If the Knock-in Level is never touched between the Initial Fixing Date and Final Fixing Date, the performance of the ZKB Barrier Reverse Convertible on worst of will equal the Coupon of 15.00% \*\*, cf. table under "Knock-in Level untouched", paid out during the term of the Structured Product according to Coupon Payment Date(s).

If, however, the Knock-in Level is touched between the Initial Fixing Date and the Final Fixing Date, cf. Table under "Knock-in Level touched", the loss of the ZKB Barrier Reverse Convertible on worst of at maturity corresponds to the loss of the Underlying with the worst relative performance between Initial Fixing Date and Final Fixing Date less the Coupon(s) of 15.00% \*\* paid out during the term of the Structured Product. If the Final Fixing Levels of all Underlyings trade at or above the Cap Level, redemption will be 100% of Denomination. Additionally, the Coupon(s) will be paid out according to Coupon Payment Date(s).

The table above is valid at maturity only and is by no means meant as a price indication for this Structured Product throughout its lifetime. The price of this Structured Product depends on additional risk factors between the Initial Fixing Date and the Final Fixing Date. The price quoted on the secondary market can therefore deviate substantially from the above table. It was assumed, that AIR France - KLMs was the worst performing Underlying. This selection is just a representative example of the possible alternatives.
