Key Elements of the product

With the purchase of a ZKB Cushion Downside Participation Certificate with Cap, the investor participates at a rate corresponding to the Upside Participation in case of a positive development of the Underlying compared to the Exercise Price. The maximum return is capped. If the Final Fixing Level of the Underlying is lower than the Exercise Price, the Investor will participate in the negative performance of the Underlying at a rate corresponding to the Downside Participation. In this case, the investor's loss is smaller than in the case of a direct investment in the Underlying (Cushion).

Taxes

The product is considered as transparent and IUP (Intérêt Unique Prédominant). The implied internal rate of return is subject to income tax for private investors with Swiss tax domicile at sale or maturity (IRR 0.00%** p.a., present value of bond part at issue 100.00%**) and is determined in compliance with the "modifizierte Differenzbesteuerung" tax rule based on the ESTV Bondfloor Pricing method. Any return derived from the option part qualifies as capital gain and is not subject to Swiss income tax for private investors with Swiss tax domicile. The product is not subject to Swiss withholding tax. The Federal securities transfer stamp tax is levied on secondary market transactions of this product. This product may be subject to additional withholding taxes or duties, such as related to FATCA, Sect. 871(m) U.S. Tax Code or foreign financial transaction taxes. Any payments due under this product are net of such taxes or duties.
