## Redemption Method

### Early Redemption:

Early Redemption is dependent on the Underlying's price level on the respective Observation Date.

- If the closing price of all Underlyings on the Observation Date trade at or above the Call Level, the product will be redeemed early at 100% of the Denomination.
- If one or more Underlyings trades below the Call Level on the Observation Date, the product continues.

### Redemption at maturity:

If no Early Redemption event has occurred, there are the following possible redemption scenarios:

If the price of none of the Underlyings has traded at or below the Knock-in Level between the Initial Fixing Date and the Final Fixing Date, redemption will be 100% of the Denomination independent of the Final Fixing Level of the Underlyings.

If the price of one or more of the Underlyings has traded at or below the Knock-in Level between Initial Fixing Date and Final Fixing Date,

- redemption will be 100% of the Denomination if the Final Fixing Levels of all Underlyings are at or higher than the Initial Fixing Level or
- the investor will receive a cash repayment corresponding to the Denomination minus the percentage difference between Initial Fixing Level and Final Fixing Level of the Underlying with the largest negative performance.

The Coupon will be paid out on the defined Payment Date(s) independent of the performance of the Underlyings.

The calculation of the Redemption is independent of any changes in foreign exchange rates between EUR and the currency of the Underlyings (Quanto Style).

The possibility of an early redemption has been neglected in the above table.

If all Underlyings always trade above the Knock-in Level during the lifetime of the product or if the Final Fixing Level of all Underlyings trades above the Initial Fixing Level, the redemption equals 100.00% of Denomination (EUR 1'000\*\*). In these cases, the performance of the product corresponds to the sum of the guaranteed Coupons paid out during the lifetime: 10.5000%\*\*.

If the price of at least one Underlying trades at or below the Knock-in Level during the lifetime of the product and the Final Fixing Level of at least one Underlying trades below the Initial Fixing Level, refer to column "Knock-in Level touched", the performance equals the percentual difference between the Initial Fixing Level and the Final Fixing Level of the worst performing Underlying. This negative performance is reduced by the guaranteed Coupons paid out during the lifetime of the product. The Coupon Payment occurs independently of the level of the Underlyings on the respective Coupon Observation Date.

The redemption scenario above neglects early redemption. The table above is valid at maturity only and is by no means meant as a price indication for these derivative series throughout its lifetime. The price of these derivative series depends on additional risk factors between the Initial Fixing Date and the Final Fixing Date. The price quoted on the secondary market can therefore deviate substantially from the above table. It was assumed, that Diageo Plc s was the worst performing Underlying. This selection is just a representative example of the possible alternatives. The calculation of the Redemption is independent of any changes in foreign exchange rates between EUR and the currency of the Underlying (Quanto Style).

## 3. Material Risks for Investors

### Issuer Risk

Obligations under this Structured Product constitute direct, unconditional and unsecured obligations of the Issuer and rank pari passu with other direct, unconditional and unsecured obligations of the Issuer. The value of the Structured Product not only depends on the performance of the Underlying and other developments in the financial markets, but also on the solvency of the Issuer, which may change during the term of this Structured Product.

### Specific Product Risks

Structured Products are complex financial instruments, which entail considerable risks and, accordingly, are only suitable for investors who have the requisite knowledge and experience and understand thoroughly the risks connected with an investment in these Structured Products and are capable of bearing the economic risks. The loss potential of an investment in ZKB Autocallable BRC on worst of is in case of a Knock-in Event equal to the one of the Underlying with the worst Performance minus the coupon paid out. The price of the Underlying can trade at redemption considerably below the Initial Fixing Level. The Product is denominated in EUR. If the investor's reference currency differs from the EUR, the investor bears the risk between the EUR and his reference currency.

#### 4. Additional Terms

##### Modifications

If an Extraordinary Event as described in the base prospectus occurs in relation to the Underlying/a component of the Underlying or if any other extraordinary event occurs, which makes it impossible or particularly cumbersome for the Issuer, to fulfill its obligations under the Structured Products or to calculate the value of the Structured Products, the Issuer shall at its own discretion take all the necessary actions and, if necessary may modify the terms and conditions of these Structured Products at its own discretion in such way, that the economic value of the Structured Products after occurrence of the extraordinary event corresponds, to the extent possible, to the economic value of the Structured Products prior to the occurrence of the extraordinary event. Specific modification rules for certain types of Underlyings stated in the base prospectus shall prevail. If the Issuer determines, for whatever reason, that an adequate modification is not possible, the Issuer has the right to redeem the Structured Products early.

##### Change of Obligor

The Issuer is entitled at all times and without the consent of the investors to assign in whole (but not in part) the rights and claims under individual Derivatives or all of them to a Swiss or foreign subsidiary, branch or holding company of the Zürcher Kantonalbank (the "New Issuer") to the extent that (i) the New Issuer assumes all of the obligations arising out of the assigned Derivatives which the previous Issuer owed in respect of these Derivatives, (ii) the Zürcher Kantonalbank enters into a keep-well agreement with the New Issuer with terms equivalent to the one between the Zürcher Kantonalbank and Zürcher Kantonalbank Finance (Guernsey) Limited, (iii) the New Issuer has received from the supervisory authorities of the country in which it is domiciled all necessary approvals for the issue of Derivatives and the assumption of the obligations under the assigned Derivatives.

##### Market Disruptions

Compare specific provisions in the base prospectus.

##### Selling Restrictions

EEA, U.S.A./U.S. persons, United Kingdom, Guernsey

##### Prudential Supervision

As a bank within the meaning of the Swiss Federal Act on Banks and Savings Banks (BankG; SR 952.0) and a securities firm within the meaning of the Swiss Federal Act on Financial Institutions (FinIAG; SR 954.1), Zürcher Kantonalbank is subject to the prudential supervision of FINMA, Laupenstrasse 27, CH-3003 Bern, <https://www.finma.ch>.

##### Recording of Telephone Conversations

Investors are reminded that telephone conversations with trading or sales units of Zürcher Kantonalbank are recorded. Investors, engaging in telephone conversations with these units provide their tacit consent to the recording of their conversations.

##### Further Information

This document constitutes neither an offer nor a recommendation or invitation to purchase financial instruments and can't replace the individual investor's own judgement. The information contained in this document does not constitute investment advice but is intended solely as a product description. An investment decision should in any case be made on the basis of these Final Terms and the base prospectus. Particularly, before entering into a transaction, the investor should, if necessary with the assistance of an advisor, examine the conditions for investment in the Product in consideration of his personal situation with regard to legal, regulatory, tax and other consequences. Only an investor who is aware of the risks of the transaction and has the financial capacity to bear any losses should enter into such transactions.
