Regulatory Notification

Investment Profile

The composition of the Underlying of this structured product is managed **dynamically** and **discretionary** over the course of its term.

The Investment Manager selects stocks of companies operating in the field of power generation and storage. The focus is particularly on meeting the growing demand for electricity, driven in part by the significant increase in energy consumption from data centers and the intensive use of Artificial Intelligence (AI). No energy production source is excluded, and energy storage technologies, such as batteries, may also be considered. Additionally, ETFs that track the performance of indices in the power generation sector may be included. In order to reduce currency risks, foreign currencies are hedged against CHF.

Further information about the investment strategy – if available – can be obtained free of charge from Zürcher Kantonalbank, Bahnhofstrasse 9, 8001 Zürich, department VRIS or by way of e-Mail address documentation@zkb.ch.

Title Universe	The Title Universe consists of stocks or ETFs. In addition, the Investment Manager may decide to make a cash allocation, invest in bond ETFs or in so called Short-ETFs, if considered necessary to reduce exposure to the equity market. The cash portion must not exceed 50% of the certificate value at any time. The current composition of the Underlying can be requested free of charge by email at documentation@zkb.ch or by telephone on 044 292 60 65.					
Rebalancing	The Investment Manager rebalances the portfolio composition based on its qualified evaluation of the market. The Investment Manager considers only Underlying Components which provide sufficient liquidity and tradability. The Rebalancing is based on net prices of the Underlying Components (average of the net prices (see below) of the Underlying Components converted into the basket currency by the Issuer). The rebalancing period may be prolonged by the Issuer due to limited tradability.

Specific modification rules for certain types of Underlyings stated in the base prospectus shall prevail. If the Issuer determines, for whatever reason, that an adequate modification is not possible, the Issuer has the right to redeem the products early.

Compare specific provisions in the base prospectus.

During the term of the structured product, changes in or substitution of the Underlying by the Calculation Agent can occur.
