Redemption Method

Early Redemption:

On each Observation Date, the Issuer has the right, but not the obligation to call the product and to redeem it on the respective Early Redemption Date. Information flow about redemption is stated in section "Notices" and will immediately take effect on the Observation Date.

- If the Issuer exercises its one-sided early redemption right, the product will be redeemed at 100% of the Denomination plus Coupon Payment for the respective period. No further payments are made.
- If the Issuer does not exercise its one-sided early redemption right, the product continues to run until the next Observation Date.

Redemption at Maturity:

If no Early Redemption event has occurred, there are the following possible redemption scenarios:

If the price of none of the Underlyings has traded at or below the Knock-in Level at the Final Fixing Date, redemption will be 100% of the Denomination.

If the price of one or more of the Underlyings has traded at or below the Knock-in Level at the Final Fixing Date ("Knock-in Event"), the investor will receive a physical delivery of an amount of Underlyings as defined in Ratio per Denomination CHF 1 000 of the worst performing Underlying between the Initial Fixing Date and the Final Fixing Date. In this case, the applicable Ratio will not be determined until the Final Fixing Date (fractions will be paid in cash, no cumulation).

The Coupon will be paid out on the defined Coupon Payment Date(s) independent of the performance of the Underlyings.

The product is currency hedged. In the case of physical delivery, exchange rate changes are offset in determining the Ratio (number of Underlyings to be delivered), so that they have no impact on the performance of the product (Quantity Adjusted Option, abbreviated as "Quanto"). The equivalent value of the redemption (i.e. the value of the Underlyings to be delivered together with the cash settlement of the fractions) in the product currency thus only reflects the performance of the Underlying to be delivered. Gains or losses due to exchange rate changes are not passed on.
