

ZKB MeinIndex Sustainable Water

Reporting | CH Sec No. 10 687 112

31.10.2024

This is a Structured Product. It does not constitute a collective investment scheme within the meaning of the Swiss Federal Act on Collective Investment Schemes (CISA) and it is not subject to authorisation or supervision by FINMA. The issuer risk is borne by investors.

In brief

- Fresh water is essential to all forms of life on our planet.
- The world's population is growing at a rate of 78m annually. Population growth increases water consumption and requires the expansion of water infrastructures.
- Fresh water is becoming an increasingly scarce resource and therefore an economic good.
- Existing water infrastructures are in many cases obsolete and in need of replacement.
- Global warming is also having an increasingly negative effect on scarce supplies of fresh water.

Distribution by region as of 31.10.2024

Distribution by portfolio category as of 31.10.2024

2016	15.2%
2017	17.8%
2018	-13.5%
2019	38.1%
2020	12.8%
2021	39.6%
2022	-18.2%
2023	13.2%
2024 YTD	17.5%

A precious commodity
Fresh water is becoming an increasingly precious commodity on our planet, and therefore an ever-more important economic factor. Of the world's 6.2 bn population, around 0.8 bn currently have no access to clean water and 2.4 bn live without an adequate sewerage system.

Water is more than just a liquid: it is essential to all forms of life on the planet. Besides a steady rise in usage and the attendant pollution of globally scarce supplies of drinking water, global warming is also having an increasingly adverse effect on this precious commodity. To ensure that all the planet's inhabitants have an adequate water supply in the future, the economy needs to deal with this resource in a much more sustainable manner. Sustainable water-sector corporations are therefore enjoying increasingly strong demand, providing attractive opportunities for investors.

- Four key trends will drive the water sector's growth over the next few years:
- The world's population is growing at an annual rate of around 78m, and there are likely to be more than 8 bn people by 2025. Population growth increases water consumption and necessitates appropriate infrastructures.
 - Existing water infrastructures are in many cases obsolete and in need of replacement. There is a tremendous need for investment.
 - The demands on water quality standards – particularly in the industrialized countries – are rising.
 - According to the Intergovernmental Panel on Climate Change (IPCC), climate change means declining drinking water resources.

Water supply
This includes firms that have significant activities in the water / wastewater sector. These companies are characterized by their sustainable corporate leadership/strategy – meaning they take ecological and social as well as financial factors into account in their corporate strategy.

Water technology
The companies represented in the water technology category are specialized in areas such as water/wastewater piping, sanitary installations and water measurement. They also include companies with water-efficient products and processes. Water/wastewater treatment Due to continued pollution of water – especially in the residential, industrial and agricultural sectors – demand for water purification

Key data ZKB MeinIndex Sustainable Water

CH Sec No.	10 687 112
Bloomberg Symbol	ZKBIWASS

Open End ZKB Tracker Certificates

CH Sec No.	ISIN	Symbol	Tranche
10 716 407	CH0107164078	TRWASO	Retail

Water services
The water services category consists of companies that are involved in the measurement and assessment of water quality or with the planning of installations, for instance for water treatment and soil decontamination.

Hydroelectricity
Corporations which focus on renewable energy production from hydroelectricity and are managed on a sustainable basis.

Information on ZKB MeinIndex
Currently, the ZKB MeinIndex Sustainability Index Group encompasses the topics Energy Efficiency, Mobility, Sustainable Energy Production, Resources, Solar, Water and Wind as well as the regions Emerging Markets and Pacific. The stock universe for the regions is subject to monthly reselection. For the topic categories a new stock universe is selected twice a year. The indices of the Sustainability Index Group are non dividend-adjusted price indices. Prices are published in CHF, and are not currency-hedged. The titles have been selected together with the Sustainability Research of Zürcher Kantonalbank. The ZKB Sustainability Research applies various sustainability criteria to analyse the companies. For the selection and monitoring of the individual stocks and their weightings in this product Zürcher Kantonalbank is solely responsible.
