Key Elements of the Product

In terms of value, buying this structured product is equivalent to buying the Underlying less any Fees. A single, low-cost transaction gives investors the opportunity to participate fully in the performance of the Underlying.

Execution of hedging transactions in "Traceable Gold"

In order to hedge the risks associated with Structured Products, the Issuer enters into appropriate hedging transactions. The promotion of sustainability is part of the Issuer's performance mandate. This principle is also to be applied to the procurement and sale of gold, which is why the Issuer conducts hedging transactions in connection with this Structured Product in so-called "Traceable Gold".

When procuring this gold, the Issuer will therefore follow the latest version of the London Bullion Market Association (LBMA) "Responsible Gold Guidance" ("Guidance"). This is a comprehensive set of rules and regulations which essentially deals with the observance of human rights, the fight against money laundering and terrorist financing, as well as the responsible and sustainable use of nature and the environment. The Guidance is binding for all producers (refineries) that produce according to the LBMA standards and is valid along the entire value chain. The criteria listed in the Guidance are to be understood as a minimum standard.

In addition, the gold held as collateral for this product is processed exclusively by refineries which verify the exact origin of the newly mined gold (country, region, etc.) and document this to the Issuer. Only countries and regions which fully meet all standards of the LBMA and those of the refineries are consistently selected. The Issuer therefore knows the origin of the individual gold bars (mine) and the refineries are obliged to provide regular and detailed information on the origin of the gold. Traceability is thus guaranteed and is implemented by the refineries. The gold is consistently mined, transported and refined in a segregated manner so that it is never mixed with conventionally mined gold.

The "Traceable Gold" purchased by the Issuer is held by the Issuer in a segregated deposit for this product. The Investor has no direct or indirect claim to the "Traceable Gold".

Taxes

The Federal securities transfer stamp tax is not levied on secondary market transactions. This product may be subject to additional withholding taxes or duties, such as related to FATCA, Sect. 871(m) U.S. Tax Code or foreign financial transaction taxes. Any payments due under this product are net of such taxes or duties.

The information above is a summary only of the Issuer's understanding of current law and practice in Switzerland relating to the taxation of Structured Products. The relevant tax law and practice may change. The Issuer does not assume any liability in connection with the above information. The tax information only provides a general overview and can not substitute the personal tax advice to the investor.
