## 3. Material Risks for Investors

### Credit Risk Relating to Issuer

Obligations under these structured products constitute direct, unconditional and unsecured obligations of the Issuer and rank pari passu with other direct, unconditional and unsecured obligations of the Issuer. The value of the structured product does not only depend on the performance of the Underlying and other developments in the financial markets, but also on the solvency of the Issuer, which may change during the term of this structured product.

### Specific Product Risks

Structured products are complex investment instruments, which entail considerable risks and, accordingly, are only suitable for investors who have the requisite knowledge and experience and understand thoroughly the risks connected with an investment in these structured products and are capable of bearing the economic risks.

The loss potential of an investment in a ZKB Outperformance Certificate with Cap is limited to the difference between the Issue price of the ZKB Outperformance Certificate with Cap and the price of the Underlying at maturity. The price of the Underlying can then be significantly lower than the Initial Fixing Level.

The ZKB Outperformance Certificate with Cap is denominated in CHF. If the investor's reference currency differs from the CHF, the investor bears the risk between the CHF and his reference currency.

Specific modification rules for certain types of Underlyings stated in the base prospectus shall prevail. If the Issuer determines, for whatever reason, that an adequate modification is not possible, the Issuer has the right to redeem the products early.
