If none of the Underlying Components' fixings has been trading at or below the Knock-out Level during the product's lifespan, the performance of the Certificate will be at least 8.00% and above that level will be analogous to the performance of the Underlying, multiplied by the Participation Rate, see Scenario "Knock-out Level not touched". If at least one of the Underlying Components' fixings has been trading at or below the Knock-out Level, the Performance of the Certificate at redemption will be analogous to that of the Underlying Component with the worst performance, see Scenario "Knock-out Level touched". Therefore, the investor may suffer a partial or total loss. In this table, the assumption was made that Kühne + Nagel Int rs was the worst performing Underlying Component. The selection is purely exemplary.

The above table is valid at maturity and is by no means meant as a price indication by the Issuer for this structured product throughout its lifetime. The value of this structured product depends on additional risk factors between the Initial Fixing Date and the Final Fixing Date. The price quoted on the secondary market can therefore deviate substantially from the table above.

3. Material Risks for Investors

Issuer Risk

Obligations under this structured product constitute direct, unconditional and unsecured obligations of the Issuer and rank pari passu with other direct, unconditional and unsecured obligations of the Issuer. The value of the structured product not only depends on the performance of the Underlying and other developments in the financial markets, but also on the solvency of the Issuer, which may change during the term of this structured product.

Specific Product Risks

Structured products are complex investment instruments that entail considerable risks and are therefore only intended for experienced investors who understand and are able to bear the associated risks.

The loss potential of this certificate corresponds exactly to that of the Underlying Component with the worst performance if the Knock-out Level has been touched. The value of this Underlying Component may be significantly lower at redemption than on the Initial Fixing Date. The certificate is denominated in CHF. The Investor bears all the exchange rate risks arising in connection with the structured product between the product currency, the currency of the Underlying Components, and against its reference currency.

4. Additional Terms

Modifications

If an extraordinary event as described in the base prospectus occurs in relation to the Underlying/a component of the Underlying or if any other extraordinary event occurs, which makes it impossible or particularly cumbersome for the Issuer, to fulfill its obligations under the products or to calculate the value of the products, the Issuer shall at its own discretion take all the necessary actions and, if necessary may modify the terms and conditions of these products at its own discretion in such way, that the economic value of the products after occurrence of the extraordinary event corresponds, to the extent possible, to the economic value of the products prior to the occurrence of the extraordinary event. Specific modification rules for certain types of Underlyings stated in the base prospectus shall prevail. If the Issuer determines, for whatever reason, that an adequate modification is not possible, the Issuer has the right to redeem the products early.

Change of Obligor

The Issuer is entitled at all times and without the consent of the investors to assign in whole (but not in part) the rights and claims under individual structured products or all of them to a Swiss or foreign subsidiary, branch or holding company of the Zürcher Kantonalbank (the "New Issuer") to the extent that (i) the New Issuer assumes all of the obligations arising out of the assigned structured products which the previous Issuer owed in respect of these structured products, (ii) the Zürcher Kantonalbank enters into a keep-well agreement with the New Issuer with terms equivalent to the one between the Zürcher Kantonalbank and Zürcher Kantonalbank Finance (Guernsey) Limited, (iii) the New Issuer has received from the supervisory authorities of the country in which it is domiciled all necessary approvals for the issue of structured products and the assumption of the obligations under the assigned structured products.

Market Disruptions

Compare specific provisions in the base prospectus.
