

ZKB MeinIndex Sustainable Water

Reporting | CH Sec No. 10 687 112

29.03.2024

This is a Structured Product. It does not constitute a collective investment scheme within the meaning of the Swiss Federal Act on Collective Investment Schemes (CISA) and it is not subject to authorisation or supervision by FINMA. The issuer risk is borne by investors.

In brief

- Fresh water is essential to all forms of life on our planet.
- The world's population is growing at a rate of 78m annually. Population growth increases water consumption and requires the expansion of water infrastructures.
- Fresh water is becoming an increasingly scarce resource and therefore an economic good.
- Existing water infrastructures are in many cases obsolete and in need of replacement.
- Global warming is also having an increasingly negative effect on scarce supplies of fresh water.

Distribution by region as of 29.03.2024

Distribution by portfolio category as of

A precious commodity

Fresh water is becoming an increasingly precious commodity on our planet, and therefore an ever-more important economic factor. Of the world's 6.2 bn population, around 0.8 bn currently have no access to clean water and 2.4 bn live without anvadequate sewerage system.

Water is more than just a liquid: it is essential to all forms of life on the planet. Besides a steady rise in usage and the attendant pollution of globally scarce supplies of drinking water, global warming is also having an increasingly adverse effect on this precious commodity. To ensure that all the planet's inhabitants have an adequate water supply in the future, the economy needs to deal with this resource in a much more sustainable manner. Sustainable water-sector corporations are therefore enjoying increasingly strong demand, providing attractive opportunities for investors.

Four key trends will drive the water sector's growth over the next

few years:

- The world's population is growing at an annual rate of around 78m, and there are likely to be more than 8 bn people by 2025. Population growth increases water consumption and necessitates appropriate infrastructures.
- Existing water infrastructures are in many cases obsolete and in need of replacement. There is a tremendous need for investment.
- The demands on water quality standards particularly in the industrialized countries are rising.
- According to the Intergovernmental Panel on Climate Change (IPCC), climate change means declining drinking water resources.

Water supply

This includes firms that have significant activities in the water / wastewater sector. These companies are characterized by their sustainable corporate leadership/strategy – meaning they take ecological and social as well as financial factors in-to account in their corporate strategy.

Water technology

The companies represented in the water technology category are specialized in areas such as water/wastewater piping, sanitary installations and water measurement. They also in-clude companies with water-efficient products and processes. Water/wastewater treatment Due to continued pollution of water – especially in the residential, industrial and agricultural sectors – demand for water purification and wastewater treatment technologies is growing

Key data ZKB MeinIndex Sustainable

Water

Water services

The water services category consists of companies that are involved in the measurement and assessment of water quality or with the planning of installations, for instance for water treatment and soil decontamination.

Hydroelectricity

Corporations which focus on renewable energy production fromhydroelectricity and are managed on a sustainable basis.

Information on ZKB MeinIndex

Currently, the ZKB MeinIndex Sustainability Index Group encompasses the topics Energy Efficiency, Mobility, Sustainable Energy Production, Resources, Solar, Water and Wind as well as the regions Emerging Markets and Pacific. The stock universe for the regions is subject to monthly reselection. For the topic categories a new stock universe is selected twice a year. The indices of the Sustainability Index Group are non dividendadjusted price indices. Prices are published in CHF, and are not currency-hedged. The titles have been selected together with the Sustainability Research of Zürcher Kantonalbank. The ZKB Sustainability Research applies various sustainability criteria to analyse the companies. For the selection and monitoring of the individual stocks and their weightings in this product Zürcher Kantonalbank is solely responsible.

Sale or offering of structured products may be subject to country-specific selling restrictions, which must imperatively be followed. For the above-mentioned structured products and the present document the following restrictions apply: U.K., Guernsey, EEA-member states, USA and U.S. persons. In particular must this publication and the information contained within not be distributed and / or redistributed, used or relied upon, by any person (whether individual or entity) who may be a US person under Regulation S under the US Securities Act of 1933. US persons include any US resident; any corporation, company, partnership or other entity organized under any law of the United States; and other categories set out in Regulation S. Investors are reminded, that telephone conversations with trading or sales units of the Zürcher Kantonalbank are recorded. Investors, who have telephone conversations with the units consent tacitly to the recording.
