs from the EUR, the investor bears the risk between the EUR and his reference currency.
