Redemption Method

Early Redemption:

On each Observation Date, the Issuer has the right, but not the obligation to call the product and to redeem it on the respective Early Redemption Date. Information flow about redemption is stated in section "Notices" and will immediately take effect on the Observation Date.

- If the Issuer exercises its one-sided early redemption right, the product will be redeemed at 100% of the Denomination plus Coupon Payment for the respective period. No further payments are made.
- If the Issuer does not exercise its one-sided early redemption right, the product continues to run until the next Observation Date.

Redemption at maturity:

If no Early Redemption event has occurred, there are the following possible redemption scenarios:
If the price of none of the Underlyings has traded at or below the Knock-in Level between the Initial Fixing Date and the Final Fixing Date, redemption will be 100% of the Denomination independent of the closing price of the Underlyings on the Final Fixing Date.
If the price of one or more of the Underlyings has traded at or below the Knock-in Level between the Initial Fixing Date and the Final Fixing Date,

- redemption will be 100% of the Denomination if all Underlyings close at or higher than the Initial Fixing Level on the Final Fixing Date or
- the investor will receive a physical delivery of a number of Underlyings as defined in Ratio per Denomination of the worst performing Underlying between the Initial Fixing Date and the Final Fixing Date (Fractions will be paid in cash, no cumulation).

The Coupon will be paid out on the redemption date independent of the performance of the Underlyings.

Key Elements of the Product	ZKB Callable Barrier Reverse Convertible on worst of is an investment product, which can be redeemed early on different dates at the discretion of the Issuer. The investor achieves an above average return in case of stable, slightly raising or even falling levels of the Underlyings. If no Underlying has ever touched or breached the Knock-in Level between Initial Fixing Date and Final Fixing Date, redemption will be 100 % of the Denomination, independent of the price of the Underlyings at Final Fixing Date. If, between Initial Fixing Date and Final Fixing Date, the Knock-in Level of one or more of the Underlyings has been touched or breached and on the Final Fixing Date, the Final Fixing Level of one or more Underlyings is below the Initial Fixing Level, the investor will receive a physical delivery of the worst performing Underlying (between Initial Fixing Date and Final Fixing Date) according to the Redemption Method. If a knock-in event has occurred but the Final Fixing Levels of all Underlyings are at or above their respective Initial Fixing Level, redemption will be 100 % of the Denomination. The guaranteed Coupon will be paid out in any case. Because of the guaranteed Coupon the purchase price is clearly below the price of the Underlyings at Initial Fixing Date. During the lifetime, this ZKB Callable Barrier Reverse Convertible on worst of is traded flat accrued interest, i.e. accrued interest is included in the trading price.
Taxes	The product is considered as Non-IUP (Intérêt Unique Prédominant). The coupon payments of 2.1250% (8.5000% p.a.)** are divided in an option premium payment of 8.5000% p.a.** and an interest payment of 0.0000% p.a. ** The option premium part qualifies as capital gain and is not subject to Swiss income tax for private investors with Swiss tax domicile. The interest part is subject to Swiss income tax at the time of payment. The Product is not subject to Swiss withholding tax. The Federal securities transfer stamp tax is not levied on secondary market transactions for with initial duration of less than one year. The Federal securities transfer stamp tax will be charged in the case of physical delivery of the underlying securities at maturity. This product may be subject to additional withholding taxes or duties, such as related to FATCA, Sect. 871(m) U.S. Tax Code or foreign financial transaction taxes. Any payments due under this product are net of such taxes or duties. The possibility of an early redemption has been neglected in the above table.

If the Knock-in Level is never touched between the Initial Fixing Date and Final Fixing Date, the performance of the ZKB Callable Barrier Reverse Convertible on worst of will equal the Coupon of 8.5000%**, cf. table under "Knock-in Level untouched", paid out during the term of the Structured Product according to Coupon Payment Dates.
If, however, the Knock-in Level is touched between the Initial Fixing Date and the Final Fixing Date, cf. Table under "Knock-in Level touched", the loss of the ZKB Callable Barrier Reverse Convertible on worst of at maturity corresponds to the loss of the Underlying with the worst relative performance between Initial Fixing Date and Final Fixing Date less the Coupon(s) of 8.5000%** paid out during the term of the Structured Product. If the Final Fixing Levels of all Underlyings trade at or above the Initial Fixing Level, redemption will be 100% of Denomination.
Additionally, the Coupon(s) will be paid out according to Coupon Payment Dates.

The table above is valid at maturity only and is by no means meant as a price indication for this Structured Product throughout its lifetime. The price of this Structured Product depends on additional risk factors between the Initial Fixing Date and the Final Fixing Date. The price quoted on the secondary market can therefore deviate substantially from the above table. It was assumed, that Geberit rs was the worst performing Underlying. This selection is just a representative example of the possible alternatives.

3. Material Risks for Investors

Issuer Risk

Obligations under this Structured Product constitute direct, unconditional and unsecured obligations of the Issuer and rank pari passu with other direct, unconditional and unsecured obligations of the Issuer. The value of the Structured Product not only depends on the performance of the Underlying and other developments in the financial markets, but also on the solvency of the Issuer, which may change during the term of this Structured Product.

Specific Product Risks

Structured Products are complex financial instruments, which entail considerable risks and, accordingly, are only suitable for investors who have the requisite knowledge and experience and understand thoroughly the risks connected with an investment in these Structured Products and are capable of bearing the economic risks. The loss potential of an investment in ZKB Callable Barrier Reverse Convertible on worst of is in case of a Knock-in Event equal to the one of the Underlying with the worst Performance minus the coupon paid out. The price of the Underlying can trade at redemption considerably below the Initial Fixing Level. The Product is denominated in CHF. If the investor's reference currency differs from the CHF, the investor bears the risk between the CHF and his reference currency.

4. Additional Terms

Modifications

If an Extraordinary Event as described in the base prospectus occurs in relation to the Underlying/a component of the Underlying or if any other extraordinary event occurs, which makes it impossible or particularly cumbersome for the Issuer, to fulfill its obligations under the Structured Products or to calculate the value of the Structured Products, the Issuer shall at its own discretion take all the necessary actions and, if necessary may modify the terms and conditions of these Structured Products at its own discretion in such way, that the economic value of the Structured Products after occurrence of the extraordinary event corresponds, to the extent possible, to the economic value of the Structured Products prior to the occurrence of the extraordinary event. Specific modification rules for certain types of Underlyings stated in the base prospectus shall prevail. If the Issuer determines, for whatever reason, that an adequate modification is not possible, the Issuer has the right to redeem the Structured Products early.

Change of Obligor

The Issuer is entitled at all times and without the consent of the investors to assign in whole (but not in part) the rights and claims under individual Derivatives or all of them to a Swiss or foreign subsidiary, branch or holding company of the Zürcher Kantonalbank (the "New Issuer") to the extent that (i) the New Issuer assumes all of the obligations arising out of the assigned Derivatives which the previous Issuer owed in respect of these Derivatives, (ii) the Zürcher Kantonalbank enters into a keep-well agreement with the New Issuer with terms equivalent to the one between the Zürcher Kantonalbank and Zürcher Kantonalbank Finance (Guernsey) Limited, (iii) the New Issuer has received from the supervisory authorities of the country in which it is domiciled all necessary approvals for the issue of Derivatives and the assumption of the obligations under the assigned Derivatives.
