If the Knock-in Level is never touched between the Initial Fixing Date and Final Fixing Date, the performance of the ZKB Barrier Reverse Convertible on worst of will equal the Coupon of 12.00% \*\*, cf. table under "Knock-in Level untouched", paid out during the term of the structured product according to Coupon Payment Date(s).

If, however, the Knock-in Level is touched between the Initial Fixing Date and the Final Fixing Date, cf. Table under "Knock-in Level touched", the loss of the ZKB Barrier Reverse Convertible on worst of at maturity corresponds to the loss of the Underlying with the worst relative performance between Initial Fixing Date and Final Fixing Date less the Coupon(s) of 12.00% \*\* paid out during the term of the structured product, i.e. a partial or total loss. If the Final Fixing Levels of all Underlyings trade at or above the Cap Level, redemption will be 100% of Denomination. Additionally, the Coupon(s) will be paid out according to Coupon Payment Date(s).

The table above is valid at maturity only and is by no means meant as a price indication for this structured product throughout its lifetime. The price of this structured product depends on additional risk factors between the Initial Fixing Date and the Final Fixing Date. The price quoted on the secondary market can therefore deviate substantially from the above table. It was assumed, that Zurich Insurance rs was the worst performing Underlying. This selection is just a representative example of the possible alternatives.

### 3. Material Risks for Investors

Obligations under this structured product constitute direct, unconditional and unsecured obligations of the Issuer and rank pari passu with other direct, unconditional and unsecured obligations of the Issuer. The value of the structured product not only depends on the performance of the Underlying and other developments in the financial markets, but also on the solvency of the Issuer, which may change during the term of this structured product.

Specific Product Risks Structured products are complex financial instruments, which entail considerable risks and, accordingly, are only suitable for investors who have the requisite knowledge and experience and understand thoroughly the risks connected with an investment in these structured products and are capable of bearing the economic risks. The loss potential of an investment in this structured product is in case of a Knock-in Event equal to the one of the Underlying with the worst relative performance. The price of the Underlyings can trade at redemption considerably below the Cap Level. This product is denominated in CHF. If the investor's reference currency differs from the CHF, the investor bears the risk between the CHF and his reference currency.

## 4. Additional Terms

| Modifications                                    | If an extraordinary event as described in the base prospectus occurs in relation to the Underlying/a component of the Underlying or if any other extraordinary event occurs, which makes it impossible or particularly cumbersome for the Issuer, to fulfill its obligations under the products or to calculate the value of the products, the Issuer shall at its own discretion take all the necessary actions and, if necessary may modify the terms and conditions of these products at its own discretion in such way, that the economic value of the products after occurrence of the extraordinary event corresponds, to the extent possible, to the economic value of the products prior to the occurrence of the extraordinary event. Specific modification rules for certain types of Underlyings stated in the base prospectus shall prevail.   |
|--|--|
|  | If the Issuer determines, for whatever reason, that an adequate modification is not possible,<br>the Issuer has the right to redeem the products early.  |
| Change of Obligor                                | The Issuer is entitled at all times and without the consent of the investors to assign in whole (but not in part) the rights and claims under individual structured products or all of them to a Swiss or foreign subsidiary, branch or holding company of the Zürcher Kantonalbank (the "New Issuer") to the extent that (i) the New Issuer assumes all of the obligations arising out of the assigned Derivatives which the previous Issuer owed in respect of these Derivatives, (ii) the Zürcher Kantonalbank enters into a keep-well agreement with the New Issuer with terms equivalent to the one between the Zürcher Kantonalbank and Zürcher Kantonalbank Finance (Guernsey) Limited, (iii) the New Issuer has received from the supervisory authorities of the country in which it is domiciled all necessary approvals for the issue of Derivatives and the assumption of the obligations under the assigned Derivatives. |
| <b>Market Disruptions</b>                        | Compare specific provisions in the base prospectus.  |
| Prudential Supervision                           | As a bank within the meaning of the Swiss Federal Act on Banks and Savings Banks (BankG;<br>SR 952.0) and a securities firm within the meaning of the Swiss Federal Act on Financial<br>Institutions (FinIAG; SR 954.1), Zürcher Kantonalbank is subject to the prudential<br>supervision of FINMA, Laupenstrasse 27, CH-3003 Bern, https://www.finma.ch.  |
