Key Elements of the Product

ZKB Callable Barrier Reverse Convertible is an investment product, which can be redeemed early on different dates at the discretion of the Issuer. The investor achieves an above average return in case of stable, slightly raising or even falling levels of the Underlying. If the Underlying has ever touched or breached the Knock-in Level between Initial Fixing Date and Final Fixing Date, redemption will be 100 % of the Denomination, independent of the price of the Underlying at Final Fixing Date. If, between Initial Fixing Date and Final Fixing Date, the Knock-in Level of the Underlying has been touched or breached and on the Final Fixing Date, the Final Fixing Level of the Underlying is below the Initial Fixing Level, the investor will receive cash delivery. If a knock-in event has occurred but the Final Fixing Level of the Underlying is at or above its Initial Fixing Level, redemption will be 100% of the Denomination. The guaranteed Coupon will be paid out in any case.

The calculation of the redemption is independent of any changes in foreign exchange rates between EUR and the currency of the Underlying (Quanto Style).

The possibility of an early redemption has been neglected in the above table.

If the Knock-in Level is never touched between Initial Fixing Date and Final Fixing Date, the performance of the ZKB Callable Barrier Reverse Convertible will equal the Coupon of 12.0000%** , cf. table under "Knock-in Level untouched", paid out during the term of the structured product according to Coupon Payment Dates.

If, however, the Knock-in Level is touched between Initial Fixing Date and Final Fixing Date, cf. Table under "Knock-in Level touched", the loss of the ZKB Callable Barrier Reverse Convertible at maturity corresponds to the loss of the Underlying less the Coupon(s) of 12.0000%** paid out during the term of the structured product, i.e. a partial or total loss. If the Final Fixing Level of the Underlying trades at or above the Initial Fixing Level, redemption will be 100% of Denomination.

Additionally, the Coupon(s) will be paid out according to Coupon Payment Dates.

The table above is valid at maturity only and is by no means meant as a price indication for this structured product throughout its lifetime. The price of this structured product depends on additional risk factors between Initial Fixing Date and Final Fixing Date. The price quoted on the secondary market can therefore deviate substantially from the above table.

3. Material Risks for Investors

Issuer Risk

Obligations under this structured product constitute direct, unconditional and unsecured obligations of the Issuer and rank pari passu with other direct, unconditional and unsecured obligations of the Issuer. The value of the structured product not only depends on the performance of the Underlying and other developments in the financial markets, but also on the solvency of the Issuer, which may change during the term of this structured product.

Specific Product Risks

Structured products are complex financial instruments, which entail considerable risks and, accordingly, are only suitable for investors who have the requisite knowledge and experience and understand thoroughly the risks connected with an investment in these structured products and are capable of bearing the economic risks. The price of the Underlying can trade at redemption considerably below the Initial Fixing Level. This product is denominated in EUR. If the investor's reference currency differs from the EUR, the investor bears the risk between the EUR and his reference currency.

4. Additional Terms

Specific modification rules for certain types of Underlyings stated in the base prospectus shall prevail. If the Issuer determines, for whatever reason, that an adequate modification is not possible, the Issuer has the right to redeem the products early.

Change of Obligor

The Issuer is entitled at all times and without the consent of the investors to assign in whole (but not in part) the rights and claims under individual structured products or all of them to a Swiss or foreign subsidiary, branch or holding company of the Zürcher Kantonalbank (the "New Issuer") to the extent that (i) the New Issuer assumes all of the obligations arising out of the assigned Derivatives which the previous Issuer owed in respect of these Derivatives, (ii) the Zürcher Kantonalbank enters into a keep-well agreement with the New Issuer with terms equivalent to the one between the Zürcher Kantonalbank and Zürcher Kantonalbank Finance (Guernsey) Limited, (iii) the New Issuer has received from the supervisory authorities of the country in which it is domiciled all necessary approvals for the issue of Derivatives and the assumption of the obligations under the assigned Derivatives.
